Home Planners

142 POPULAR DESIGNS

FIRST REVISED EDITION

- FOREWORD -

This is Home Planners' second publication of its new Popular Homes Series. The 142 homes shown here represent only a cross-section of many hundreds of designs available from Home Planners, Inc. Like its predecessor, 150 POPULAR HOMES, this 96 page book contains six delightful portfolios of outstanding home designs by the distinguished Richard B. Pollman. Should you fail to find a design in this book which will satisfy your living requirements and your building budget, we strongly suggest you review the designs featured in other current books described on Page 48. After selecting a design and studying the construction blueprints you will find the assistance of your local architect, builder and material dealer most valuable in guiding you wisely and economically through your building program.

DESIGN G 810

1,437 sq. ft., 27,311 cu. ft.

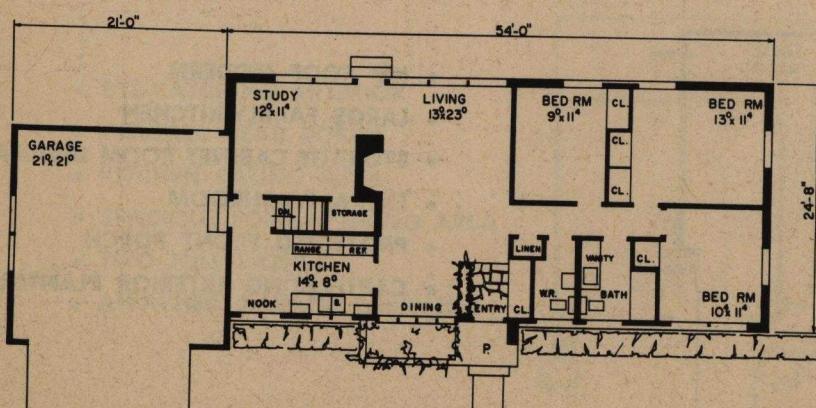

The center entrance of this attractive brick veneer ranch home routes traffic conveniently to the three main areas—the living, the sleeping, and the family-kitchen areas. The living room, with its raised hearth fireplace, and built-in book shelves, is free of unnecessary cross-room traffic. The sleeping area, with its three bedrooms, features plenty of wardrobe closets and twin lavatories in the bath. The family-kitchen is spacious and has a barbecue unit. The extra washroom, laundry equipment, and basement stairs are strategically located.

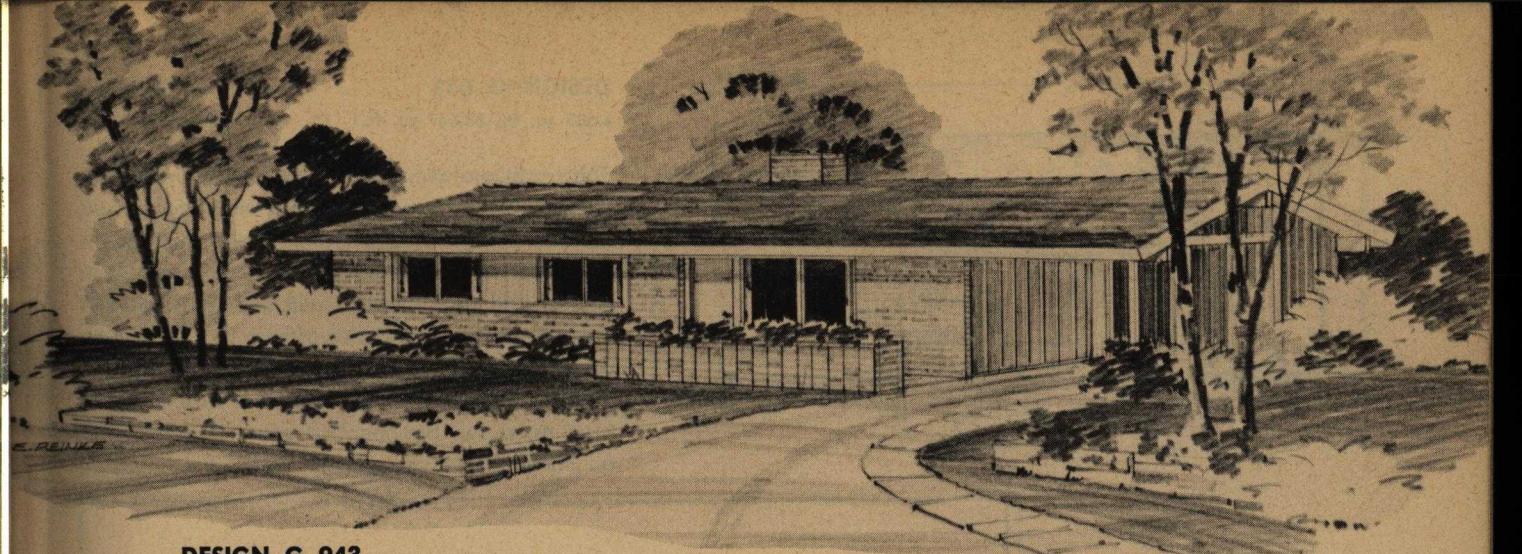

DESIGN G 448

1,328 sq. ft., 23,904 cu. ft.

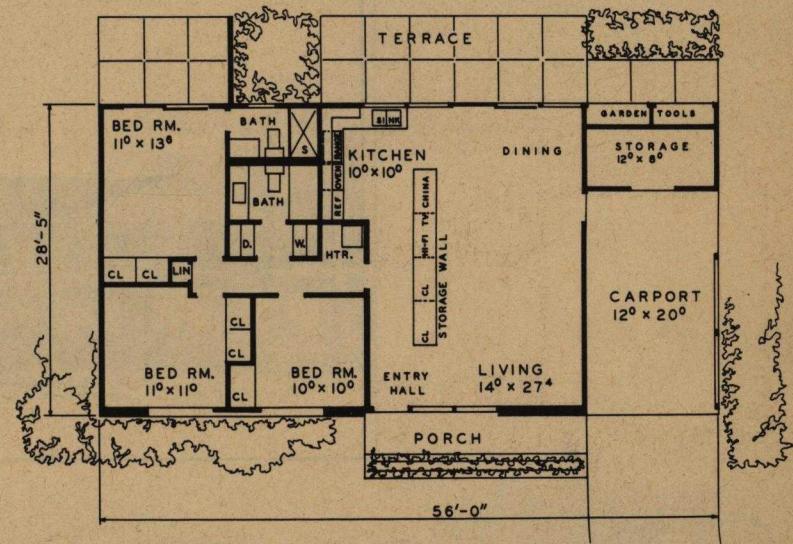

Convenient living will be experienced by the occupants of this three bedroom, 1½ bath, brick veneer ranch home. The efficient work center is flanked by the informal breakfast nook and the formal dining area, separated from the front entry hall by the delightful planter unit with its storage space below. The study may function as a multi-purpose room—for reading, TV, overnight guests. Other highlights include: economical back-to-back plumbing of the washroom and bath; the attractive fireplace; the full basement, and the attached two car garage.

DESIGN G 943

1,232 sq. ft., 12,726 cu. ft.

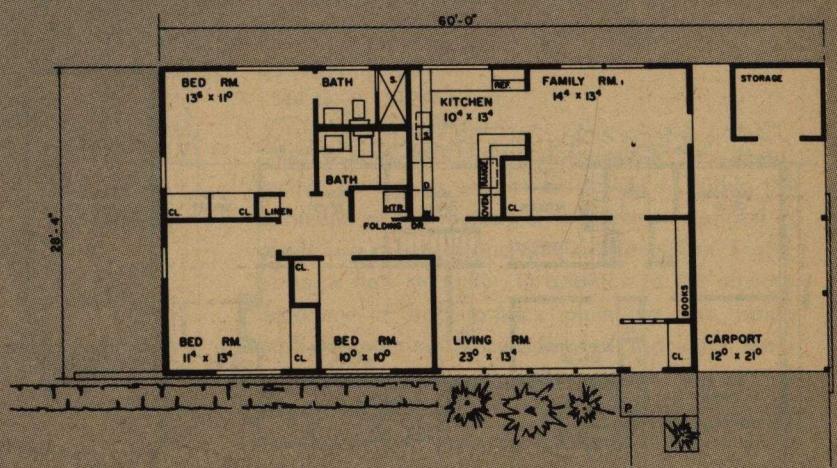

Here is a simple, economically built rectangle with exceptional exterior appeal and a cleverly planned interior. The overhanging, unbroken roof line helps maintain that low-slung effect. Only the front exterior highlights the use of brick, while the massive planter catches the eye and creates much interest around the front entrance. Upon entering the front door one experiences the distinct feeling of space. This results from the sloping ceilings and the open planning of the living-dining-kitchen areas. Two baths and plenty of storage facilities also help make this an outstanding design.

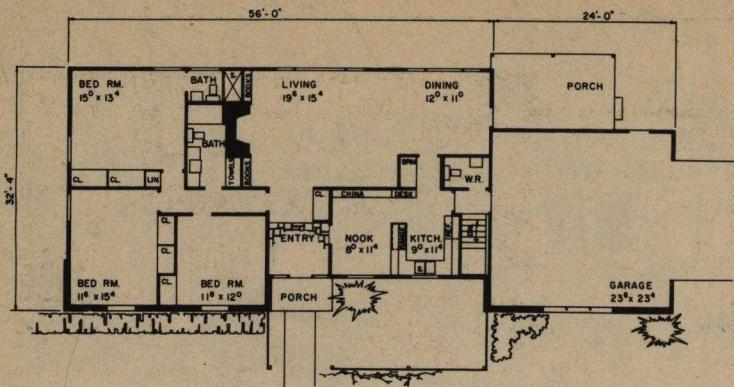

DESIGN G 781

1,358 sq. ft., 13,349 cu. ft.

The low, sweeping lines of the exterior make this compact house look bigger than it really is. The wide overhang shades the glass wall of the living room in summer and allows the low winter sun to brighten the room in cold weather. Plumbing for the two baths, the kitchen and laundry have been concentrated to economize on plumbing installation. The kitchen has plenty of counter and cupboard space and allows for the convenient location of the washer and dryer. The family room will function admirably when dining formally or informally. Not the carport bulk storage room.

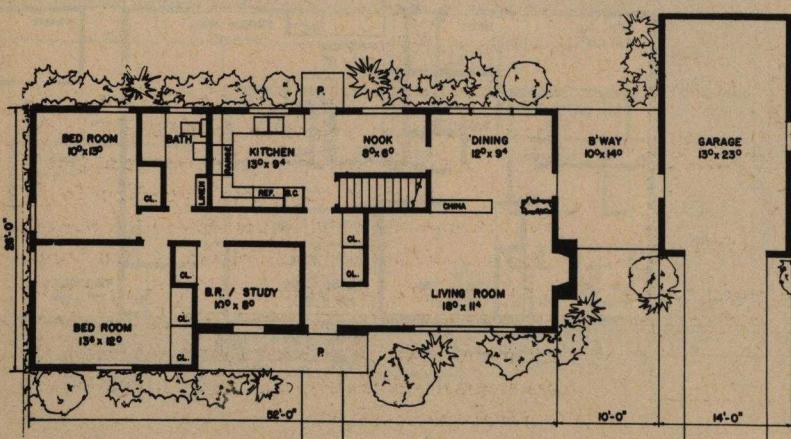

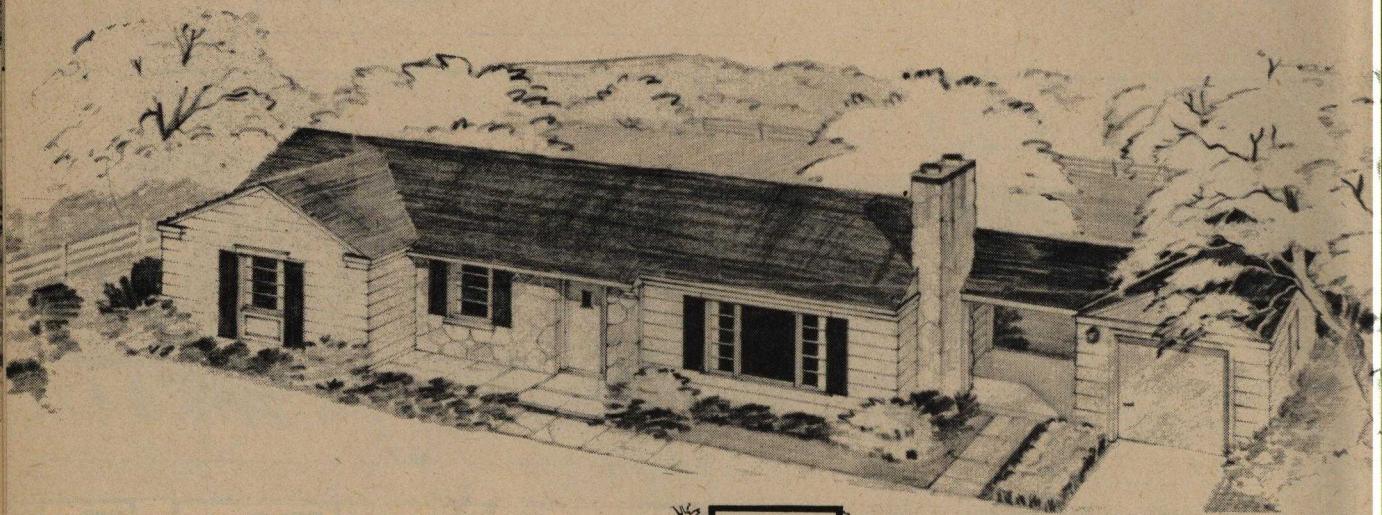

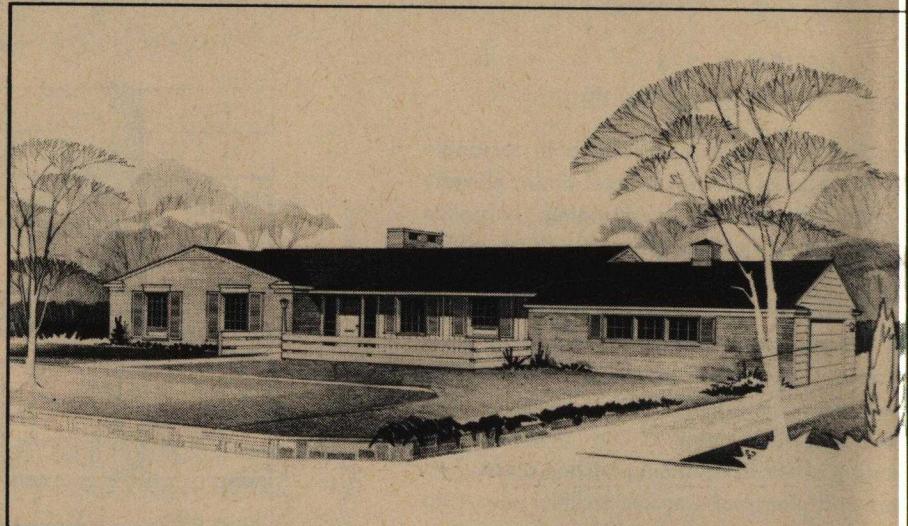

DESIGN G 658

1,688 sq. ft., 33,649 cu. ft.

This traditional ranch home has a most interesting exterior. The projecting bedroom wing and garage the interesting window treatment, the shutters, delightful fence and lamppost all contribute to charm. The floor plan is outstanding because it incorporates the features so often sought by today's active families. There are 2½ baths, formal and informal dining areas, plenty of closets, many built-ins, a full basement, a covered porch, and an attached two car garage.

DESIGN G 262

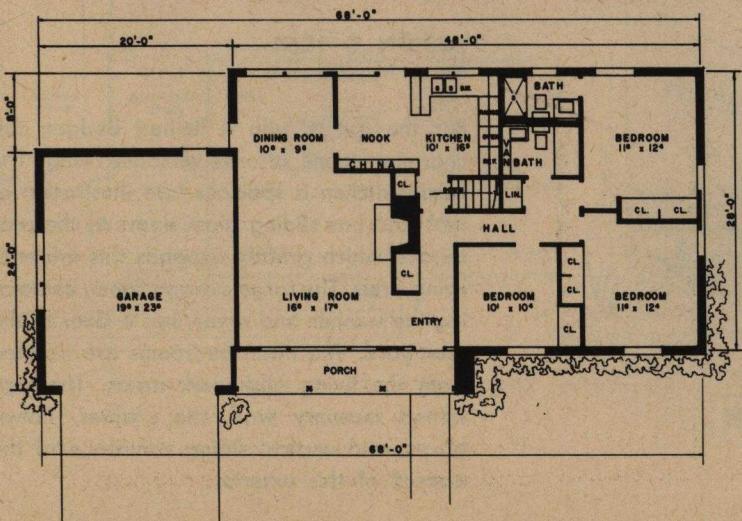

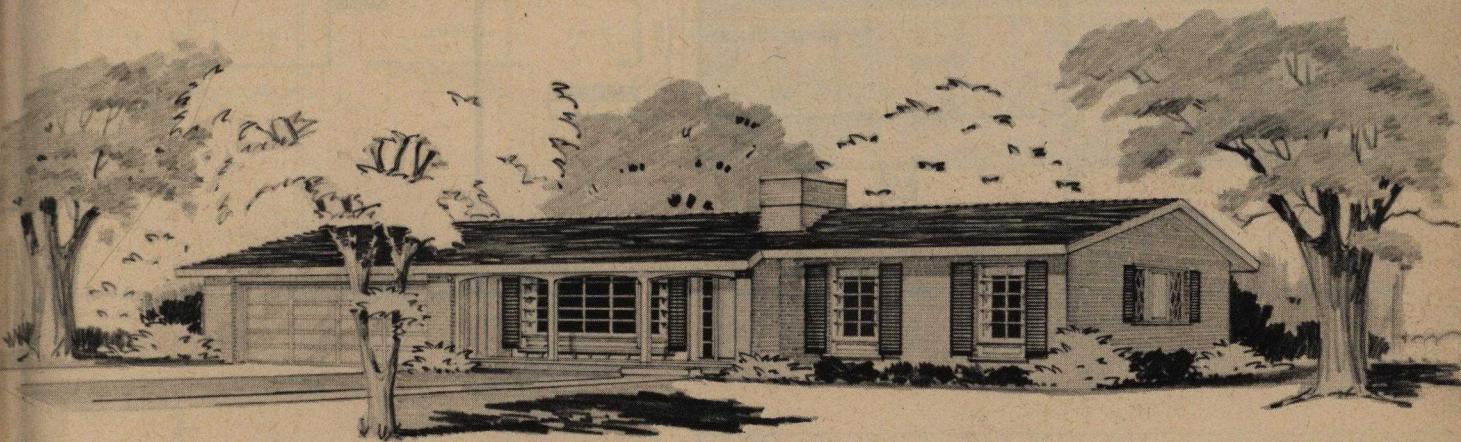

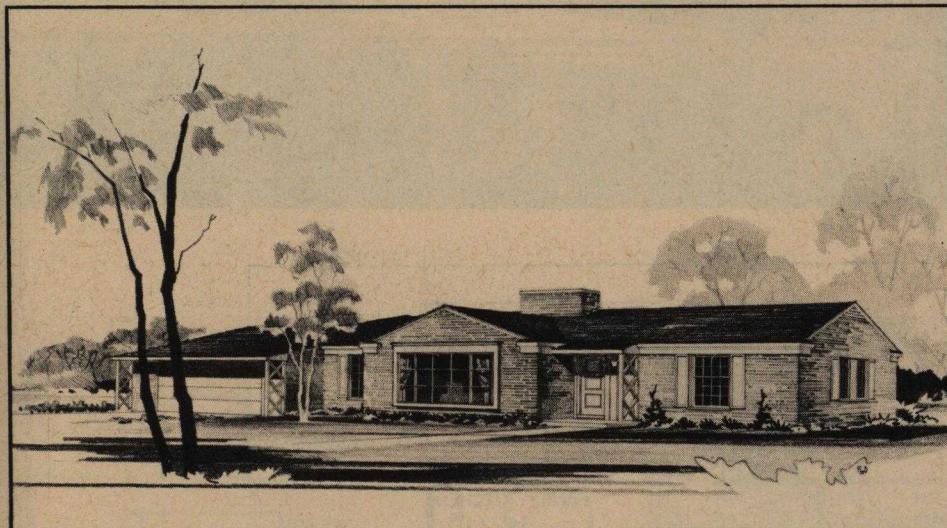

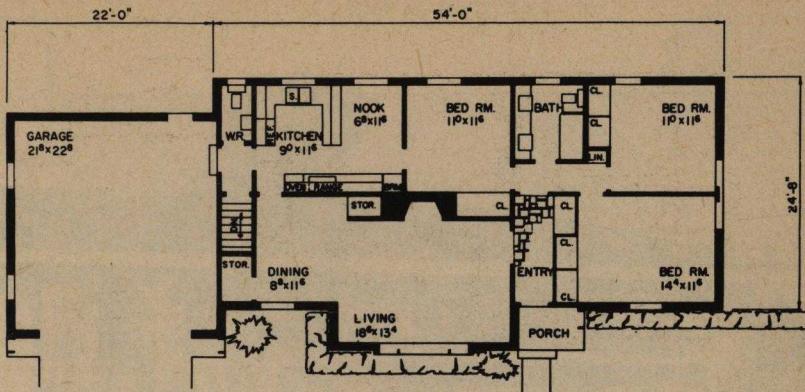

1,207 sq. ft., 20,502 cu. ft.

An efficient U-shaped kitchen, a roomy breakfast nook, a fireplace, a living room separated from a spacious dining area by a china and indoor planter box, and excellent traffic circulation make this interior one in which you will want to live. This exceptional livability in only 1,207 sq. ft. A breezeway could be enclosed to provide a family room, an extra washroom, and a first floor laundry area. The split fieldstone, the picture window and the breezeway enhance its exterior beauty.

DESIGN G 710

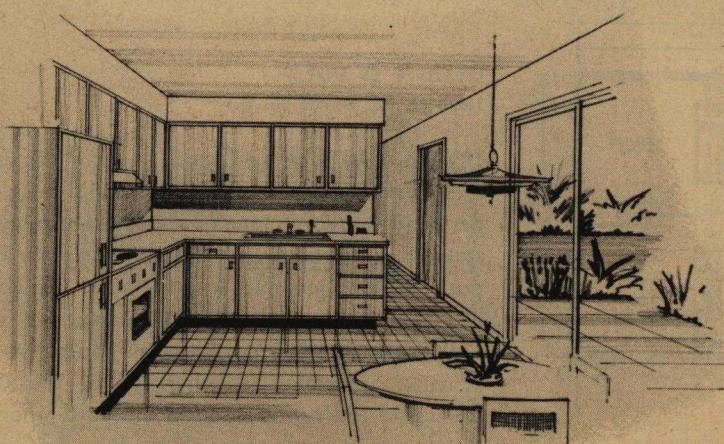

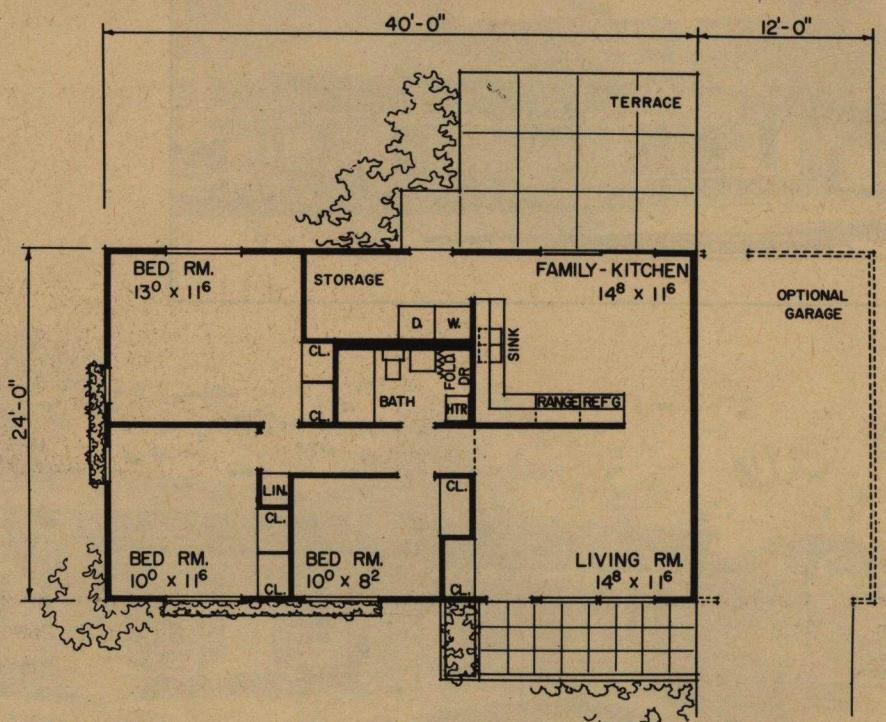

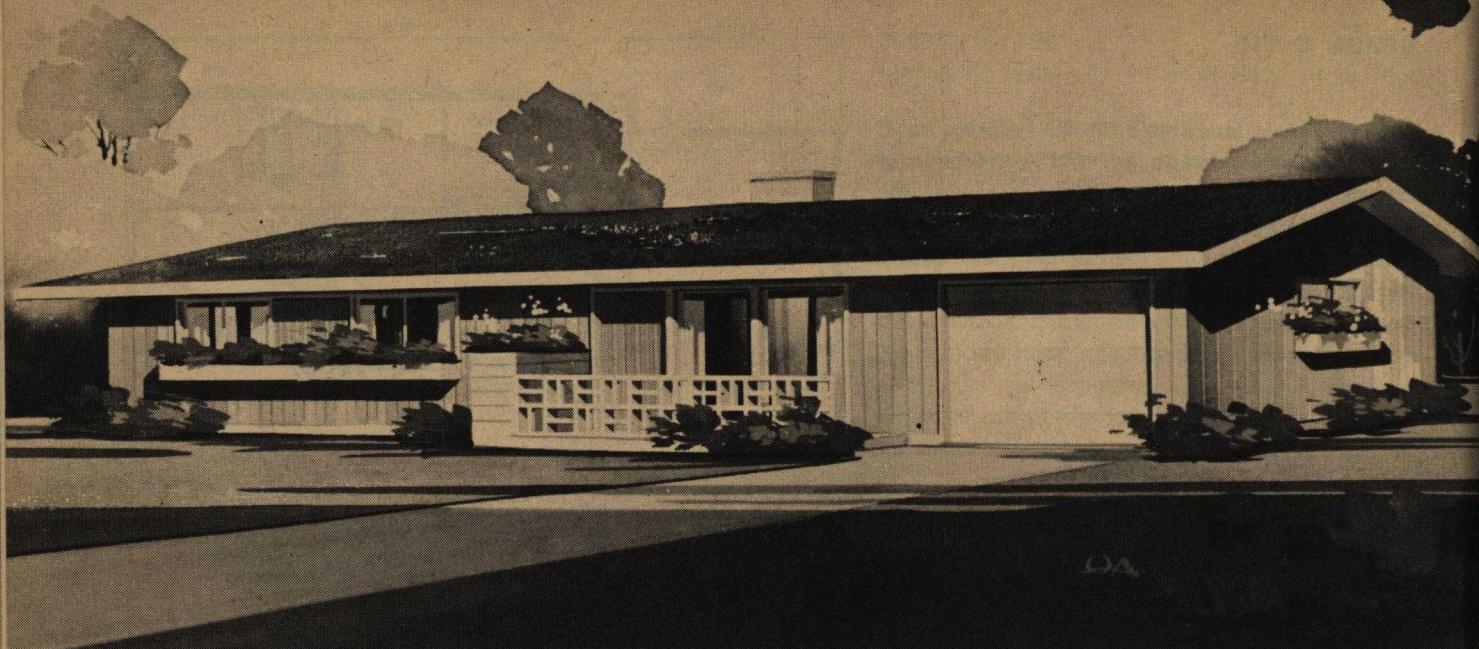

1,411 sq. ft., 26,231 cu. ft.

The twin lavatories of the bath, the separate nook, the built-in oven and range, and the location of the washroom and basement stairs just inside the service entrance, are all features that help make the interior of this home outstanding. The walk-in storage closet of the dining area is just another example illustrating how Richard B. Pollman puts every available bit of space to good use.

**DESIGN G 901**

1,386 sq. ft., 24,756 cu. ft.

This 28 x 48 foot traditional design, plus its attached garage, is economical to build. Within the perimeter of this rectangle, rooms are arranged to result in a practical and efficient floor plan. Traffic patterns flow smoothly. In addition to the obvious economy of back-to-back plumbing, the inside bath frees valuable outside wall space for more practical utilization in other rooms. The dining room and nook area open to the yard where the development of terraces will result in fine indoor-outdoor relationships.

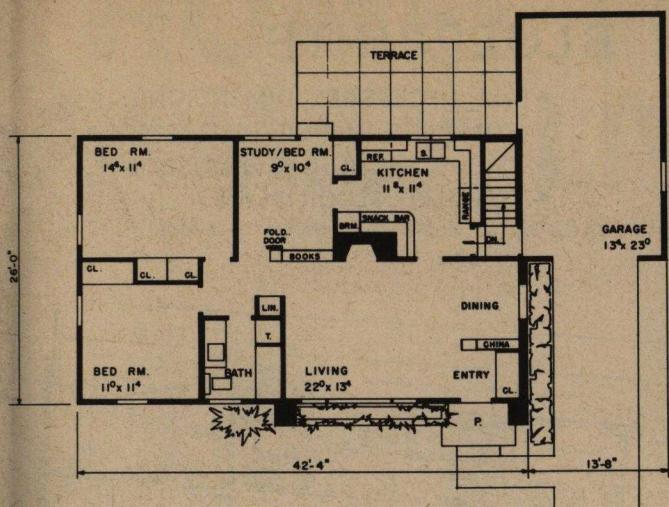

DESIGN G 1064

960 sq. ft., 9,754 cu. ft.

For the family with a limited budget, this charming home affords versatile living. The family-kitchen is spacious (see illustration at left) and has sliding glass doors to the rear terrace which greatly expands this informal living area. The large storage room, containing the washer and dryer, has a door to the rear yard. The three bedrooms are isolated from the living and work areas. The patterned masonry wall, the planter, flower boxes, and vertical siding contribute to the appeal of this exterior.

DESIGN G 485

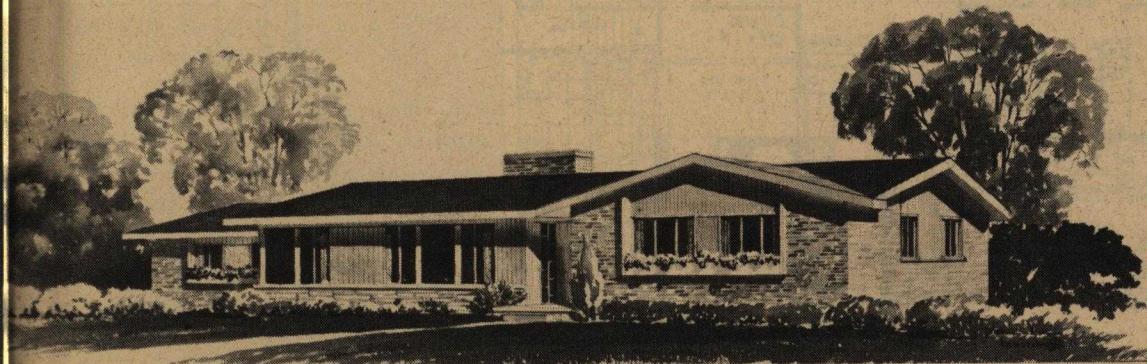

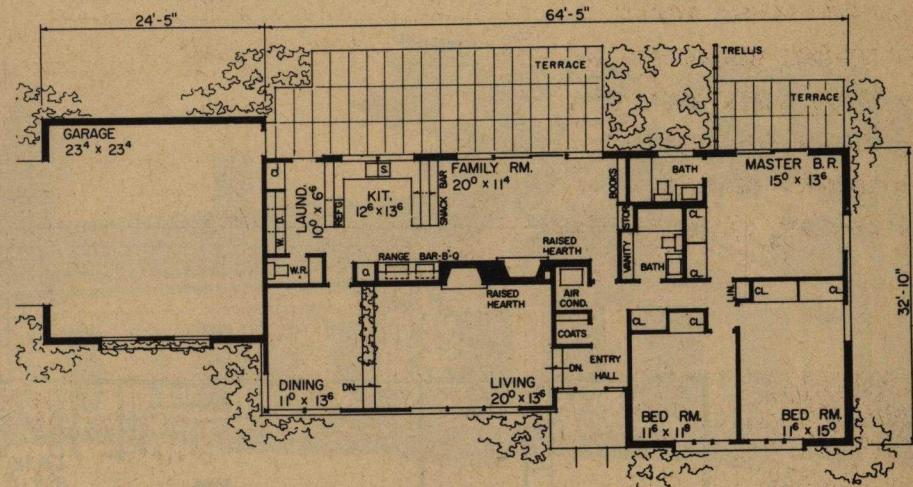

2,082 sq. ft., 38,053 cu. ft.

A case study in floor planning. Here are two designs whose exteriors are almost identical except that they are in reverse of each other. Although Design G 598, below, has no basement, these two designs function in similar fashion. Both designs have flexible traffic patterns; large formal and informal living areas; separate dining rooms; two appealing fireplaces; two baths, plus extra washroom; interior built-in planter, and lots of storage. Interesting differences in these designs include the sunken living room, the first floor laundry, and the indoor barbecue unit of G 598; the projecting activities room, the built-in china unit room divider, and the breakfast nook of G 485. Characterizing the pleasing exteriors are the attractive flower boxes; the interesting use of brick, stone and vertical siding, and the wide overhanging roof.

**DESIGN G 598**

1,940 sq. ft., 20,424 cu. ft.

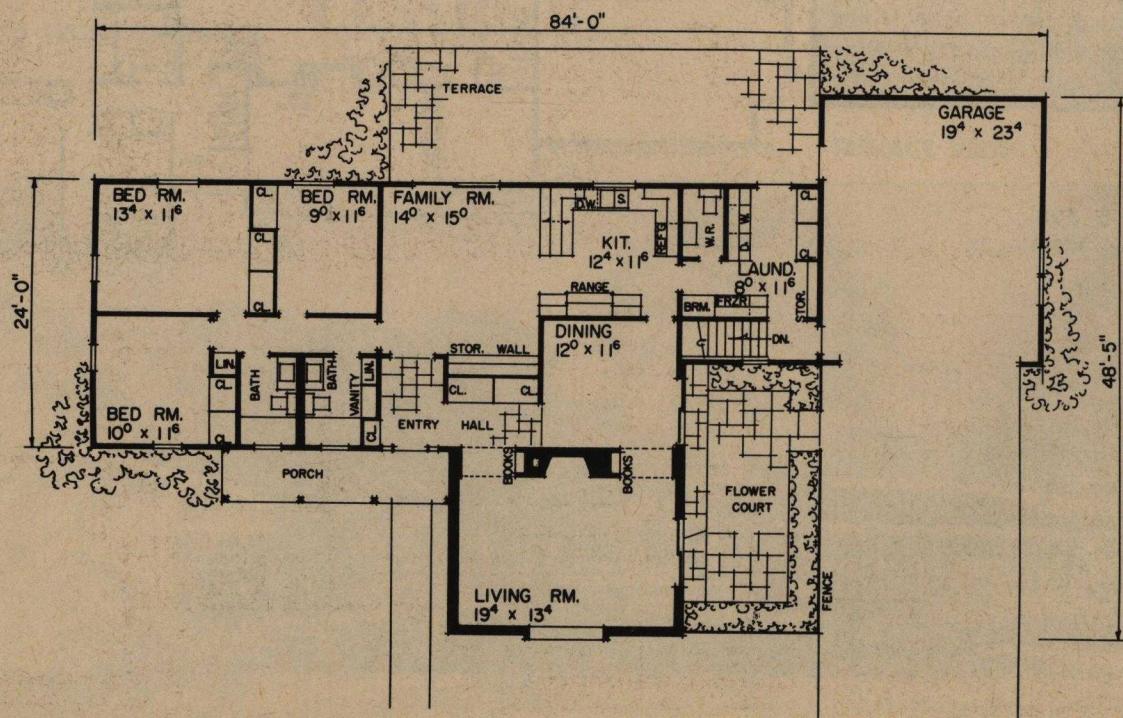

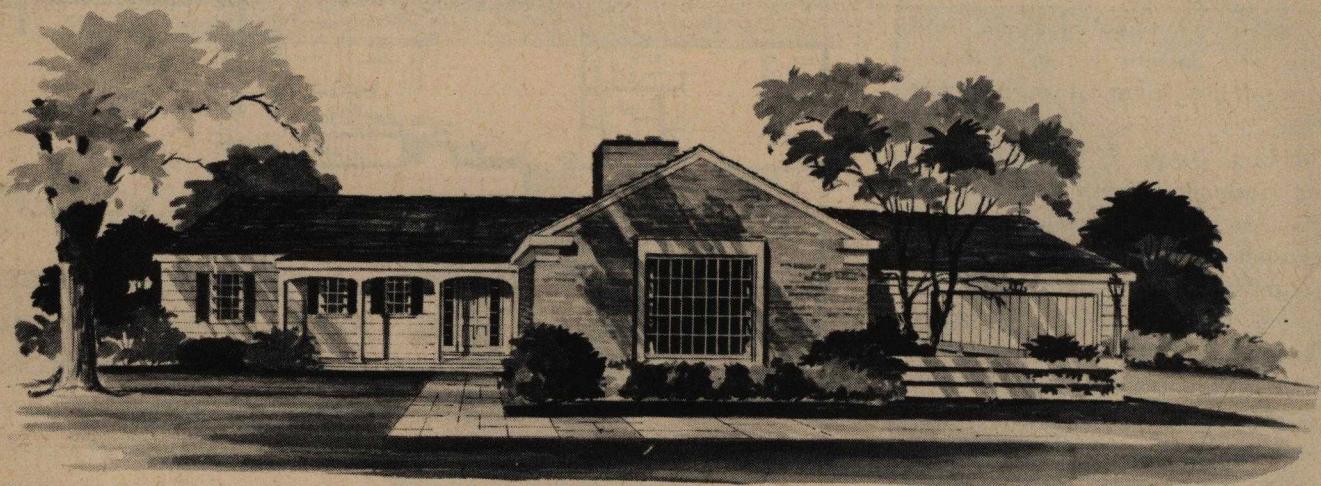

DESIGN G 1176

1,784 sq. ft.

28,135 cu. ft.

An impressive home to passersby and a wonderful floor plan for its occupants. The brick veneer mass of the projecting living room is effectively balanced by the front entrance wing with its covered porch and the two car garage wing with its flower court. Traffic flows freely from the front entry hall. The quiet, formal living room enjoys its full measure of privacy. Sliding glass doors open onto the flower court from both the living and dining rooms. The housewife's work center is complete and most efficient. There's the extra washroom, laundry area, freezer space, and an abundance of storage facilities. The family room functions ideally with the kitchen and the rear terrace.

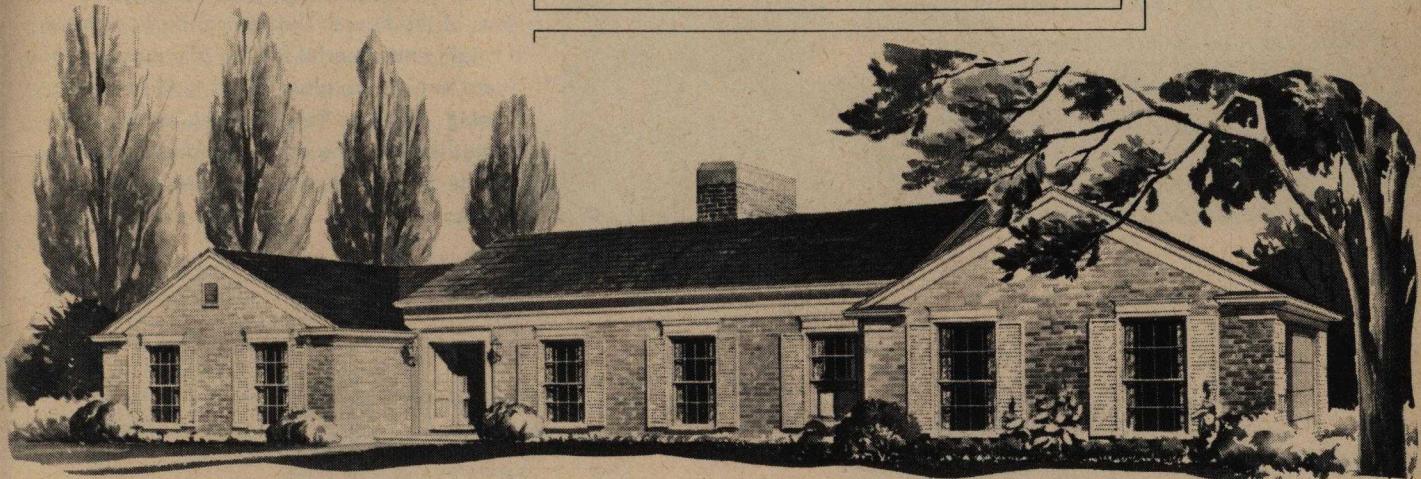

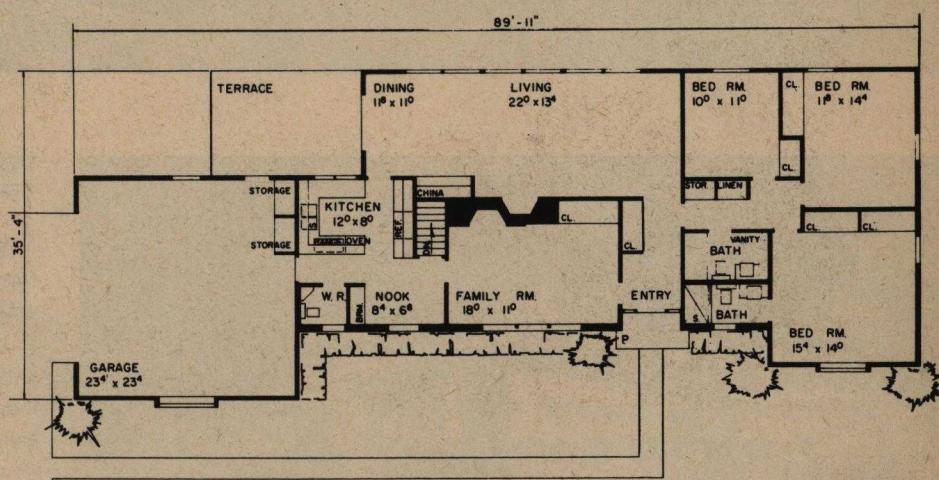

DESIGN G 755

1,832 sq. ft., 36,130 cu. ft.

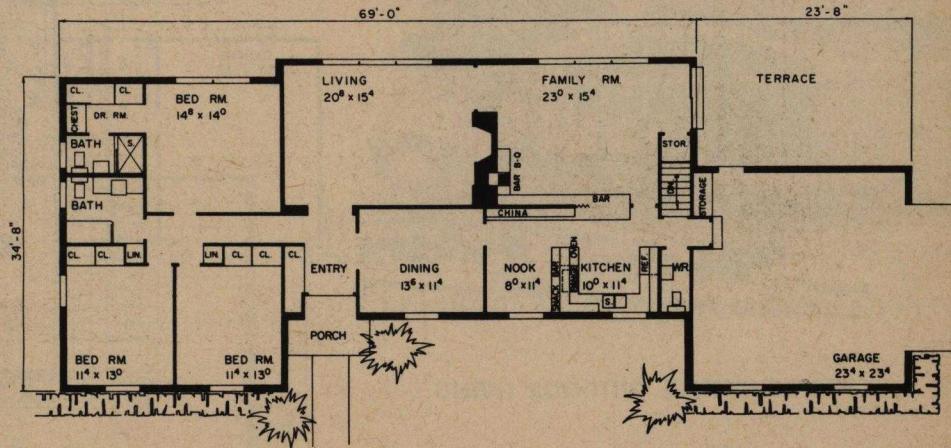

The living habits of your family will be more than adequately taken care of by this three bedroom, two-and-a-half bath home with its truly gracious exterior. Note the family room, the two eating areas, and the huge living area. Built-in units are provided for linens, china, brooms, and staples. The garage also features storage units.

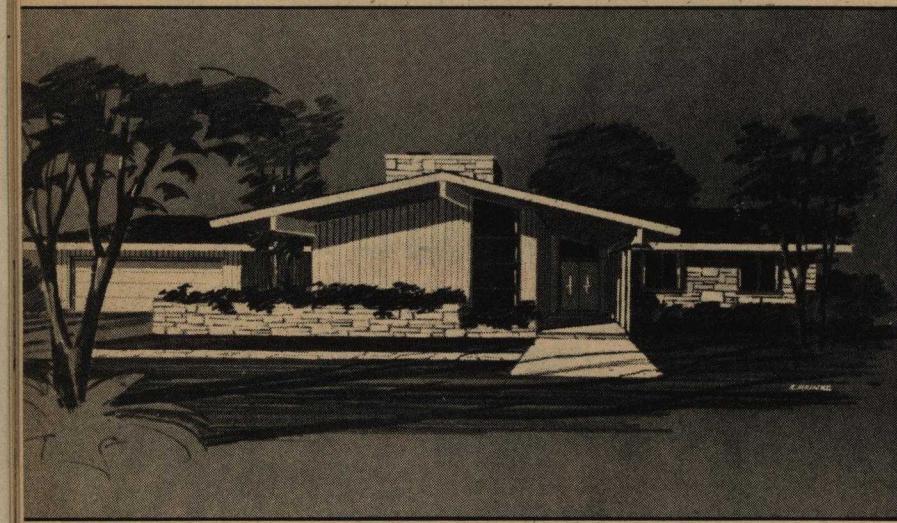

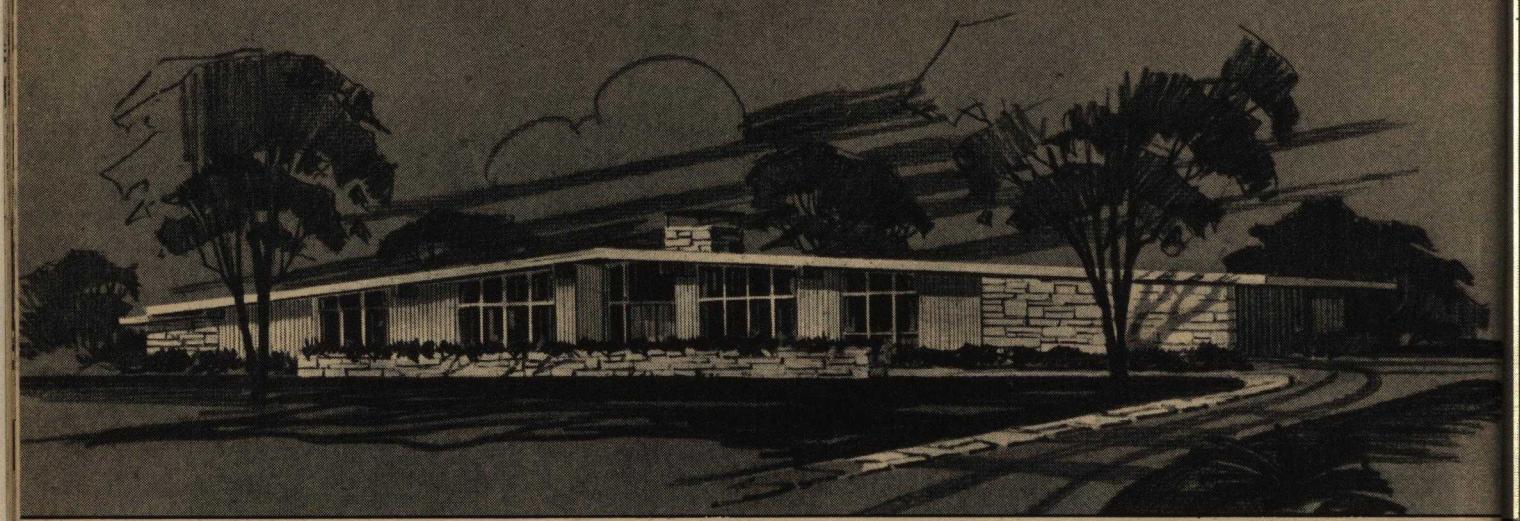

DESIGN G 691

2,113 sq. ft., 42,260 cu. ft.

Here is a home for a family that loves to entertain. It has generous areas for formal and informal parties, and four eating spots—a snack bar, nook, formal dining room and the terrace. The family room can be available to parents, as well as children for those committee meetings and bridge parties, or those neighborhood birthday parties and rainy day game sessions.

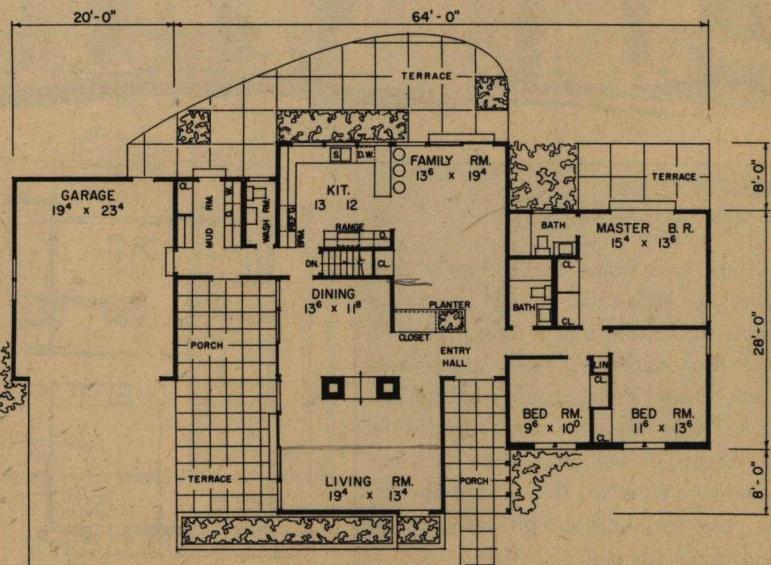

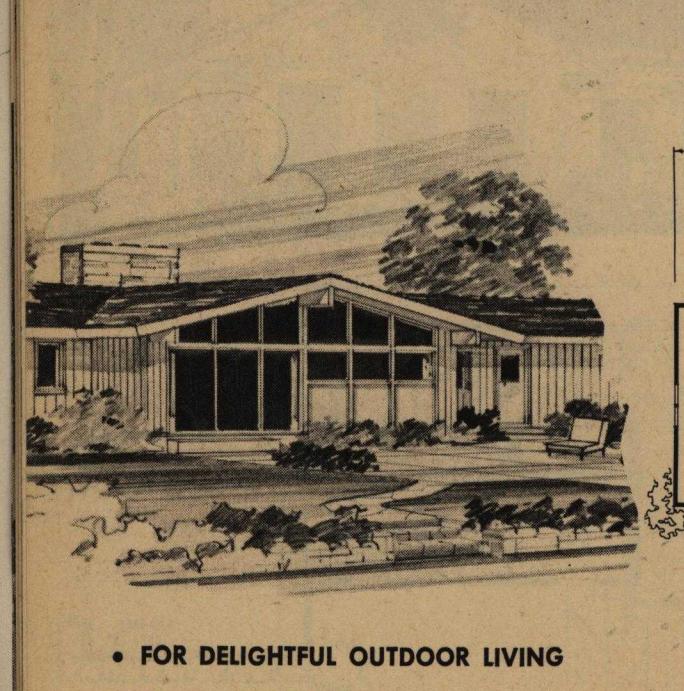

DESIGN G 978

1,920 sq. ft., 29,515 cu. ft.

You will approach the double doors of the front entrance of this impressive home by walking beneath the delightfully sloping 2/12 pitched roof. This covered entrance with its vertical wood post trellis is dramatic, indeed. The entrance hall routes traffic efficiently to the cleverly planned major portions of the house. The central portions have a bright and cheerful feeling of spaciousness. There are large glass areas and attractive sloping ceilings. The sleeping area, highlighted by the fine master bedroom with its private bath and outdoor terrace, has flat ceilings.

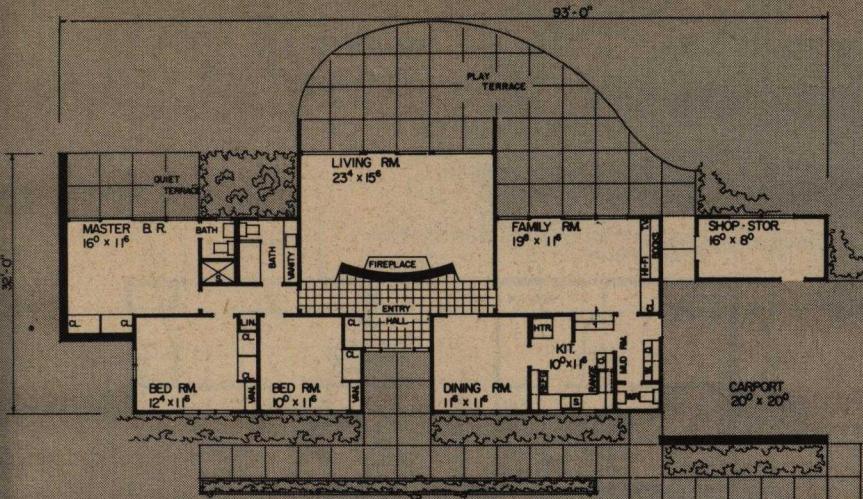

• FOR DELIGHTFUL OUTDOOR LIVING

DESIGN G 992

1,802 sq. ft., 19,382 cu. ft.

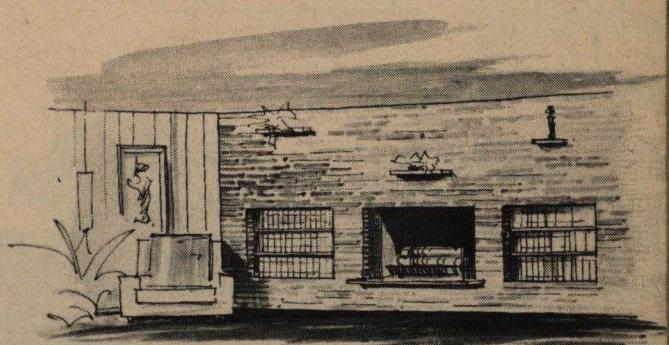

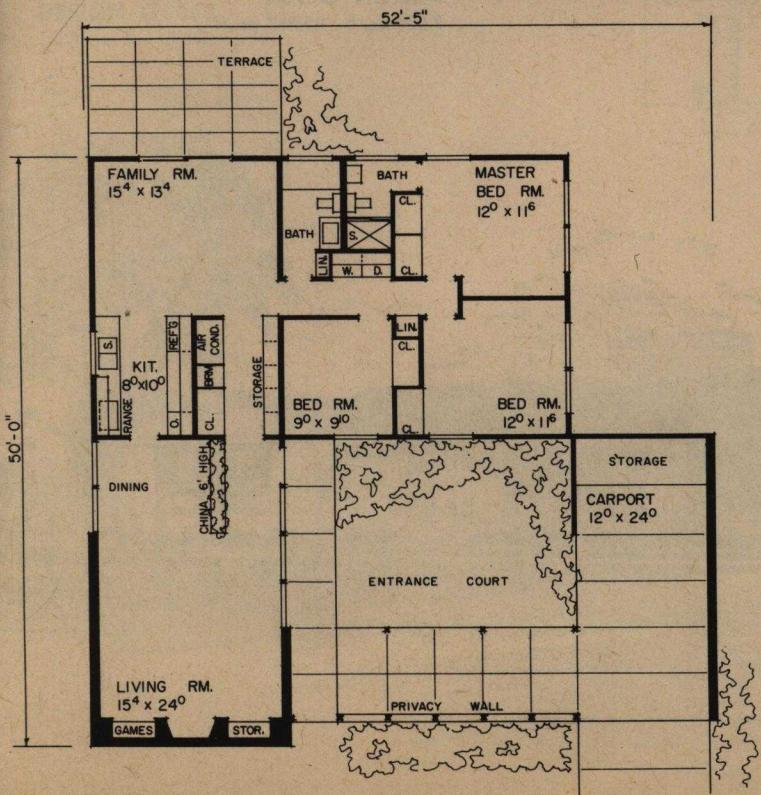

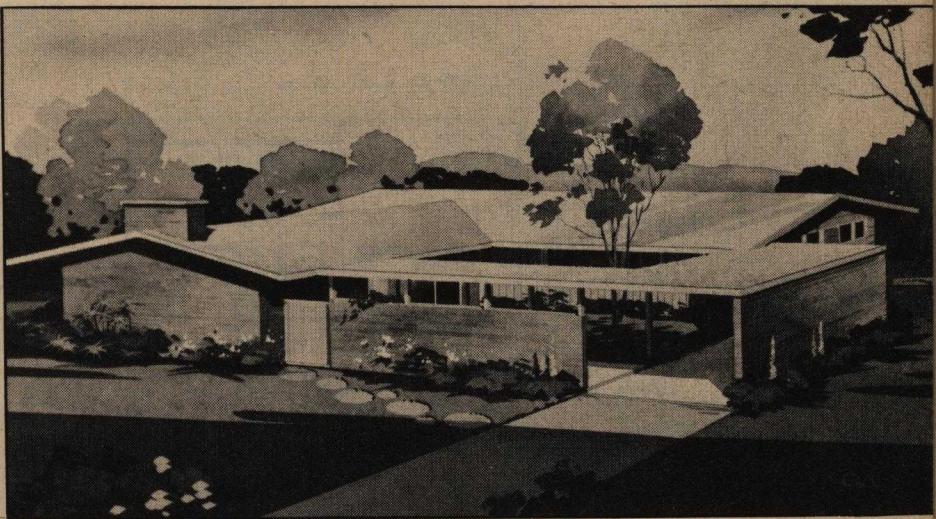

As you pass through the double doors of the front entrance of this breathtaking design you will be charmed by the spacious hall and the attractive curved masonry wall of the unique fireplace. Excellently zoned, the sleeping area comprises a distinct wing as does the informal living area. Although situated between these two areas, the formal living room will enjoy plenty of privacy. The sleeping area has fine bath facilities, abundant storage, and its own quiet terrace. The kitchen wing features wonderful dining facilities and the utmost in efficiency. Note the shop-storage room.

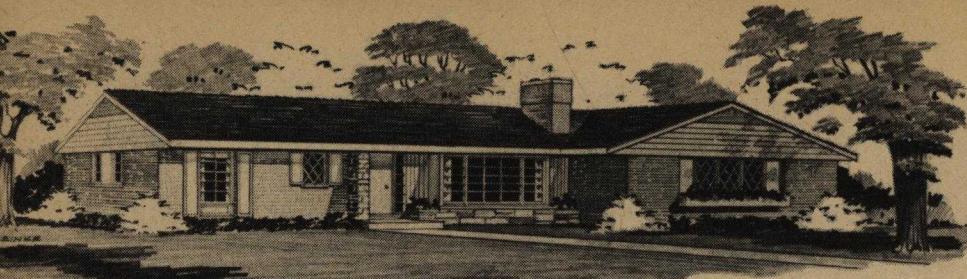

DESIGN G 1073

1,386 sq. ft., 13,959 cu. ft.

Here is an excellent courtyard house designed for the small suburban lot. It is shielded in the front by the windowless living-room wall and brick privacy wall. Both sides of house have minimum window openings, and the carport wall protects the entrance court. Terrace of family room and entrance provide delightful outdoor living areas. Living room enjoys view of court. Compact corridor kitchen is step-saving and easily serves both the indoor and outdoor dining areas. Do not overlook the two full baths, the interior storage walls and the dramatic living room fireplace wall.

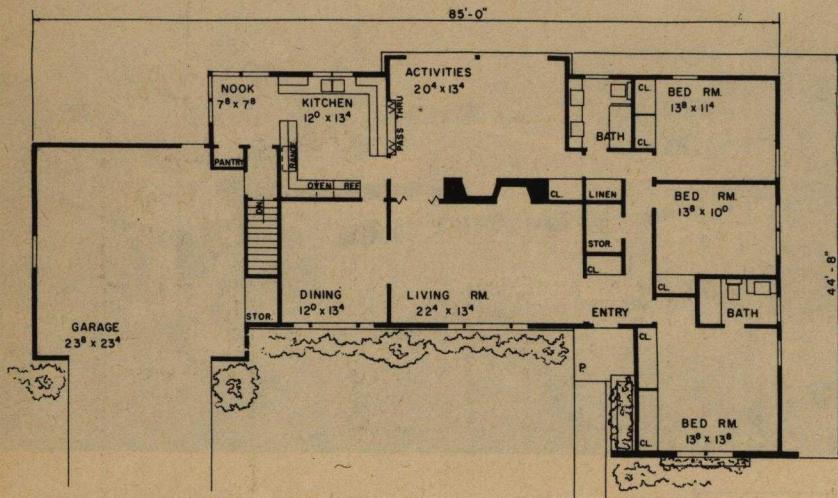

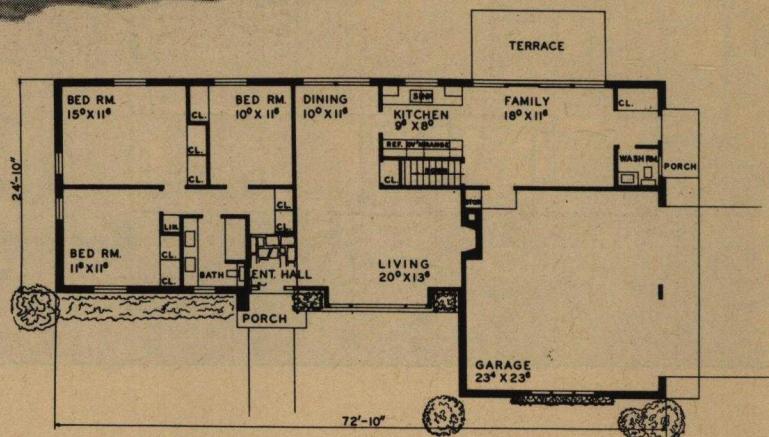

• DELIGHTFUL BACKDROP FOR CONVERSATION

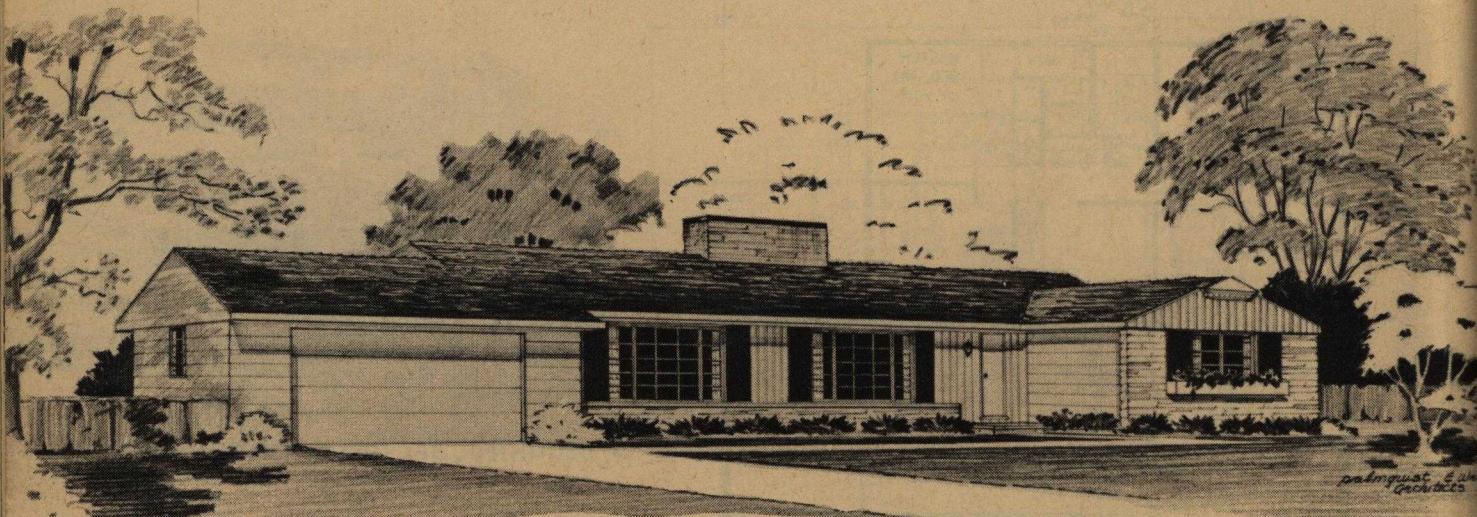

DESIGN G 829
1,524 sq. ft., 26,797 cu. ft.

- SPACIOUS LIVING AREA
- BIG FAMILY ROOM
- EXTRA WASHROOM
- FULL BASEMENT
- TWO CAR GARAGE

Again, the formal dining room and the multi-purpose area. The members of the family living in this home will enjoy the advantage of plenty of space. Both of the large living areas are highlighted by a fireplace. The bedrooms are large; the bath facilities good, and storage is abundant.

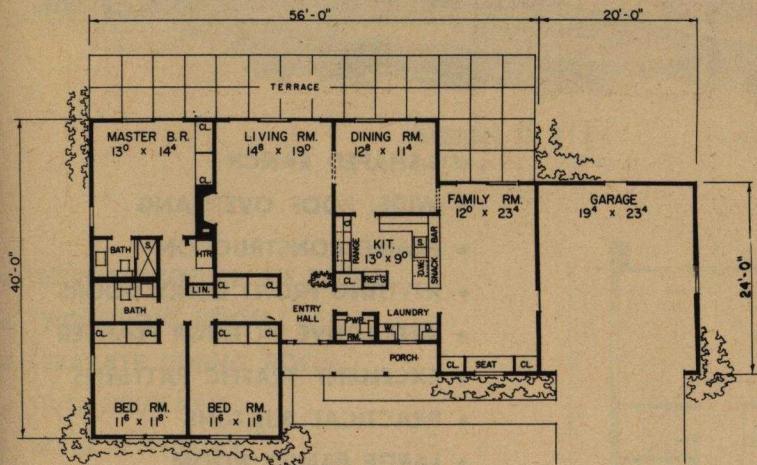

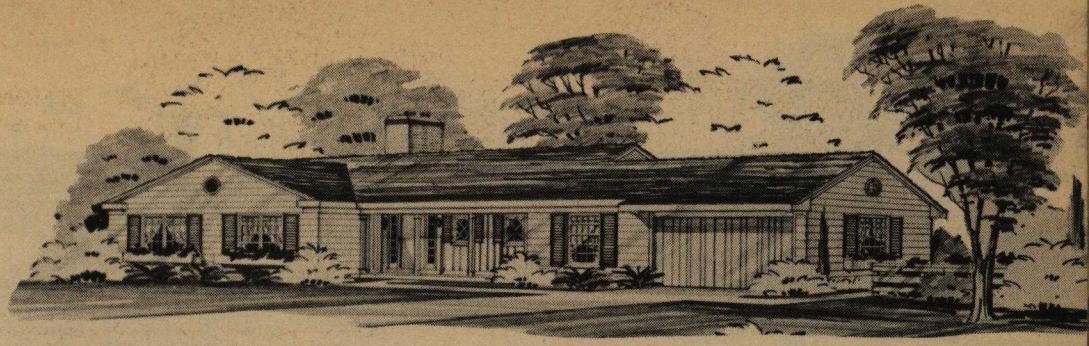

DESIGN G 751
2,034 sq. ft., 35,987 cu. ft.

*Padinguast & Sons
Architects*

DESIGN G 882

1,882 sq. ft., 21,264 cu. ft.

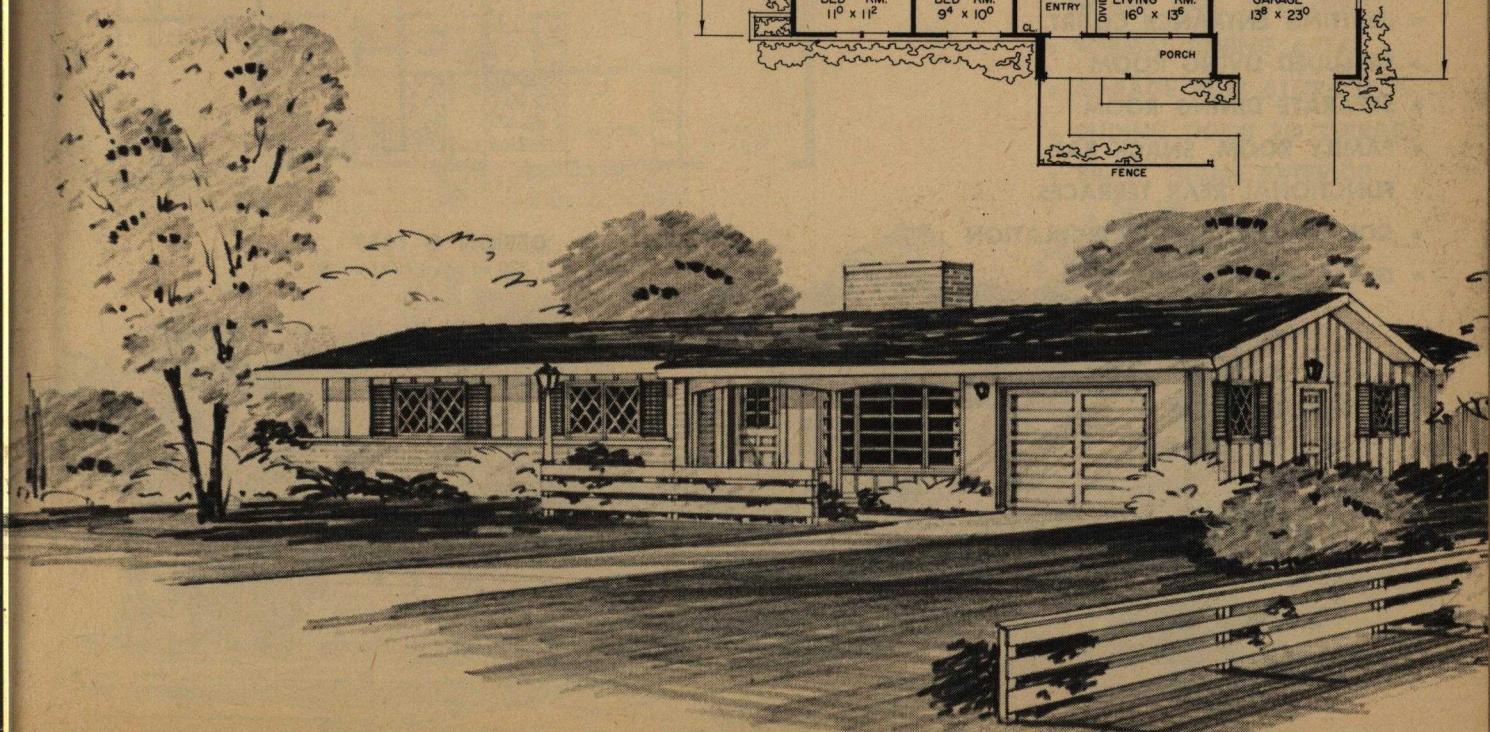

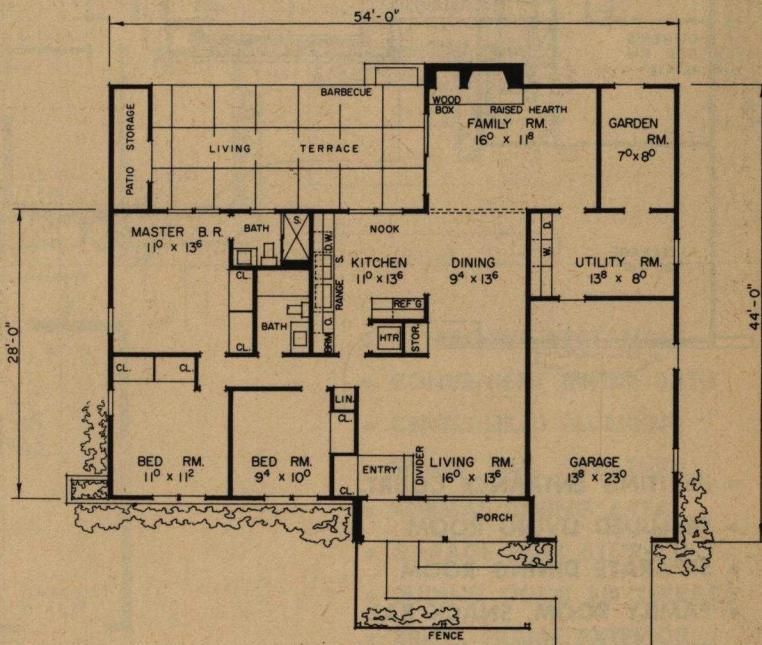

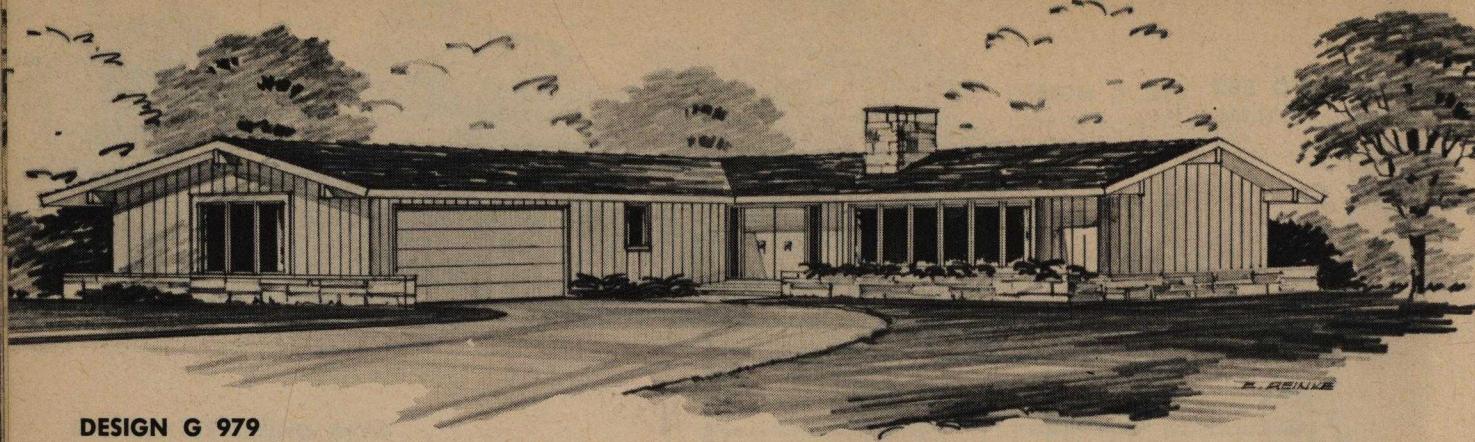

- EXCELLENT TRAFFIC PATTERNS
- CENTRALLY LOCATED KITCHEN
- FORMAL DINING ROOM
- CHEERFUL FAMILY ROOM
- TWO BATHS, EXTRA WASHROOM

This home will cater ideally to the activities of the young family. There is an interesting grouping of three rooms—the family, garden, and utility—for indoor family recreation, hobbies, and relaxation. The large living terrace functions wonderfully with the family room. Observe the patio storage and barbecue.

DESIGN G 963

1,200 sq. ft., 13,392 cu. ft.

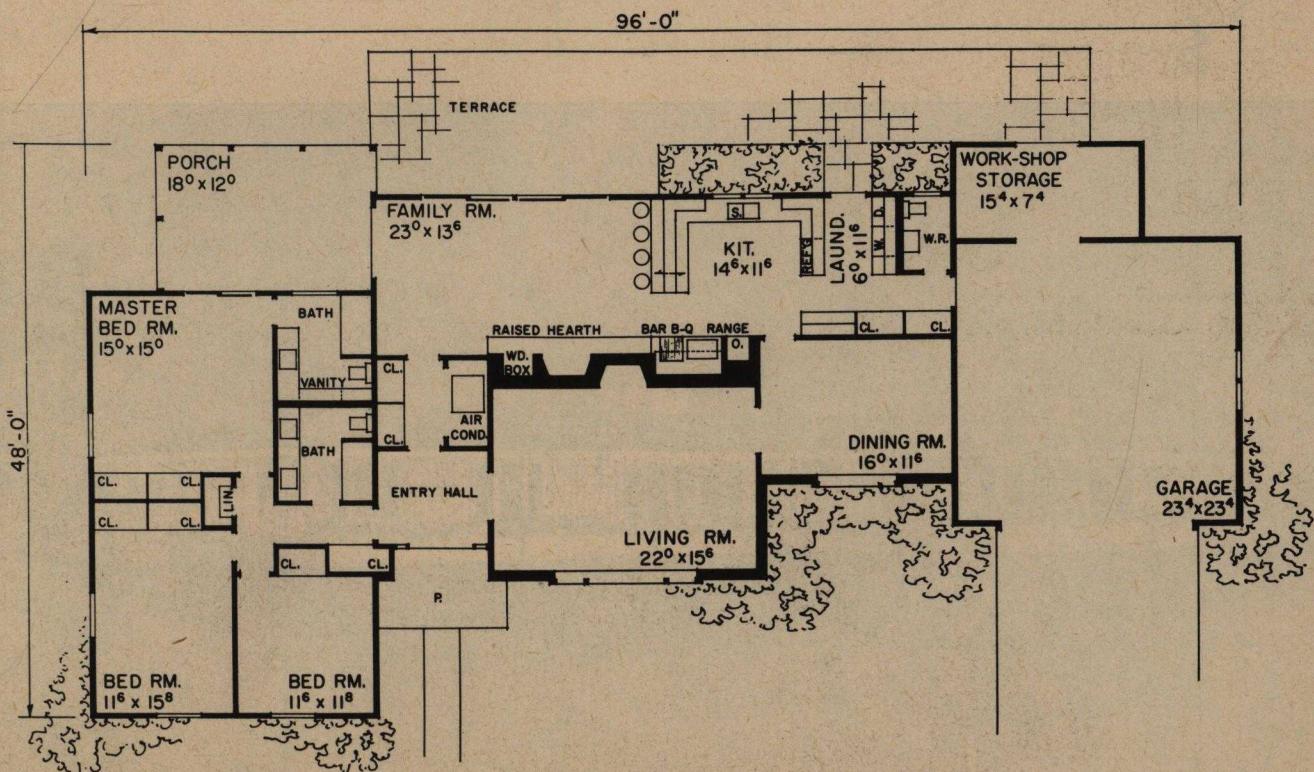

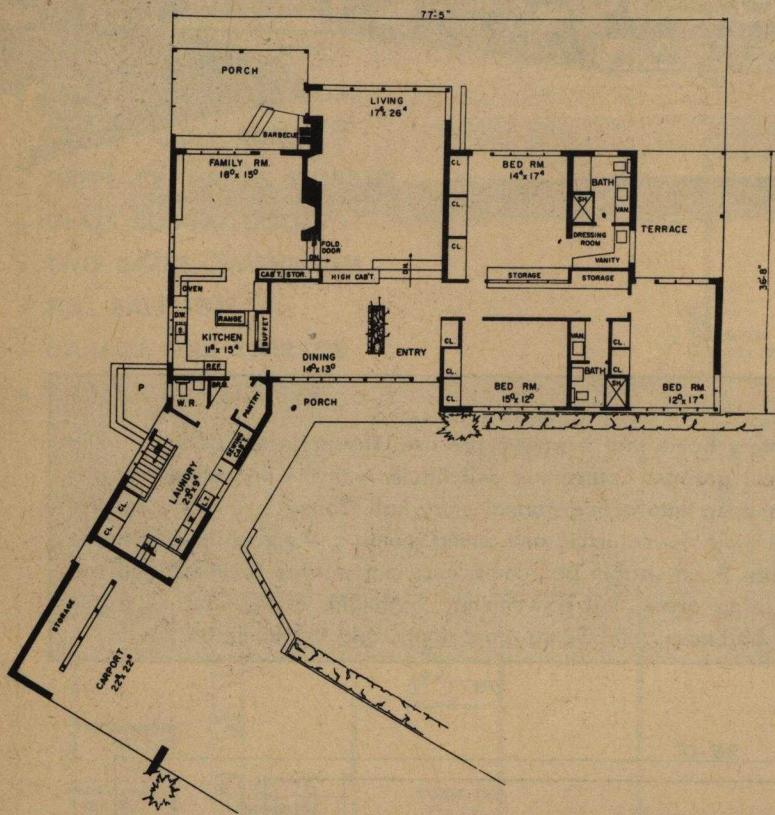

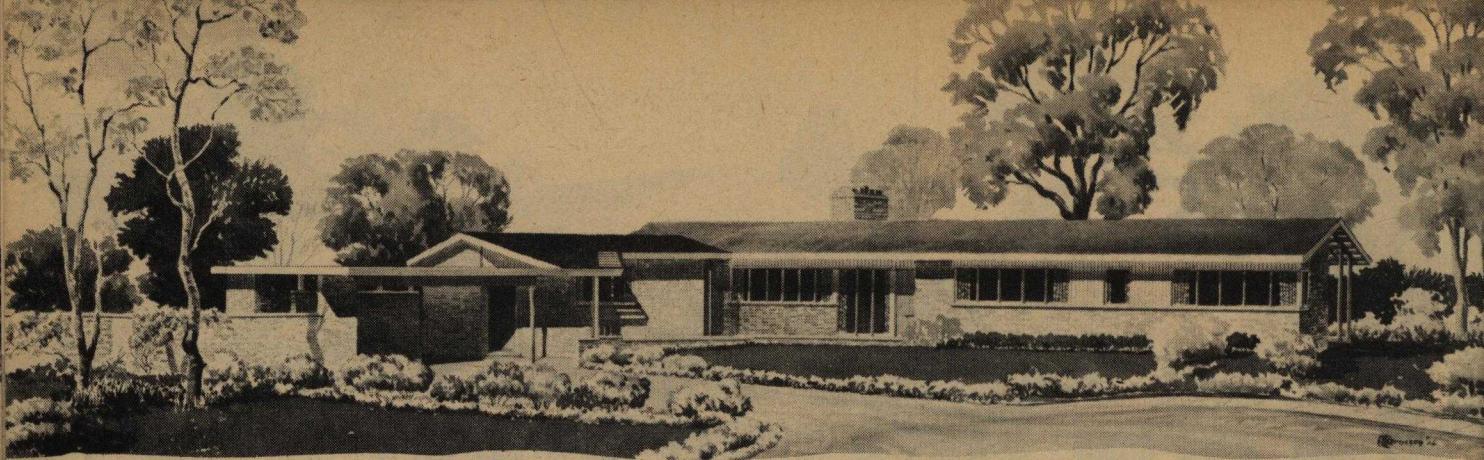

DESIGN G 1174

• 2,292 sq. ft.

• 29,330 cu. ft.

Whatever the setting, here is a traditional, one story home that is truly impressive. The projected bedroom wing is effectively counter-balanced by the recessed two car garage. Contrasting delightfully with the horizontal siding is the colorful quarried stone. The double front doors open into a fine, formal entry hall. Zoned in a most practical manner, the floor plan features an isolated bedroom wing, formal living and dining rooms, and across the rear of the house the informal living areas. The sleeping area has three sizable bedrooms, excellent storage facilities, and two full baths. Traffic patterns can by-pass the formal living areas most conveniently. Highlights of the informal family living area are the raised hearth fireplace, built-in barbecue unit, sliding glass doors, and the snack bar.

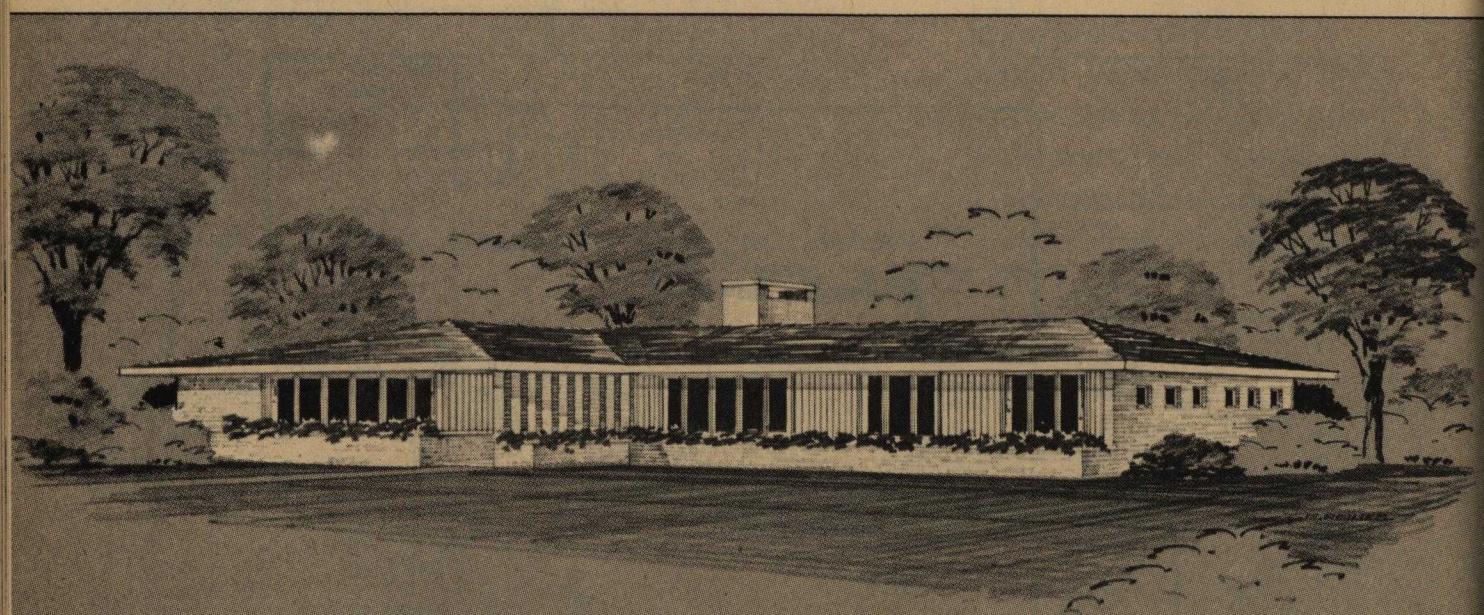

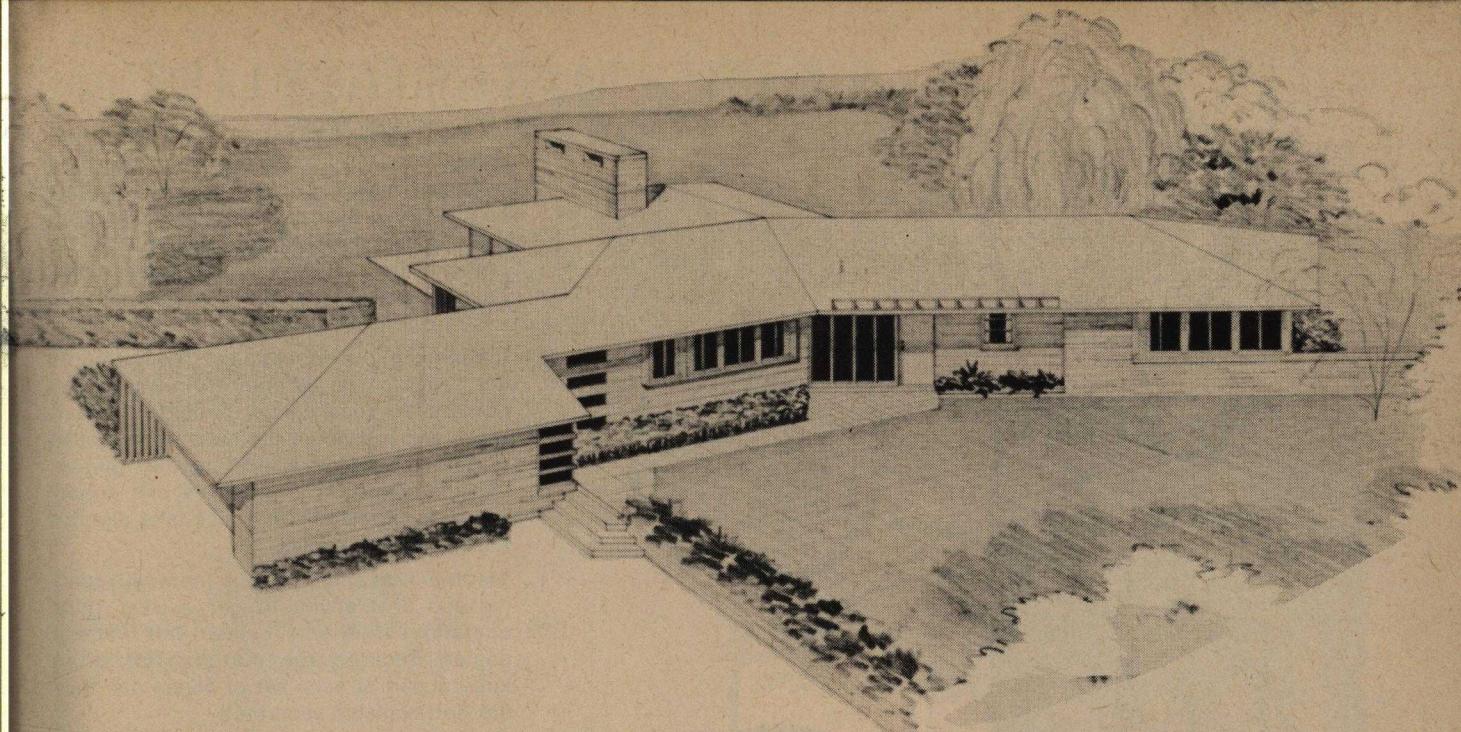

DESIGN G 487

3,072 sq. ft., 48,361 cu. ft.

For truly gracious living it would be difficult to find a design to cater to the activities of the family better than this modern ranch home. Bath facilities are exceptional; storage units are plentiful; traffic circulation is good. Note how the sunken living room is free from annoying cross-room traffic. The family room functions with the kitchen. This allows mother to keep a watchful eye on the children. The covered porch with its barbecue is in good relation to the family room, yet far enough from the sleeping area so its activities will not disturb those who wish solitude.

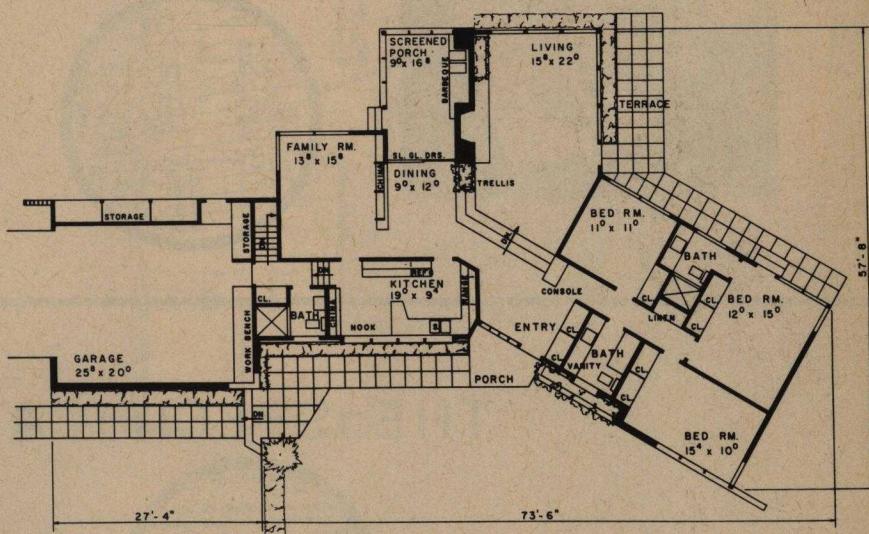

DESIGN G 77

2,080 sq. ft., 28,142 cu. ft.

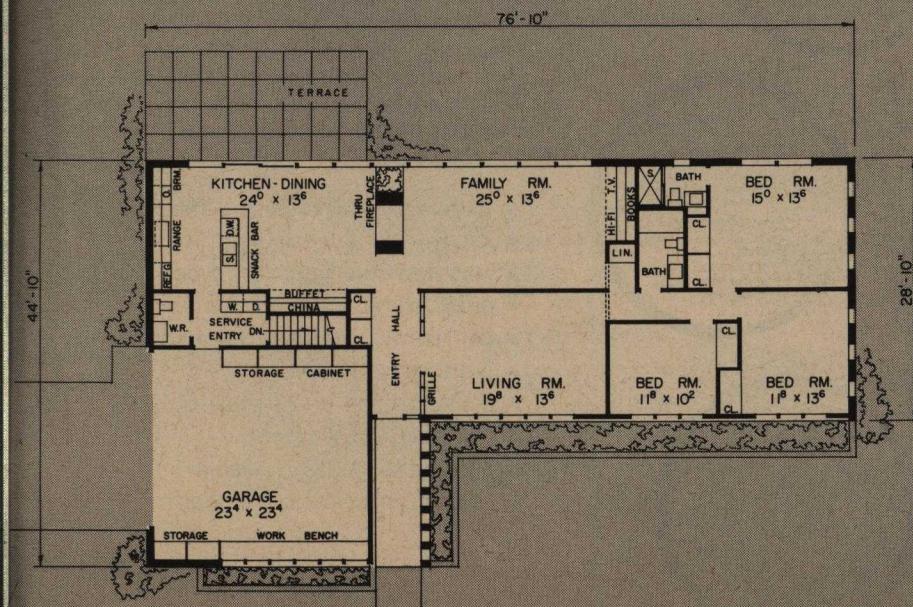

Here is truly gracious living. Family recreation facilities are prominent both indoors and out. In addition to the family room, there is the screened porch. There is the nook as well as the larger dining area. The living room is free of cross-room traffic, and has two walls of windows. In addition to the full baths of the bedroom wing, there is a bathroom with a stall shower near the service entrance. This home has a partial basement.

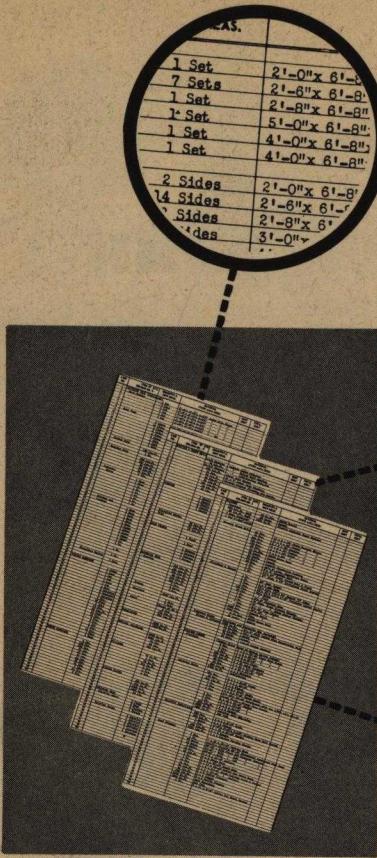

DESIGN G 895

2,120 sq. ft., 38,485 cu. ft.

The unique front entrance to this suburban home is a perfect introduction to what a fine floor plan can offer an active family. Two huge areas—the formal living room and the informal family room—separate the peaceful bedroom wing from the busy kitchen-dining area. The informal living areas look out upon the rear yard and can function with the terrace for enjoyable and secluded outdoor living. A practical two-way fireplace with an adjacent planter separate the dining and family areas. The service entrance from the garage will function to the delight of the housewife as a "mud" area.

THE MATERIAL LIST...

MATERIALS	
1 Set	2'-0" x 6'-8"
7 Sets	21'-6" x 61'-8"
1 Set	21'-0" x 61'-8"
1 Set	51'-0" x 61'-8"
1 Set	4'-0" x 61'-8"
1 Set	4'-0" x 61'-8"
2 Sides	21'-0" x 61'-8"
14 Sides	21'-6" x 61'-8"
2 Sides	21'-8" x 61'-8"

MATERIALS	
1/4 Squares	Asphalt
78 Lin.Ft.	"
31-1/4 Squares	Metal Driv.
258 Lin.Ft.	5" x 7" M.
24 Pcs.	Chimney C.
20 Lin.Ft.	Window H.
46 Lin.Ft.	12" Porch
35 Lin.Ft.	12" Gar.
154 Lin.Ft.	2" x 3"
58 Lin.Ft.	Roof
80 Lbs.	

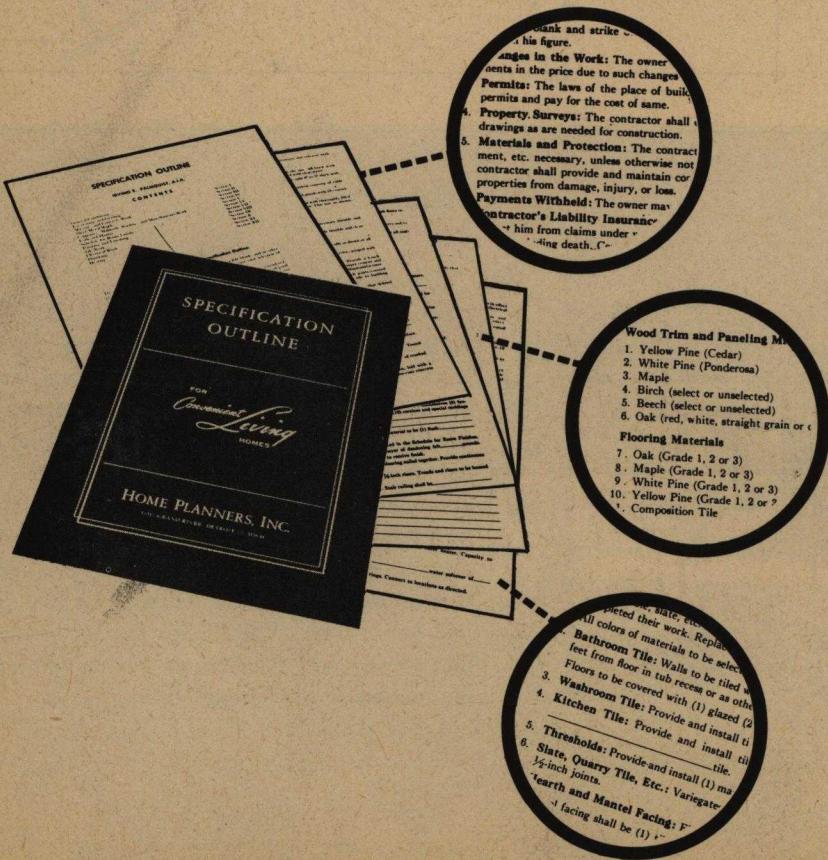

With each set of blueprints you order you will receive a material list. Each list shows you the quantity, type and size of the non-mechanical materials required to build your home. It also tells you where these materials are used. This makes the blueprints easy to understand.

Influencing the mechanical requirements are geographical differences in availability of materials, local codes, methods of installation and individual preferences. Because of these factors, your local heating, plumbing and electrical contractors can supply you with necessary material take-offs for their particular trades.

Material lists simplify your material ordering and enable you to get quicker price quotations from your builder and material dealer. Because the material list is an integral part of each set of blueprints, they are not available separately.

- AMONG THE MATERIALS LISTED:
- MASONRY, VENEER & FIREPLACE
- FRAMING LUMBER
- ROOFING & SHEET METAL
- WINDOWS & DOOR FRAMES
- EXTERIOR TRIM & INSULATION
- TILE WORK, FINISH FLOORS
- INTERIOR TRIM, KITCHEN CABINETS
- ROUGH & FINISH HARDWARE

THE SPECIFICATION OUTLINE...

This fill-in type specification lists 150 phases of home construction from excavating to painting. It consists of twelve pages and will prove invaluable to you for specifying to your builder the exact equipment and methods of construction you want in your next home. Specification Outlines are available at \$1.00 each. When your order consists of four or more sets of blueprints, you will receive a Specification Outline free of charge. Don't be without it.

- AMONG THE CATEGORIES LISTED:
- EXCAVATING AND GRADING
- MASONRY AND CONCRETE WORK
- SHEET METAL WORK
- CARPENTRY, MILLWORK, ROOFING
- LATH AND PLASTER
- SCHEDULE FOR ROOM FINISHES

DESIGN G 1090

2,451 sq. ft., 24,510 cu. ft.

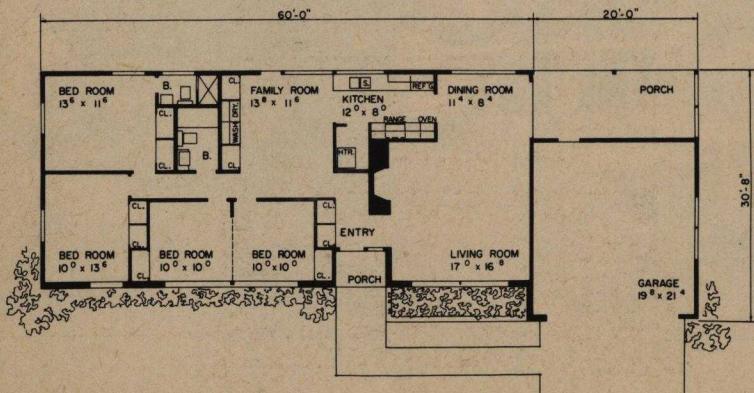

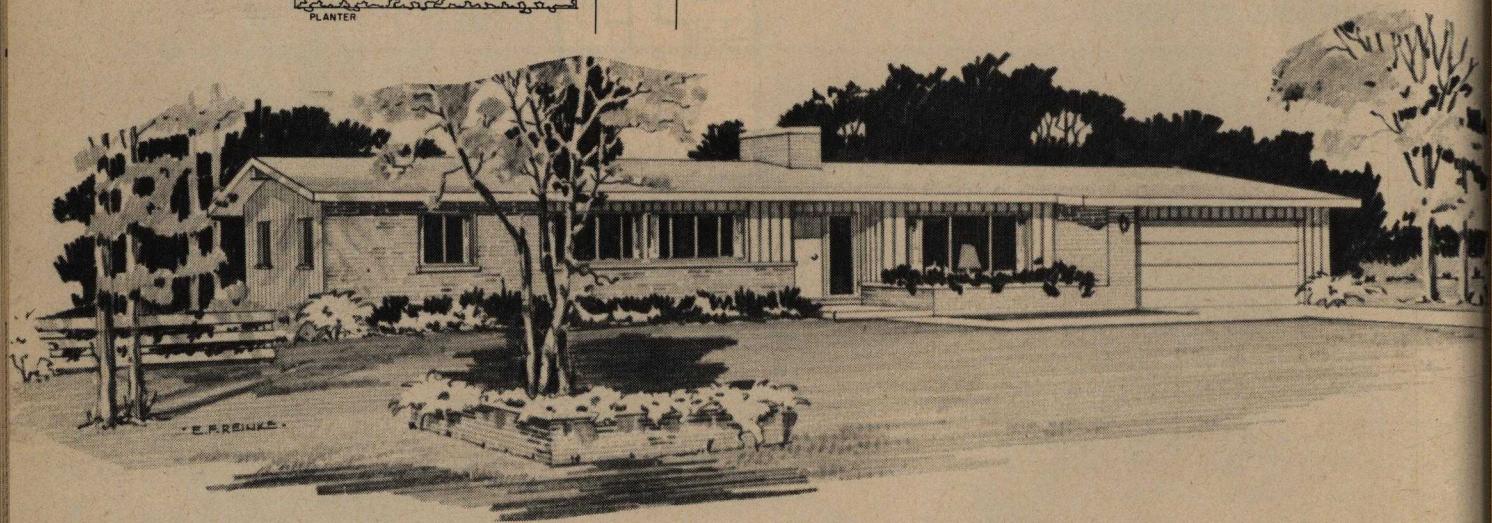

DESIGN G 966

1,552 sq. ft., 16,296 cu. ft.

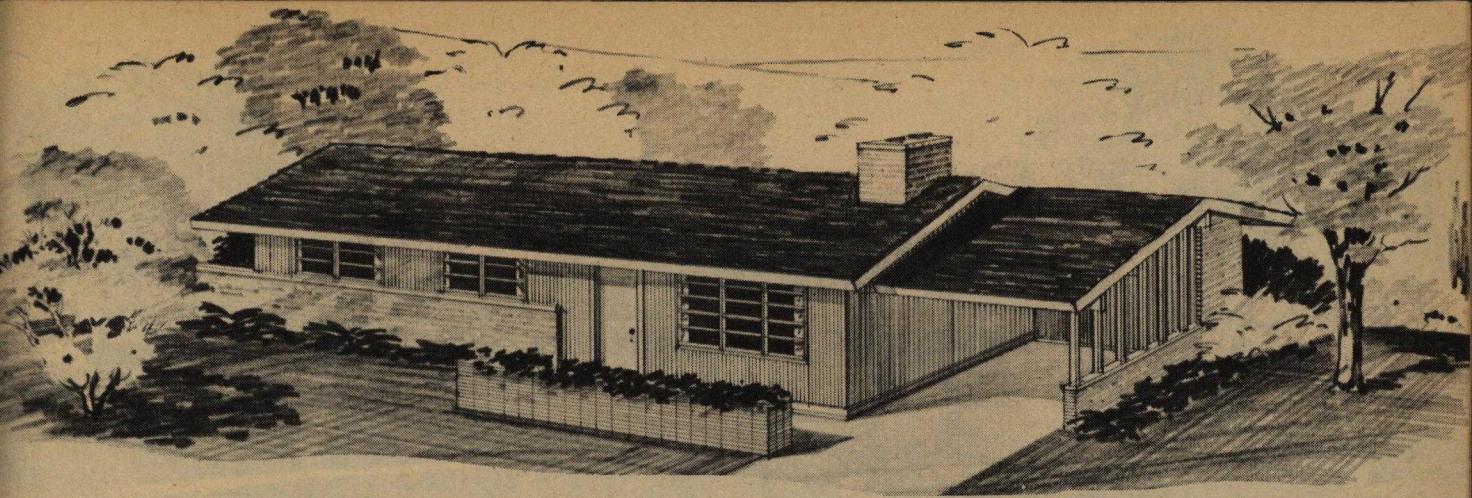

A rectangle with plenty of space and all kinds of livability. If called upon, this trim design will function well as a four bedroom home. The center entrance can route traffic past the living room with its built-in planter/storage room divider. The compact, efficient, L-shaped kitchen works well with the spacious family dining area. Sliding glass doors open onto the outdoor terraces. The large indoor storage area and laundry location will please the housewife.

DESIGN G 694

1,553 sq. ft., 14,800 cu. ft.

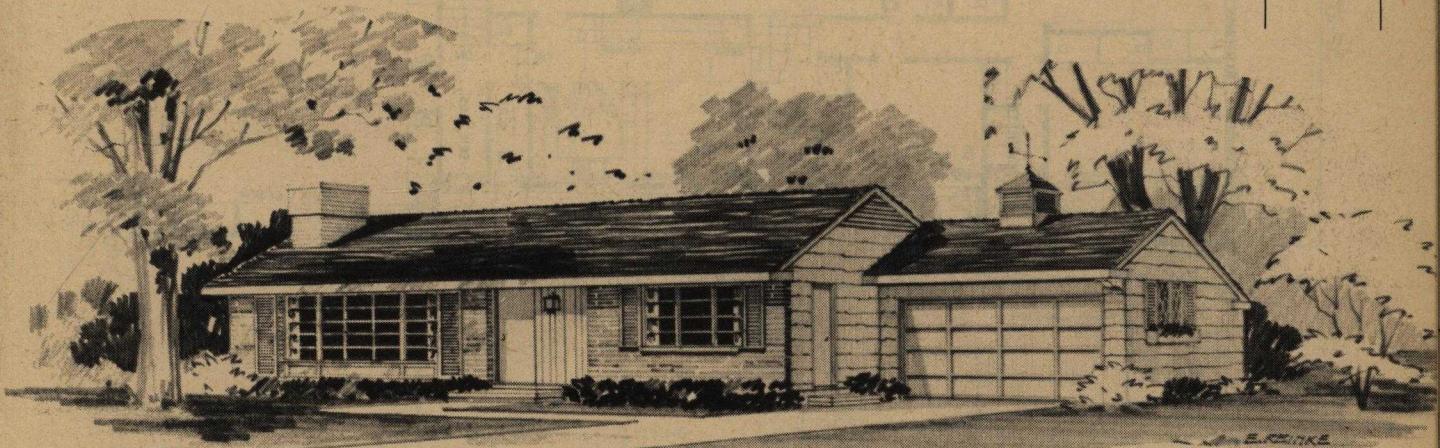

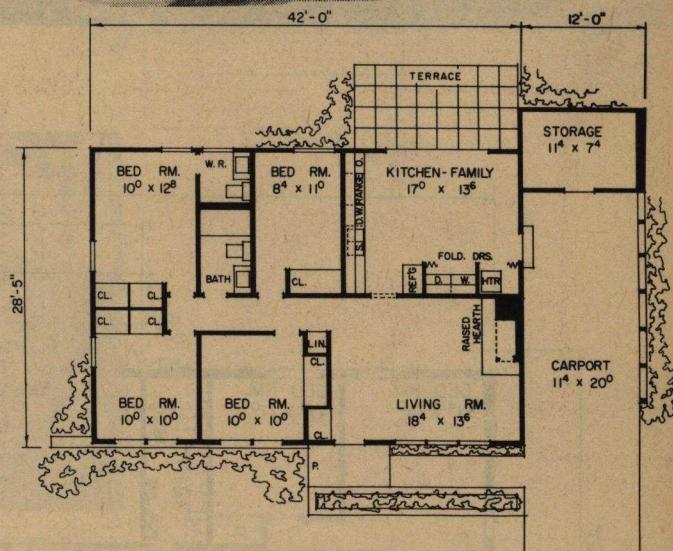

A home to be proud of; one that will reflect your good taste. The exterior of this enchanting ranch home is surpassed only by the convenience and workability of its floor plan. The two full baths provide ample facilities for the large family. The efficient kitchen with its built-in oven and range is flanked by the family room which will function as the informal living and dining area, and the more formal dining room.

DESIGN G 1012

1,185 sq. ft., 13,224 cu. ft.

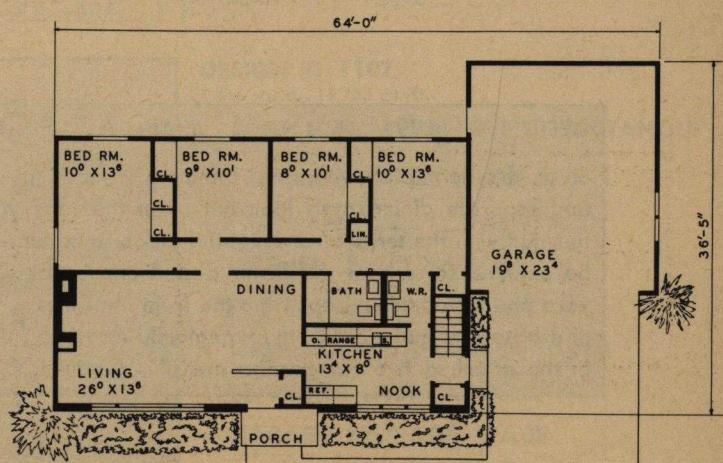

Here is a house that is the answer to a large family's tight building budget. Arranged in a simple, straightforward manner, are four bedrooms, one-and-a-half baths, plenty of closets, the formal living room and the outstanding family kitchen. The blueprints for this non-basement home call for a wood floor system with crawl space. Details are available for a basement version by ordering blueprints for DESIGN G 1013

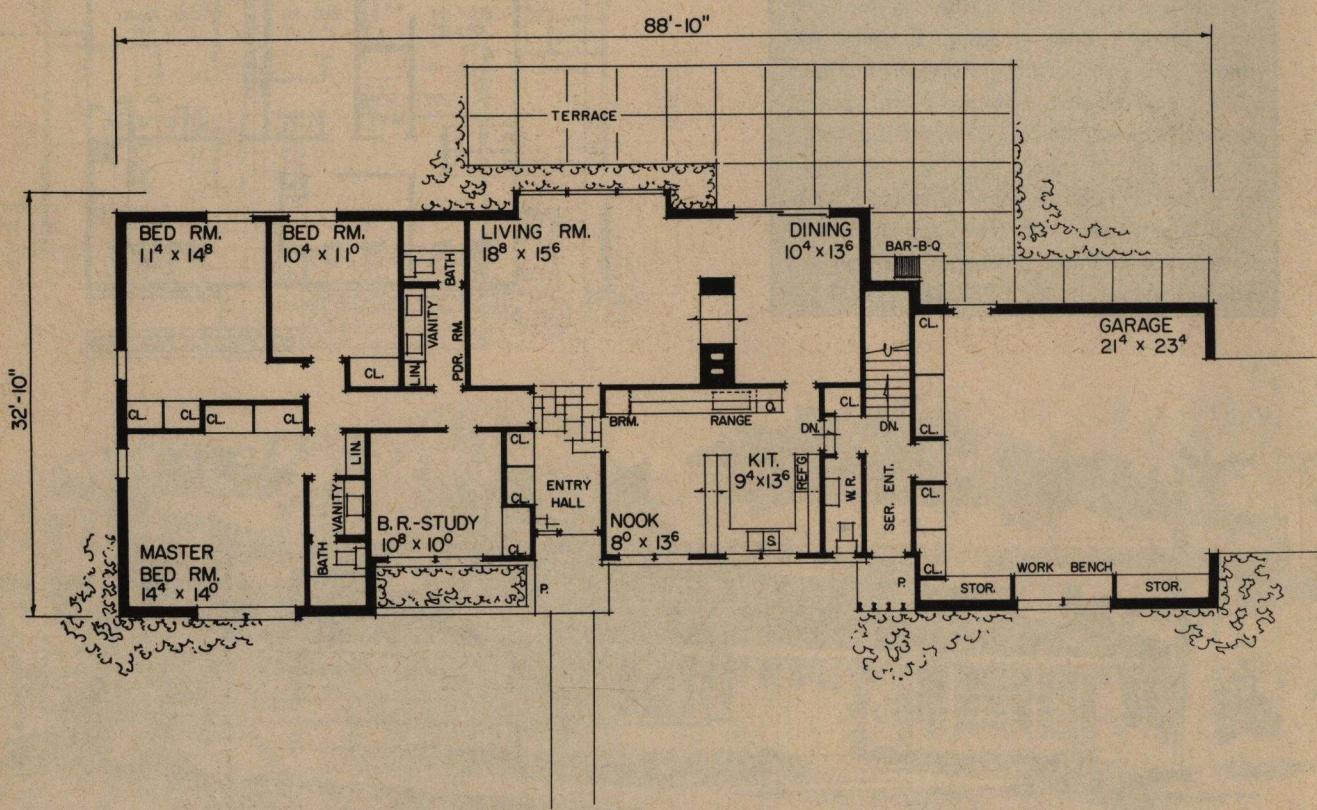

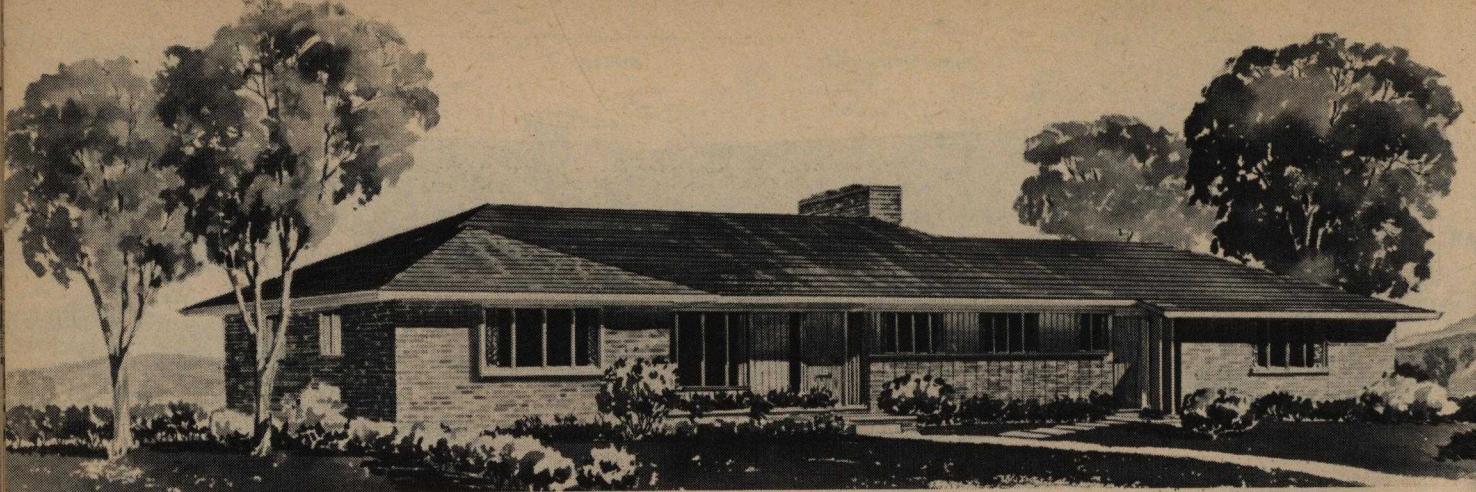

DESIGN G 837

1,250 sq. ft., 24,475 cu. ft.

This economically built traditionally styled home represents a study in contrasts. The large family with a restricted budget is faced with a number of compromises when planning a new home. The challenge lies in providing the family with its basic needs so that it can function comfortably and efficiently. With flexibility the byword study the sleeping, bath, eating, and living facilities. Don't forget the basement.

DESIGN G 1129

• 1,904 sq. ft.

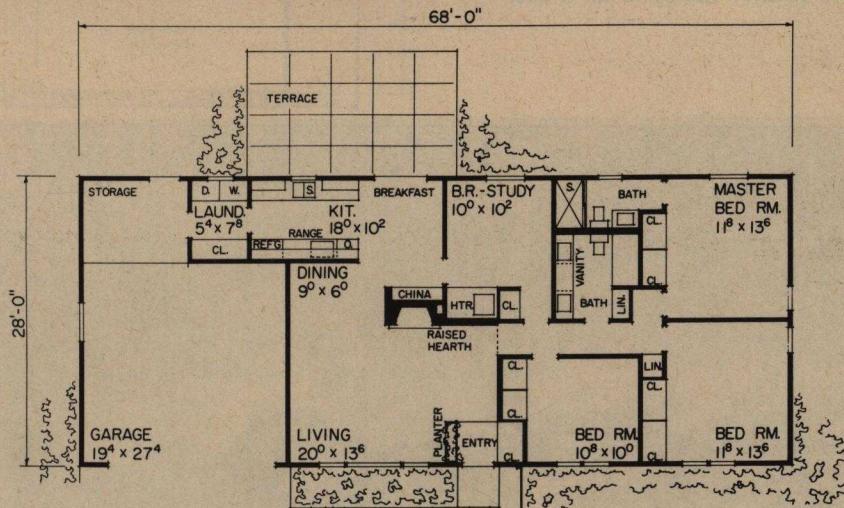

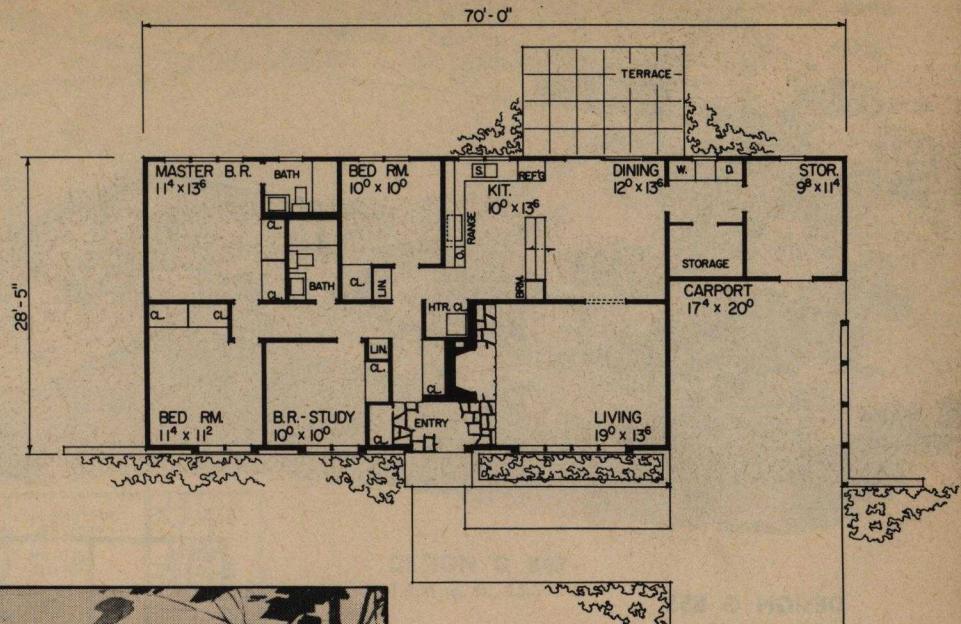

• 34,066 cu. ft.

Study this floor plan with care, for there is much to recommend it to the large family. The living room and separate dining area look out upon the rear yard. Sliding glass doors permit the dining area to function with the terrace—a delightful indoor-outdoor living feature. An appealing two-way fireplace may be enjoyed from both the living and dining areas. The efficient, U-shaped kitchen overlooks the front yard and is but a few steps from the front entry hall as well as the service entrance. The extra washroom and basement stairs are both strategically located. The outdoor barbecue unit and all the storage facilities in the attached two car garage are plus features. Don't miss the highlights of the sleeping area.

DESIGN G 855

1,460 sq. ft., 25,068 cu. ft.

This U-shaped design has a fine separation of functions. The sleeping, living, and work areas are well defined and experience their share of privacy from each other. This is most important where large families are concerned. This frame home, with its colorful accents of quarried stone, has four bedrooms and two full baths—located back-to-back to result in plumbing economy. Observe how these baths are situated handy to all areas.

DESIGN G 847

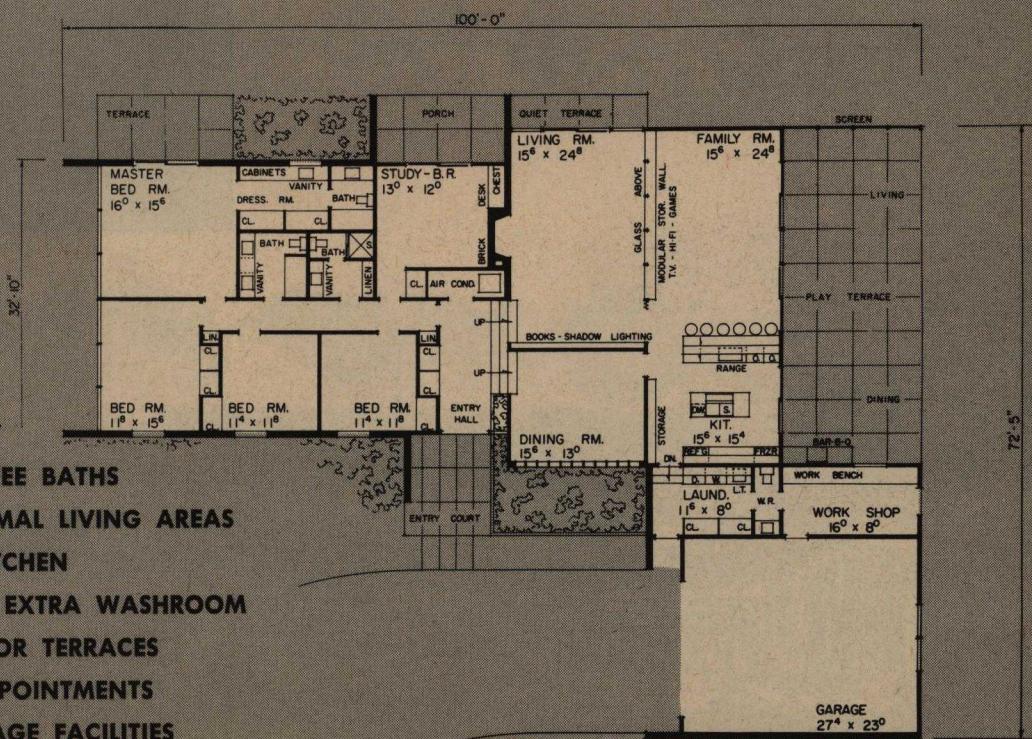

1,506 sq. ft., 15,301 cu. ft.

Stepping through the front doorway of this appealing L-shaped home the eye focuses upon the delightful planter. From this point traffic patterns will be most efficient. A few steps forward or to each side of this uncramped front entry and your guests may be ushered into any one of the three distinct areas of the house—the living, the sleeping, or the work area. The sleeping area is highlighted by three bedrooms plus a study which can function as the guest room.

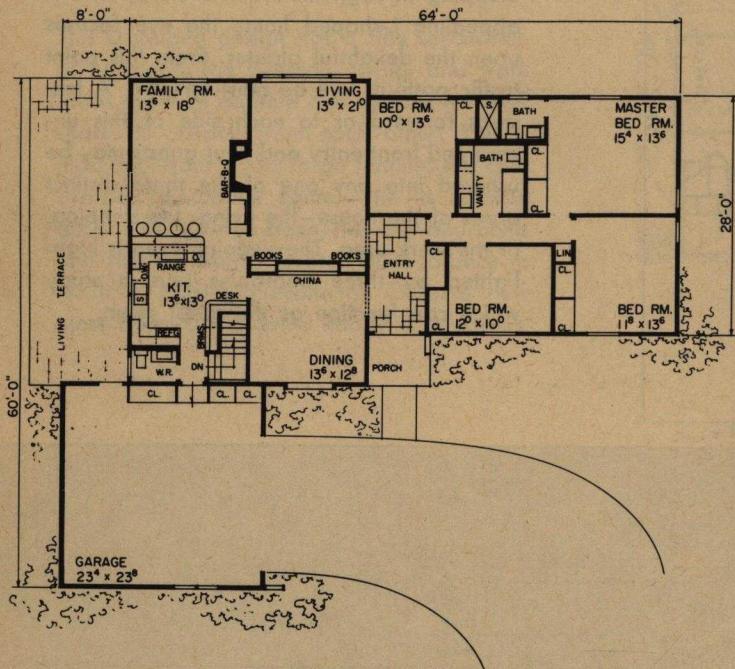

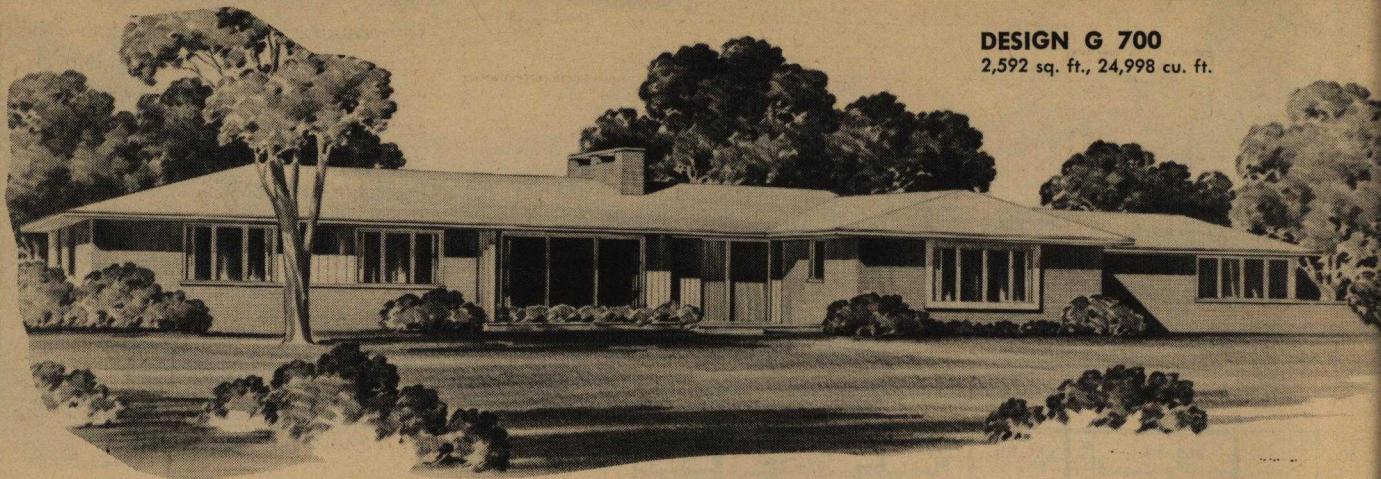

DESIGN G 1077

2,944 sq. ft., 28,940 cu. ft.

- UNLIMITED LIVABILITY
- FIVE BEDROOMS, THREE BATHS
- FORMAL AND INFORMAL LIVING AREAS
- EFFICIENT ISLAND KITCHEN
- SEPARATE LAUNDRY, EXTRA WASHROOM
- FUNCTIONAL OUTDOOR TERRACES
- DELUXE INTERIOR APPOINTMENTS
- OUTSTANDING STORAGE FACILITIES

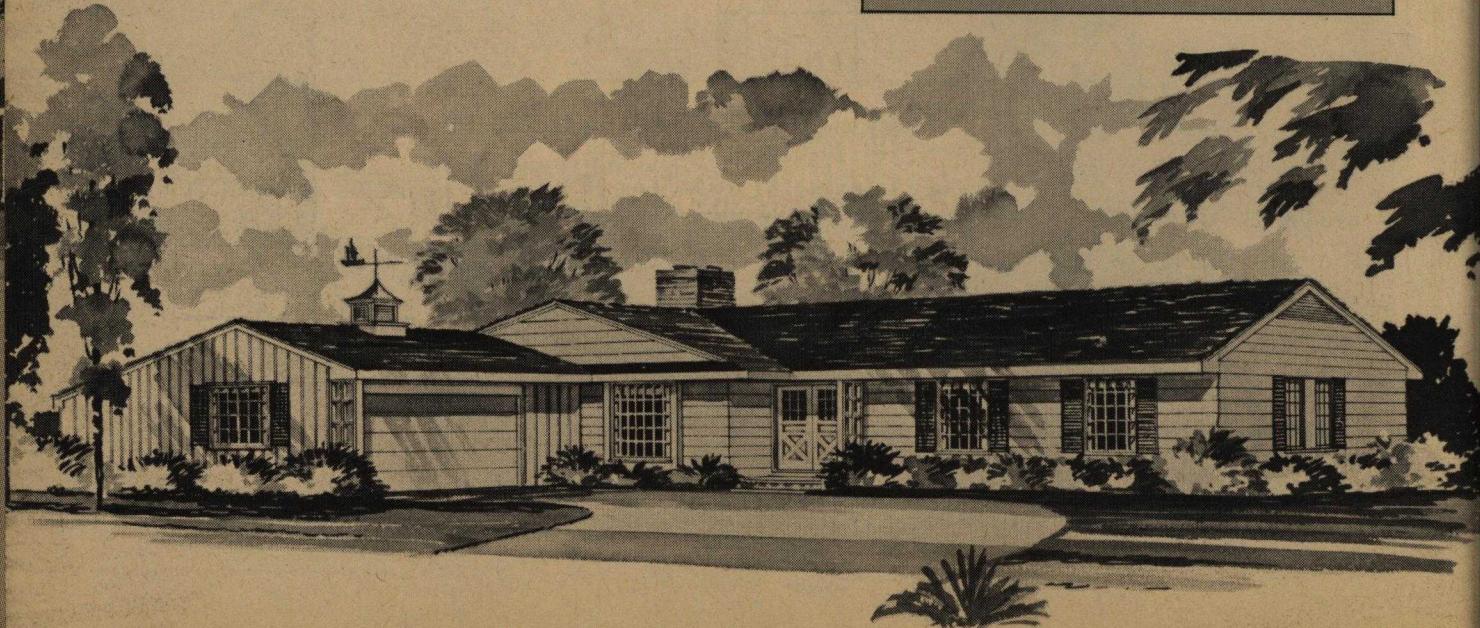

DESIGN G 700
2,592 sq. ft., 24,998 cu. ft.

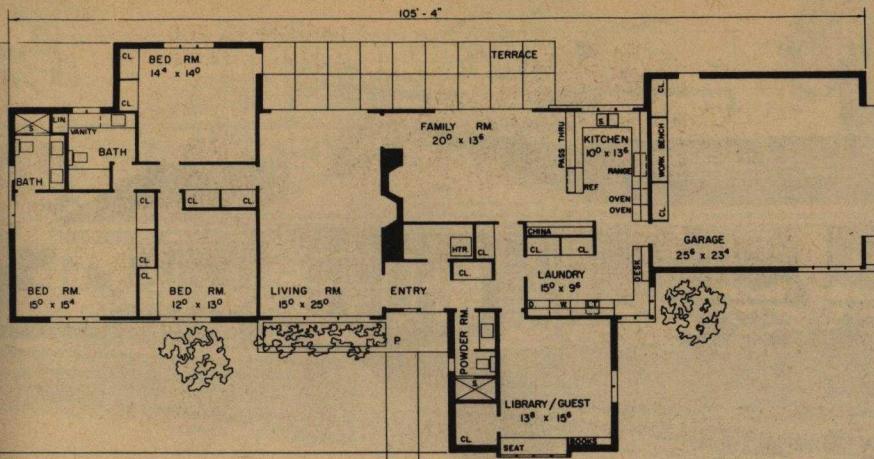

DESIGN G 1110

- FOR FINE FAMILY LIVING
- TWO FULL BATHS, EXTRA WASHROOM
- QUIET LIVING ROOM
- SEPARATE DINING ROOM
- MULTI-PURPOSE FAMILY ROOM
- INDOOR BARBECUE UNIT

More space for everyone. This four bedroom home will allow the members of a large family that freedom of movement so important to enjoyable living patterns. In addition to the excellent sleeping and bath facilities, the two large living areas make a vital contribution to fostering unrestrained togetherness. The family room, kitchen, and outdoor terrace function well together to assure the success of informal activities. The sizable living room, with its fireplace as the focal point, will serve as the haven for quiet conversation.

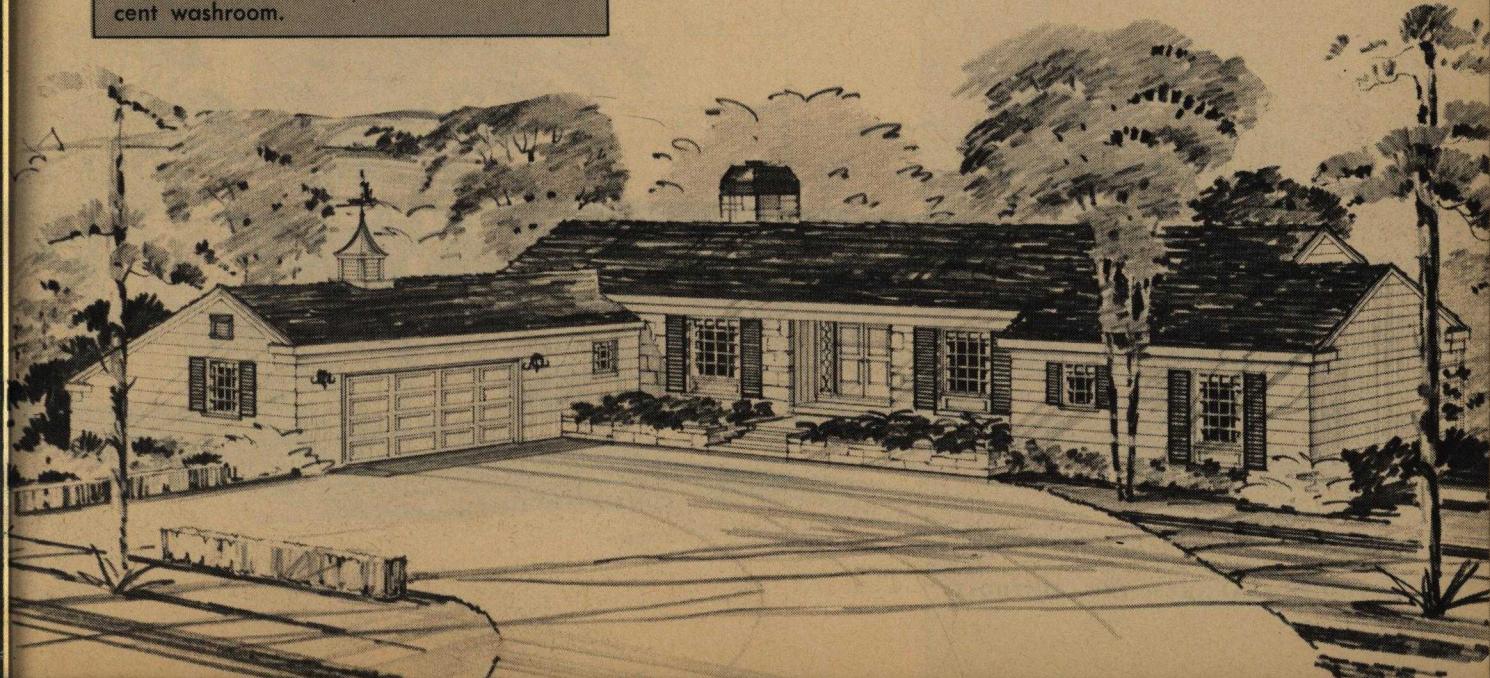

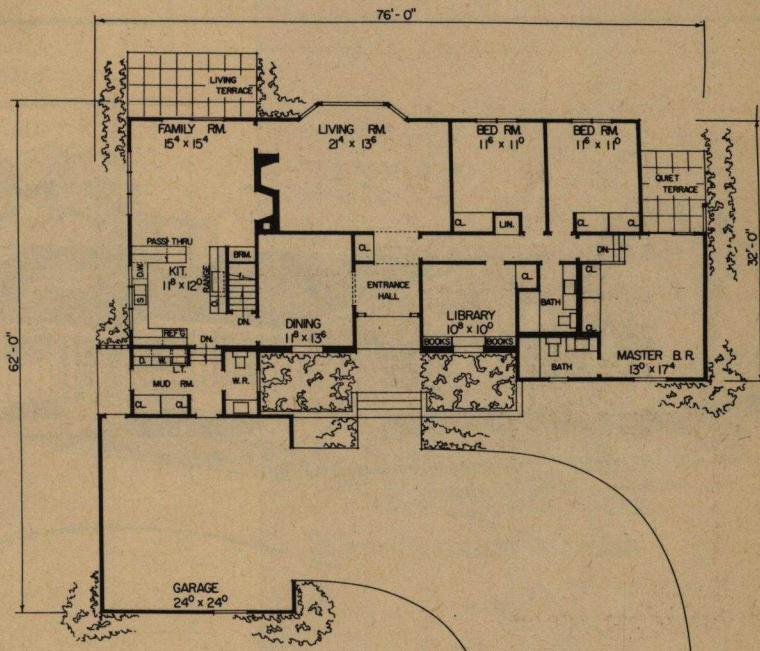

The casual passer-by would know this house had a story of Convenient Living to tell. And, indeed it has! Here is gracious living in the best that present day floor planning might offer. Study this plan carefully with an eye to a family's sleeping, recreational, relaxing, and housekeeping requirements. There are three full baths, two fireplaces, a separate laundry, and plenty of built-in furniture units. Glass sliding doors separate the indoor living areas from the terrace. Don't overlook the work-bench in the garage.

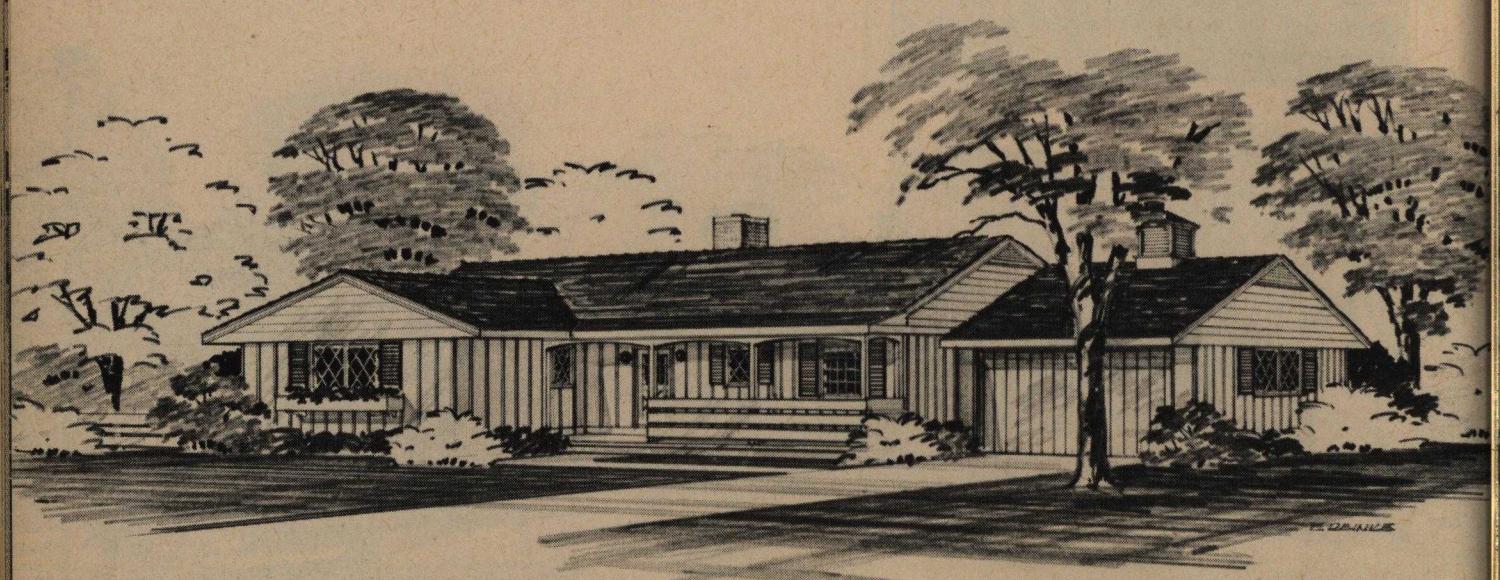

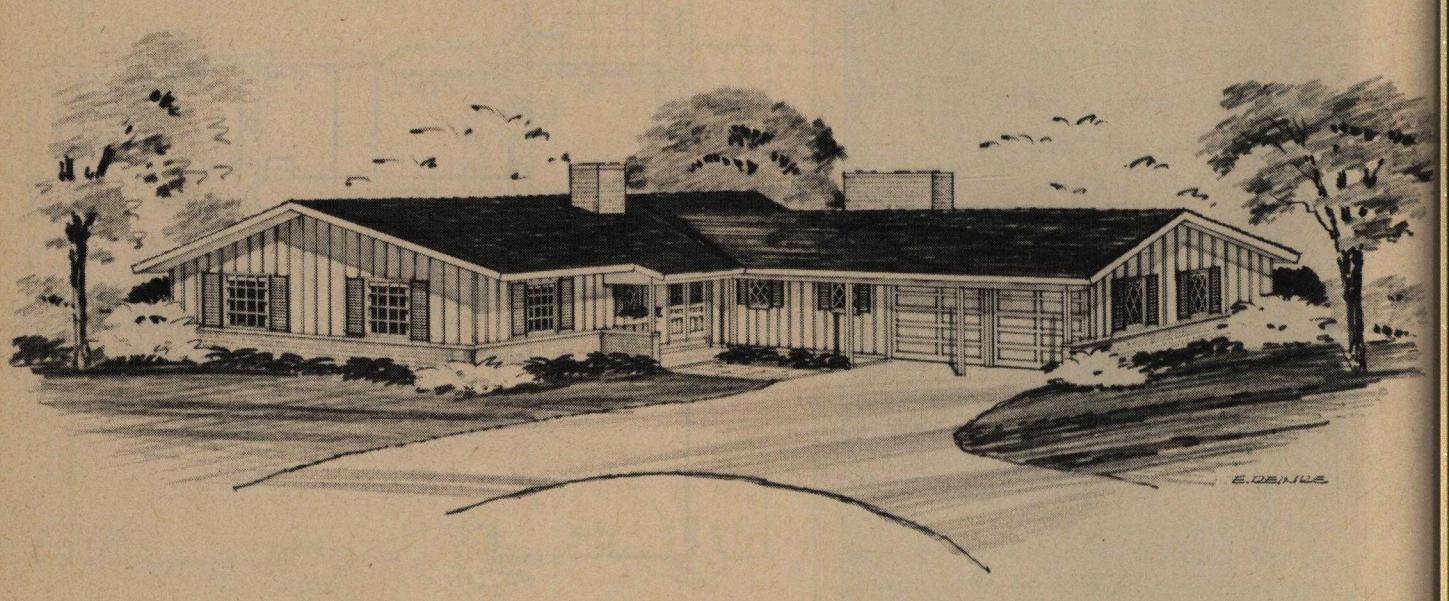

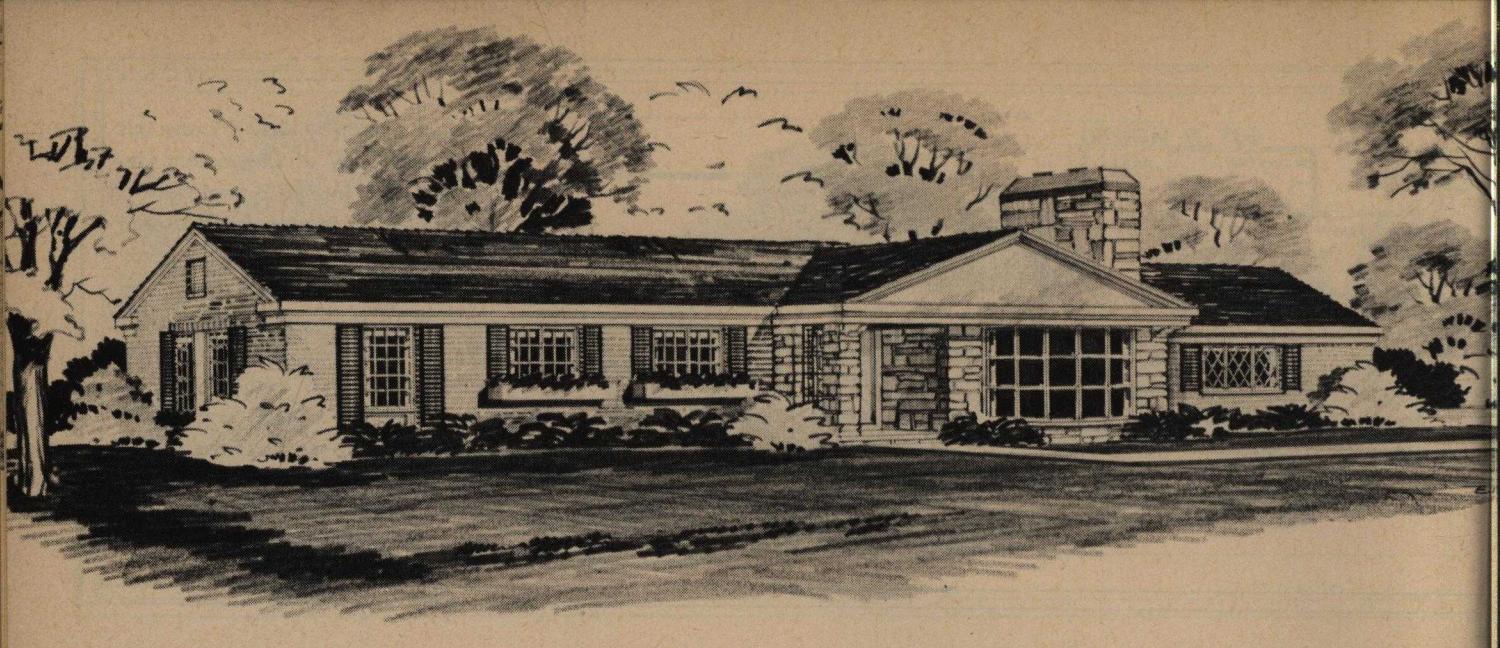

DESIGN G 956

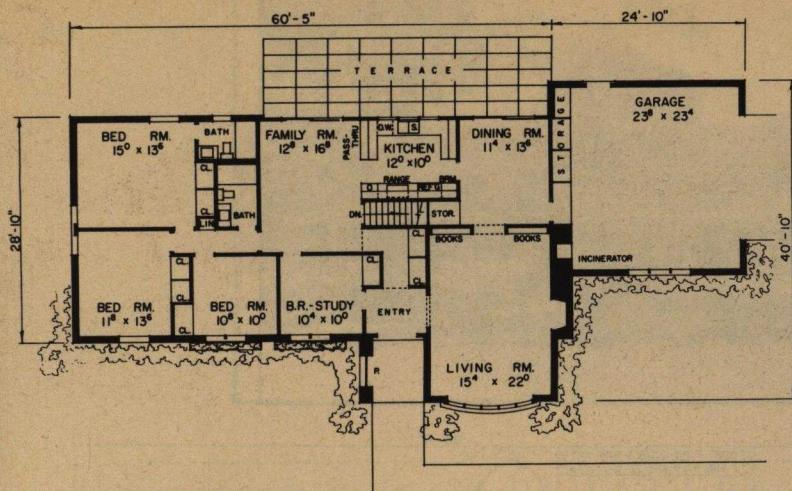

2,134 sq. ft., 39,772 cu. ft.

- SUNKEN MASTER BEDROOM
- FORMAL DINING ROOM
- FUNCTIONAL TERRACES
- LAUNDRY/MUD ROOM
- TWO FIREPLACES
- IMPRESSIVE FRONT ENTRANCE

It will matter very little whether this gracious house is called upon to function as a four bedroom home, or one with three bedrooms and a quiet library. The feeling of spaciousness will still prevail. The large living room with its bay window overlooking the rear yard will enjoy its full measure of privacy. Separated from the formal living room by twin fireplaces, the cheerful family room functions ideally with both the work center and the living terrace. Observe the mud room with its laundry equipment and adjacent washroom.

700 DESIGNS FOR YOUR REVIEW . . . ONLY \$3.75

Here are over 500 pages of delightful designs, featuring some 1800 illustrations of favorite home planning ideas by America's outstanding designer, Richard B. Pollman. The complete current selection of Mr. Pollman's designs is available at the publisher's special price of only \$3.75. Within the pages of these current books you find designs of all sizes, styles, and types—from 800 sq. ft. to 3000; from interesting flat-roof contemporaries to authentic traditioanls; from delightful vacation homes to interesting hillside houses. You'll surely experience many happy hours of home planning fun reviewing the designs that comprise this renowned collection.

ADDITIONAL HOME PLANNING AIDS

DIAL-AWAY ESTIMATOR

With complete instructions, this invaluable estimating tool enables you to see the difference in costs of one style home over another of the same size; hip-roof VS gable, concrete VS wood floor, brick VS frame, basement VS non-basement, warm air VS hot water heat, plus most any other variable you can think about. It even shows how much to allow for your builder's profit and overhead, and how much it costs to build in your area. Order with blueprints! Only \$3.00.

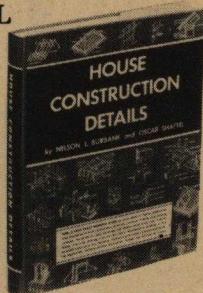

MODEL HOME KIT

Build a true scale model of any style home up to 2590 sq. ft. of floor space. Visualize the floor plan and exterior design—before construction! All materials and instructions included. Only \$3.95 each.

HOUSE CONSTRUCTION DETAIL

An exact working guide on every detail of house construction from foundation to finish. Tells you dimensions, materials, processes, step-by-step working methods. Hundreds of scale drawings and photographs. Quick-reference index enables you to find instantly any construction detail on which you want modern, authoritative guidance, \$5.95 each.

GLOSSY PHOTOGRAPH

A large picture of your future home is always nice to have around to show friends. In addition, such a picture can be helpful when it comes time to landscape. Glossy, 8" x 10" photos are available for the artist's drawings of the front exterior of all designs featured in Home Planners' current publications. \$2.00 each.

HAND SIGHT LEVEL

Precision made by David White Instrument Co., it quickly establishes true level line of sight—without adjustments of any kind! Use it for grading, fencing, paving, landscaping, etc. Slips in your pocket. Only \$3.00 each.

DESIGN G 984 30,641 cu. ft.

The charm of French Provincial is characterized by this dignified two-story home. The overhanging balcony with its delicate wrought iron work, the inviting double front doors flanked by the two bay windows, and the shuttered French doors and windows help make a truly imposing exterior. The use of vertical siding and brick results in a crisp, appealing contrast. The projection of the attached garage and the front driveway are impressive.

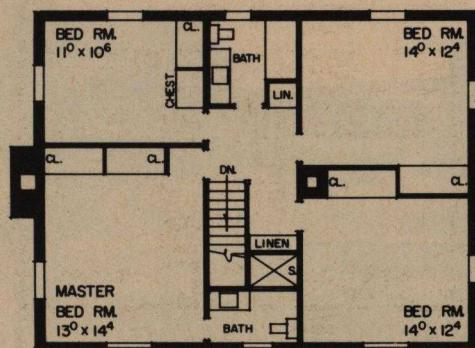

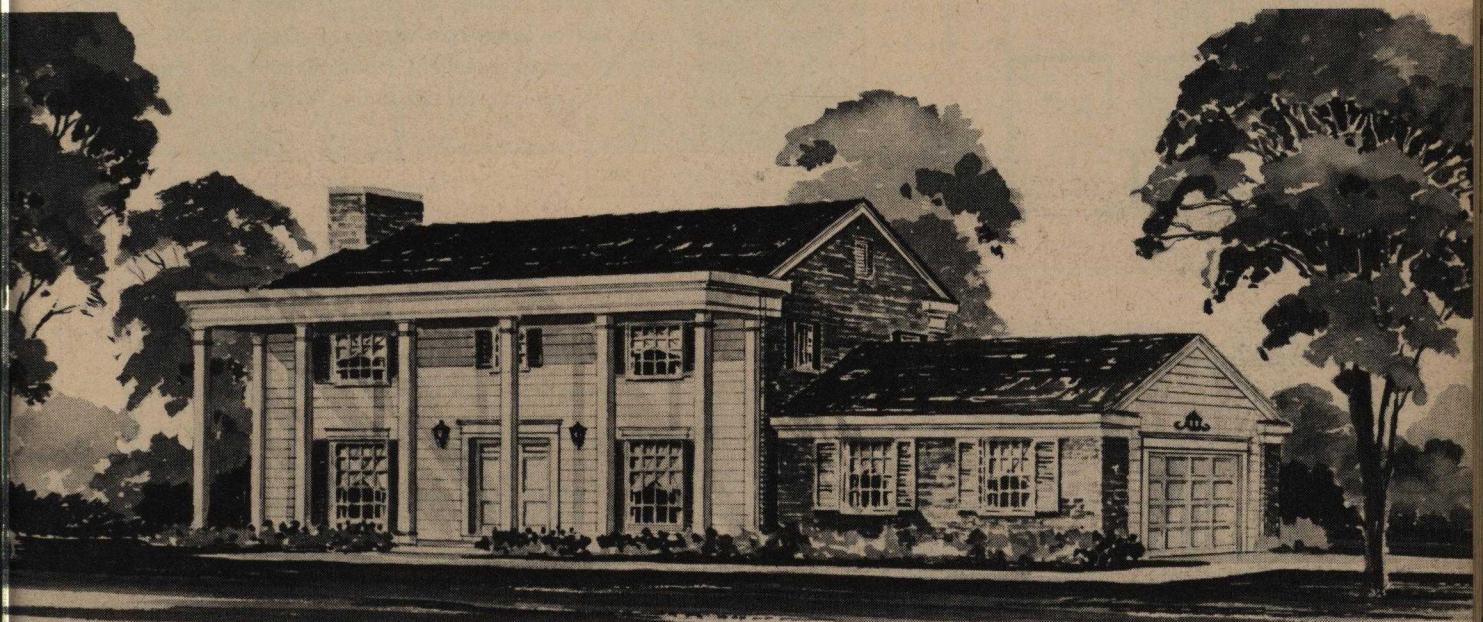

Upon entering this home visitors are impressed by the possibilities its plan offers for fine formal living patterns. The center entry hall routes traffic most effectively. The large living room, free of unnecessary cross-room traffic, will enjoy the utmost in privacy. Glass sliding doors allow this room to function easily with its living terrace. The separate dining room and the breakfast area solve all dining problems. The study may also serve as the extra bedroom. Large bedrooms with plenty of closet space highlight the second floor.

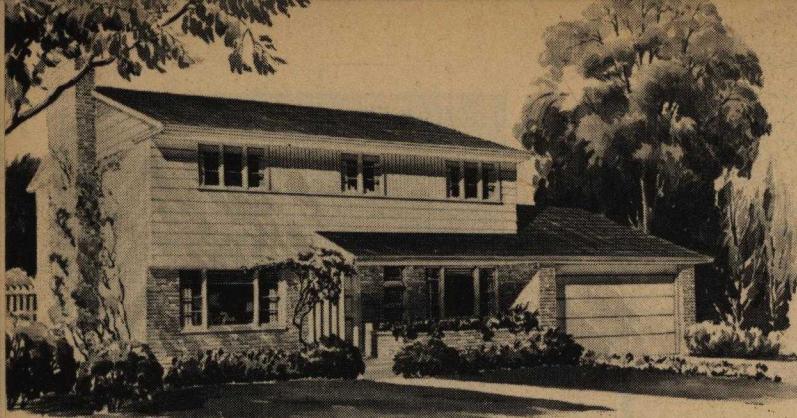

DESIGN G 997 21,349 cu. ft.

Reminiscent of Mount Vernon, this traditional two story home captures all the grandeur of early America. Setting the character are the six stately pillars of the front porch; not the formal double front doors; the symmetry of the windows with their shutters, and the lanterns. The contrast of the horizontal siding and the red brick is, indeed, effective. Adding much to the breadth of this two story is the attached two car garage.

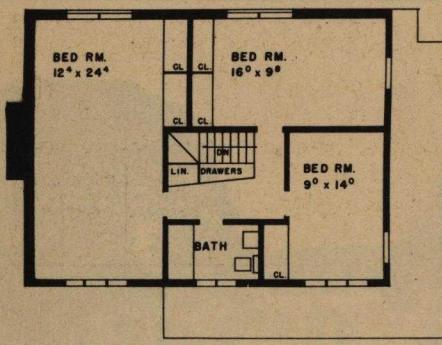

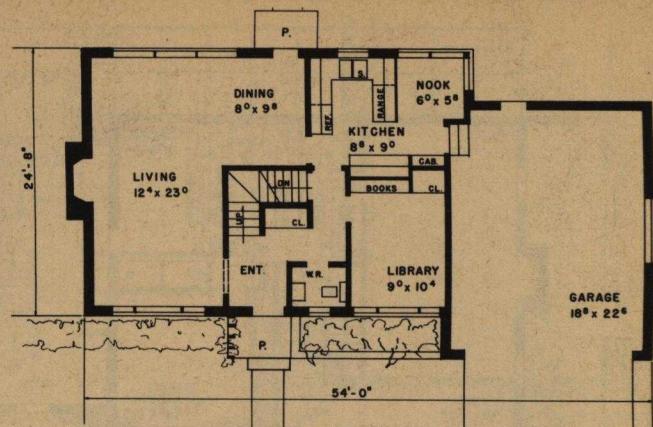

1,046 sq. ft.—Second Floor

Gracious, formal living patterns will be enjoyed by the members of the large family occupying this home. Although the first floor plan above shows the non-basement layout, the blueprints for this particular design include details for basement construction. The end living room can be free of cross-room traffic. This room, like the nook, functions with the rear terrace. The first floor laundry area, extra washrooms, and U-shaped kitchen are among the Convenient Living features.

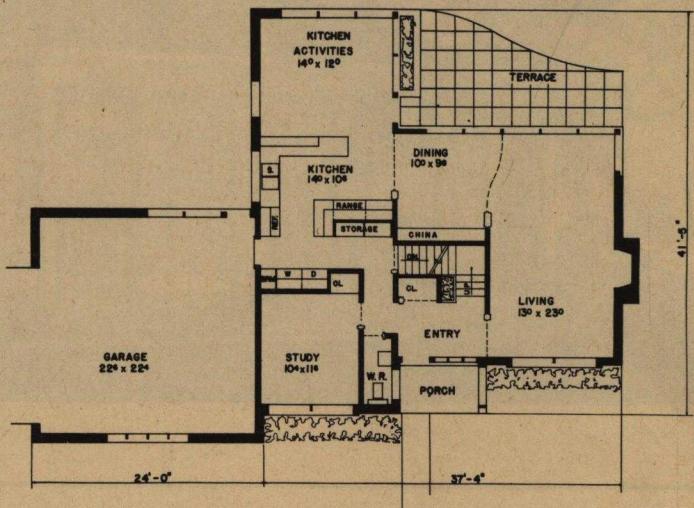

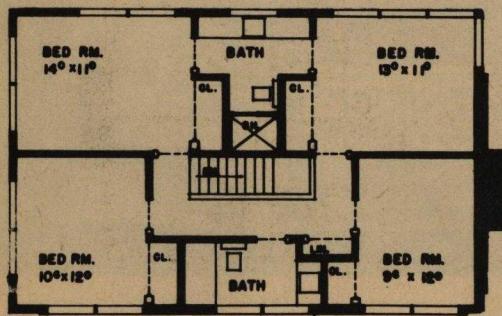

DESIGN G 244

23,288 cu. ft.
860 sq. ft.—First Floor
888 sq. ft.—Second Floor

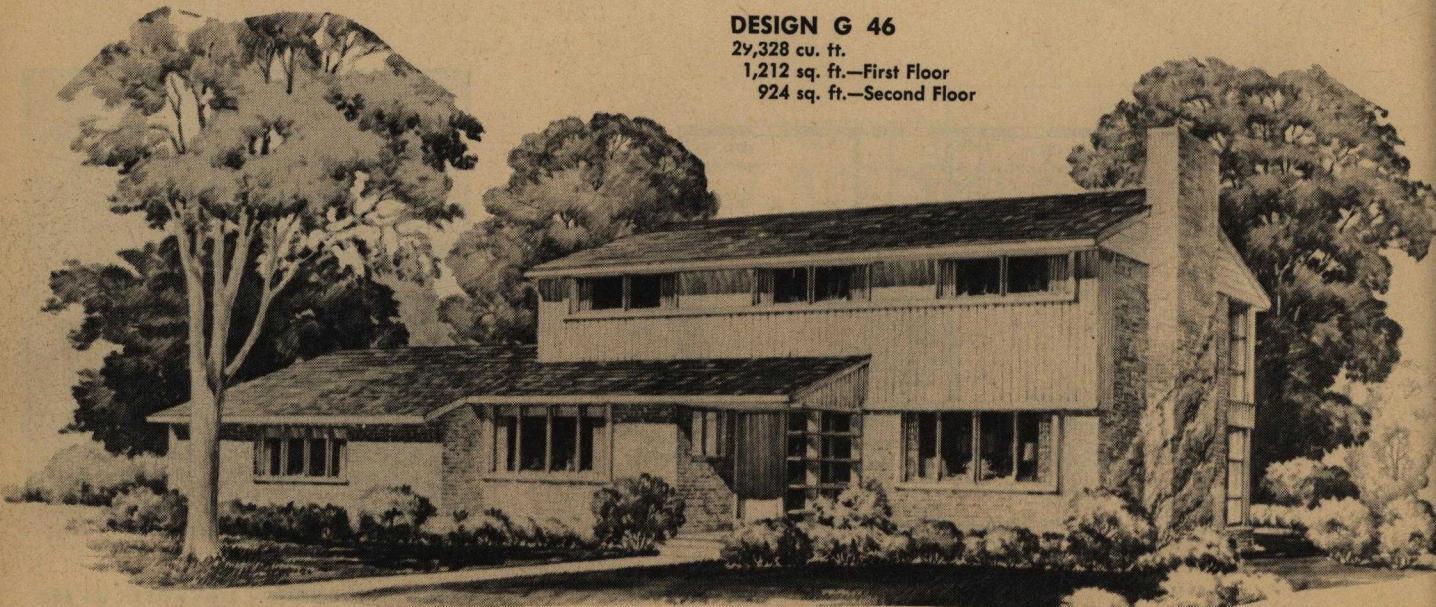

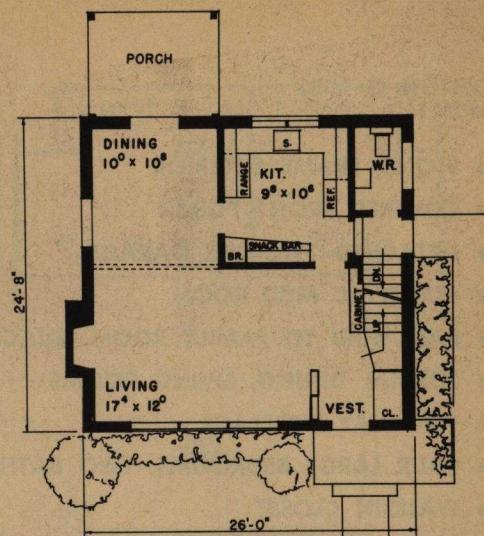

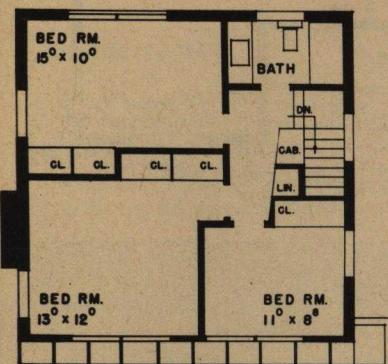

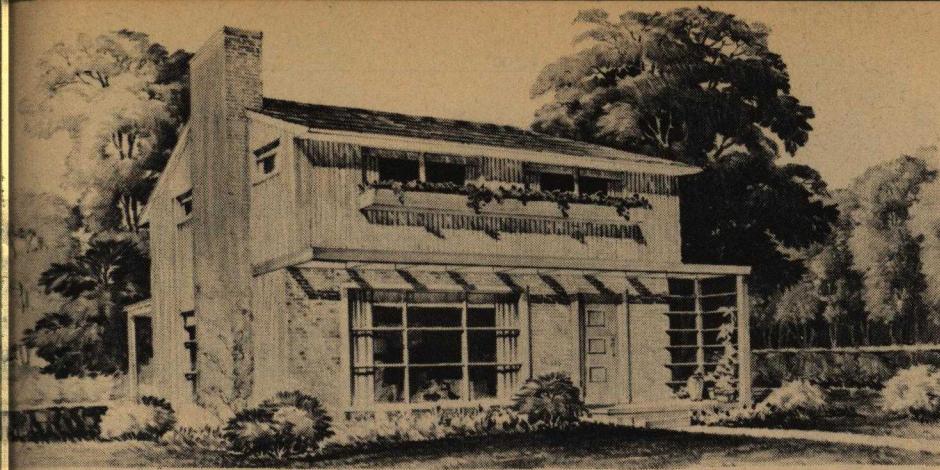

The two designs on this page are quite similar in exterior appearance. Yet, a study of their floor plans reveals an interesting difference in living patterns. Almost 50% smaller on the first floor, Design G 244 above, may be regarded as lower-cost version of Design G 46 below. Both of these designs feature excellent traffic circulation, fine bath facilities, large end living rooms, formal dining areas, and first floor reading/guest rooms.

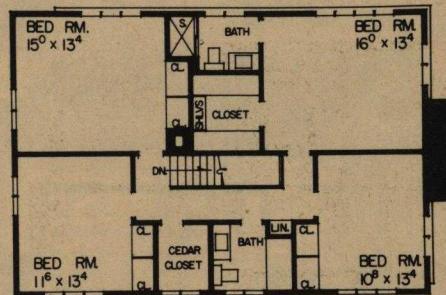

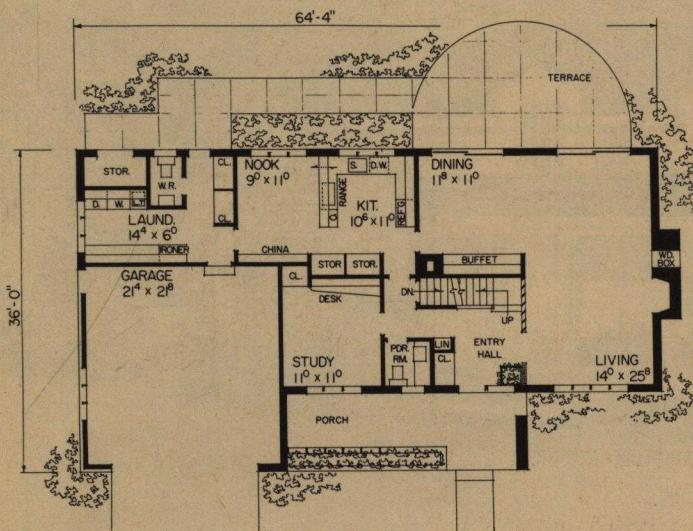

DESIGN G 46

29,328 cu. ft.
1,212 sq. ft.—First Floor
924 sq. ft.—Second Floor

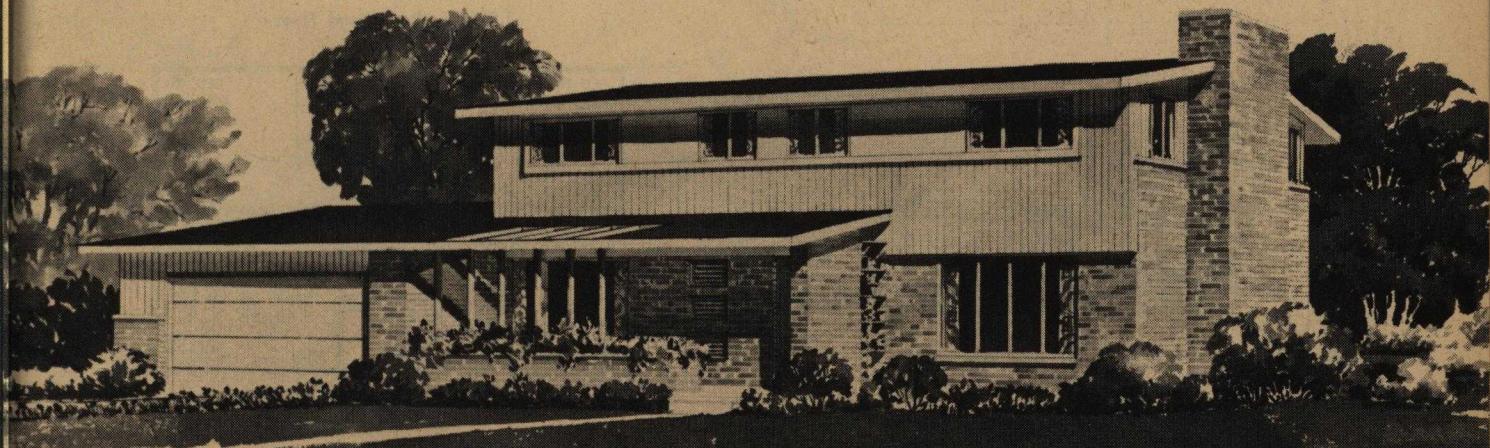

A contemporary, narrow lot two story like Design G 268, above, is often hard to find. Measuring only 26 feet across the front, this compact home is most efficient. The snack bar, with storage cupboards above, provides kitchen eating space. Double doors open from the formal dining area onto the covered porch. Design G 594, below, offers all the livability a large active family of today would require. List its many features.

Four bedrooms, two full baths, two eating areas, an efficient kitchen, a family room, a large living room with fireplace, an attached two car garage, and sixteen (count them) closets! This one-and-a-half story home has livability features galore. The relationship of the outdoor living area to the family room, kitchen, and nook is fine.

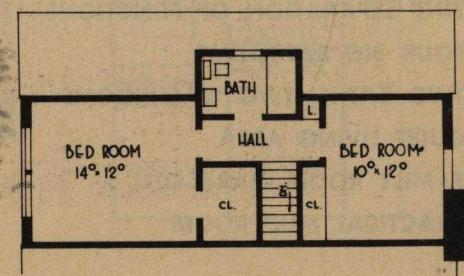

Charming indeed—and low cost to boot! Here, the magic of good design has resulted in a delightful, little exterior for a narrow site. The floor plan, however, is sure to return large dividends in the form of outstanding livability. The center entrance assures good traffic circulation. There are four bedrooms, two full baths, and two eating areas.

In these days of informality the graciousness of formal living is often forgotten. Here is a plan for those who like to have a large separate room for dining; for those who often dream of a library to serve as their reading retreat; for those who have wished for a sweeping living room free from annoying cross-room traffic; as well as for those who like large bedrooms with adequate bath facilities.

Here is a tri-level home that will build most economically. Its exterior incorporates a pleasing use of masonry block and vertical wood siding. Should your building site slope to the rear, you will be able to expose the lower level so that the big family room opens onto the terrace. The study may serve as the fourth bedroom since it, too, receives plenty of natural light. Other features include two full baths and excellent storage.

The features of this multi-level home are many, indeed. Its traditional exterior has a magnetic warmth which will catch the attention of the most casual passer-by. Designed for a flat site, the lower family room level enjoys an abundance of cheerful natural light. This level, like the two upper levels, offers plenty of livability. It has the family recreation area, a fourth bedroom (or study), a laundry room, and a full bath. Study the other levels.

The bi-level concept of living is becoming popular. This is understandable, for it represents a fine way in which to gain a maximum amount of extra livable area beneath the basic floor plan. In the

case of this pleasant contemporary, the lower level not only represents extra living area in the form of a family room, a fourth bedroom, and a study; but there is also the two-car garage which because of its size

can serve the dual role of work shop and car storage. The large glass areas and the sloping ceilings of the upper level living area make this a cheerful and spacious place. Each level has outdoor living.

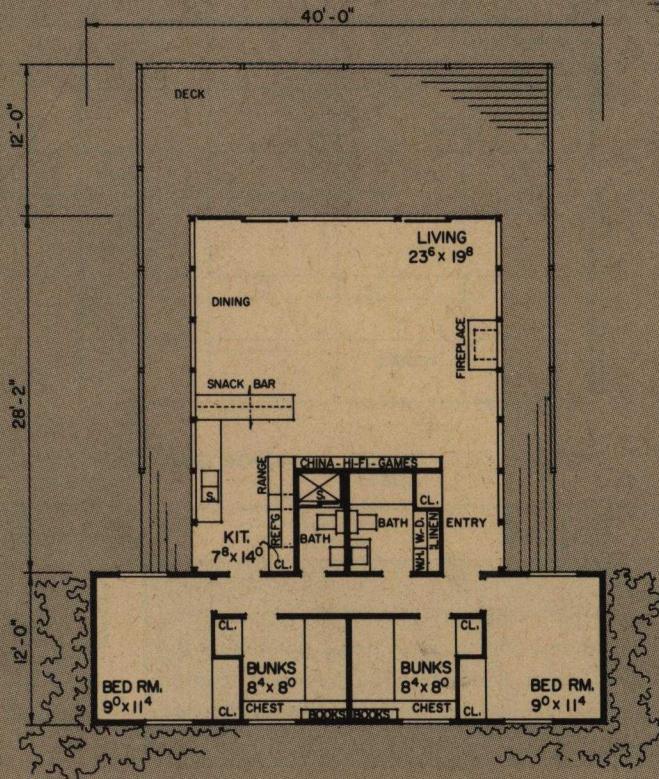

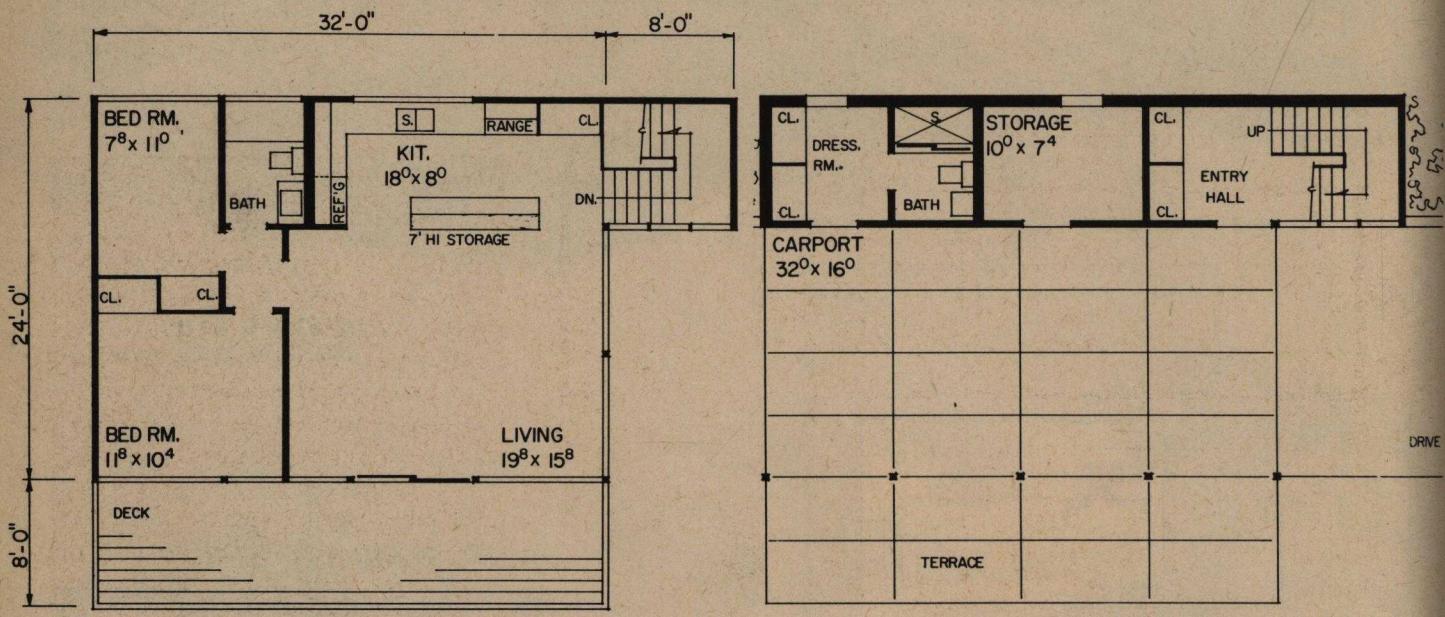

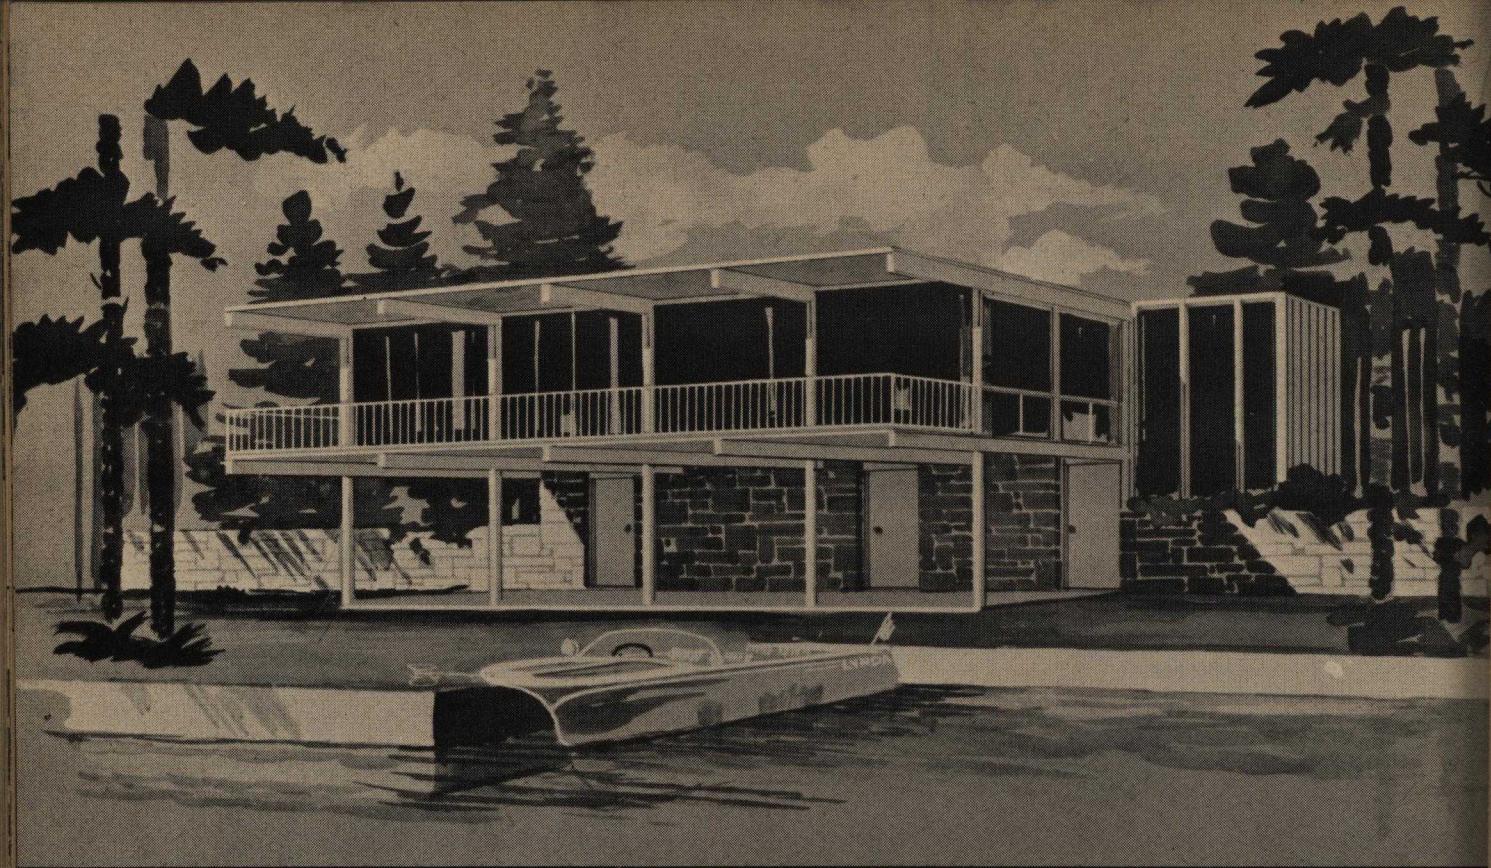

VACATION HOMES

DESIGNS FOR

Convenient Living

PORTFOLIO NO. 12

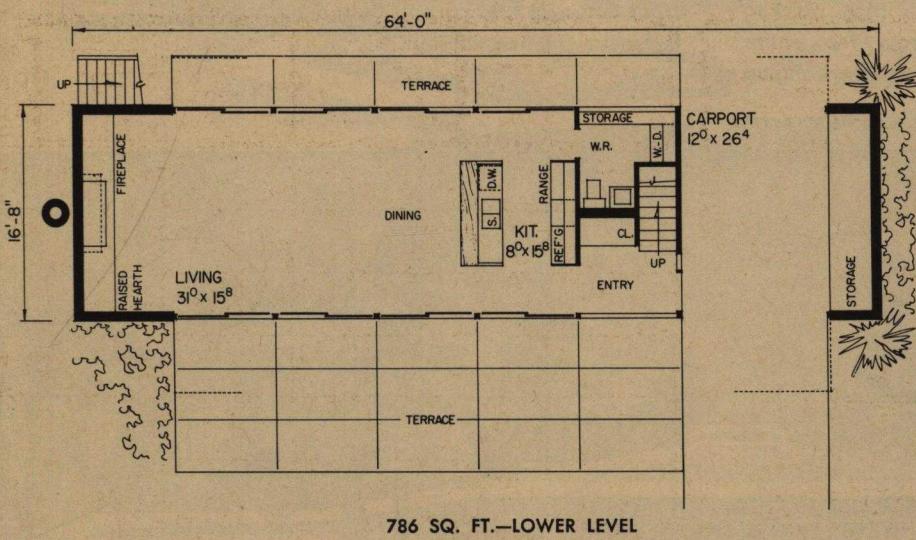

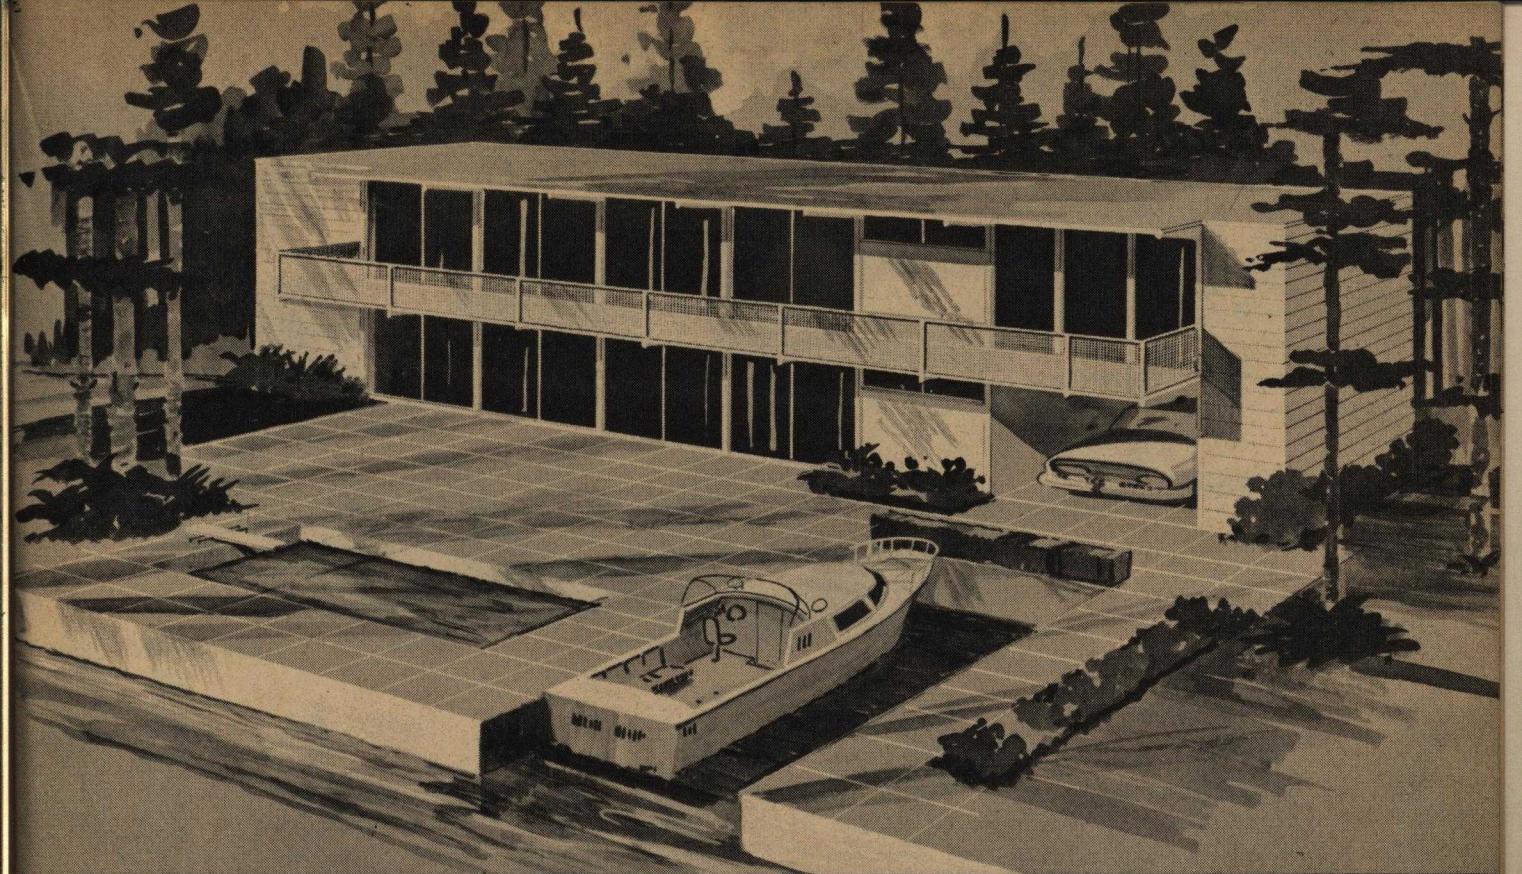

853 SQ. FT.—UPPER LEVEL

336 SQ. FT.—LOWER LEVEL

DESIGN G 1401 • 9,216 cu. ft.

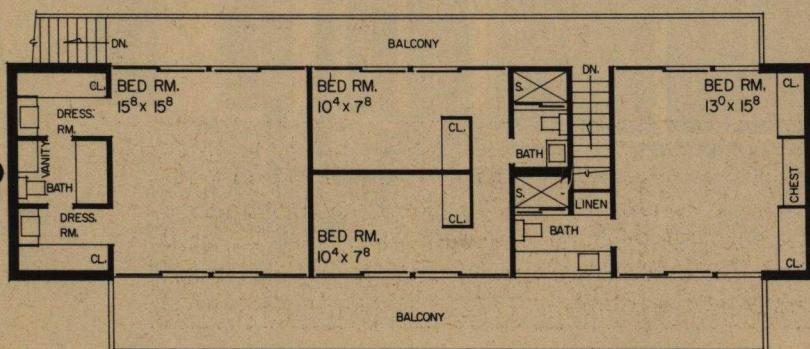

A dramatically contemporary vacation home. Delightful glass areas of the upper living level allow for an unrestricted view of the lake shore. Sliding glass doors open from the spacious living area onto the covered deck overlooking the water. The carport is located below the living area and will function wonderfully as play area. Dressing room, storage area, and entry hall are located at this lower level.

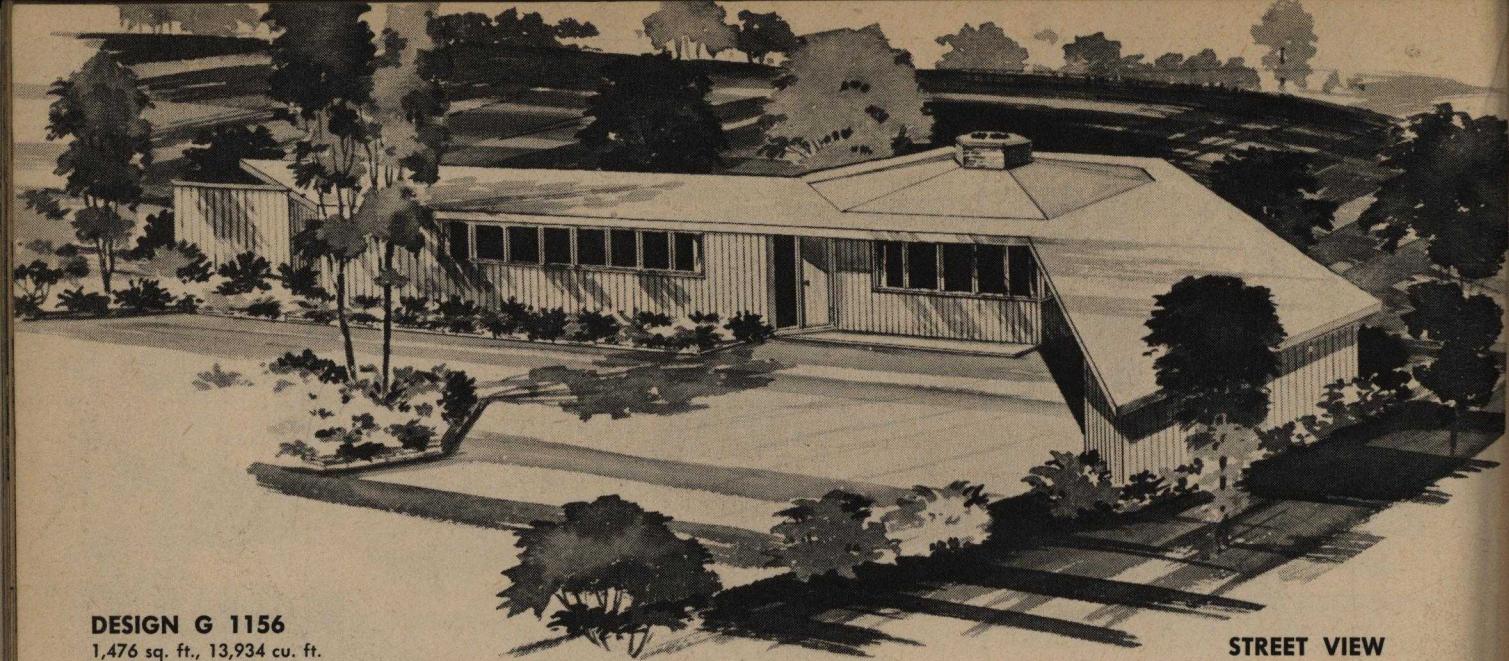

DESIGN G 1405

15,034 cu. ft.

Here is a two level summer home which will provide plenty of space for those large family, holiday get-togethers. Perfectly rectangular in shape, this flat roof design will be economical to build. Sliding glass doors open to both the front and rear and assure fine ventilation. Cleverly designed for summer living, access to the bedroom is from the overhanging outdoor balconies. The four bedrooms are serviced by three full baths. Wardrobe storage facilities are excellent. The lower level is highlighted by an extra washroom, an efficient work center, a fireplace, and a carport which will function for boat storage during the off-season.

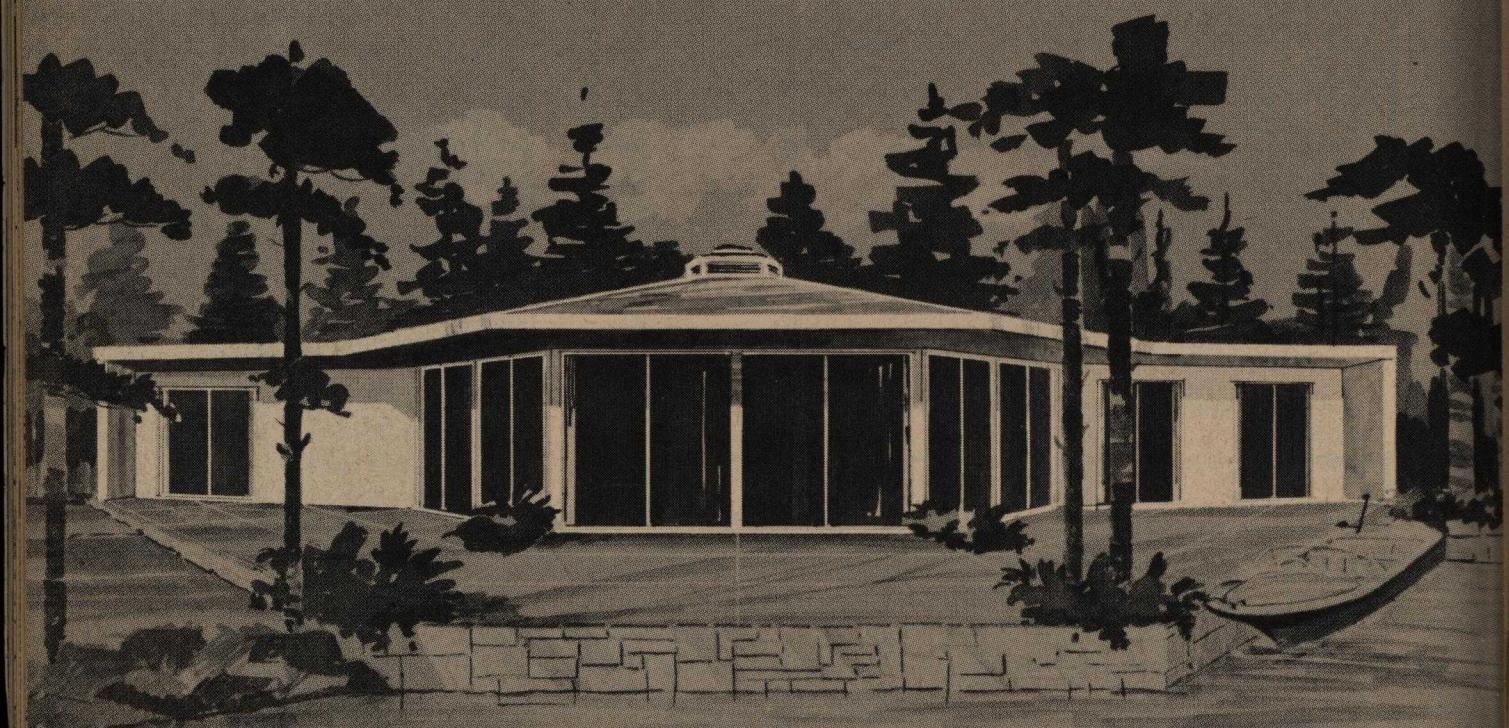

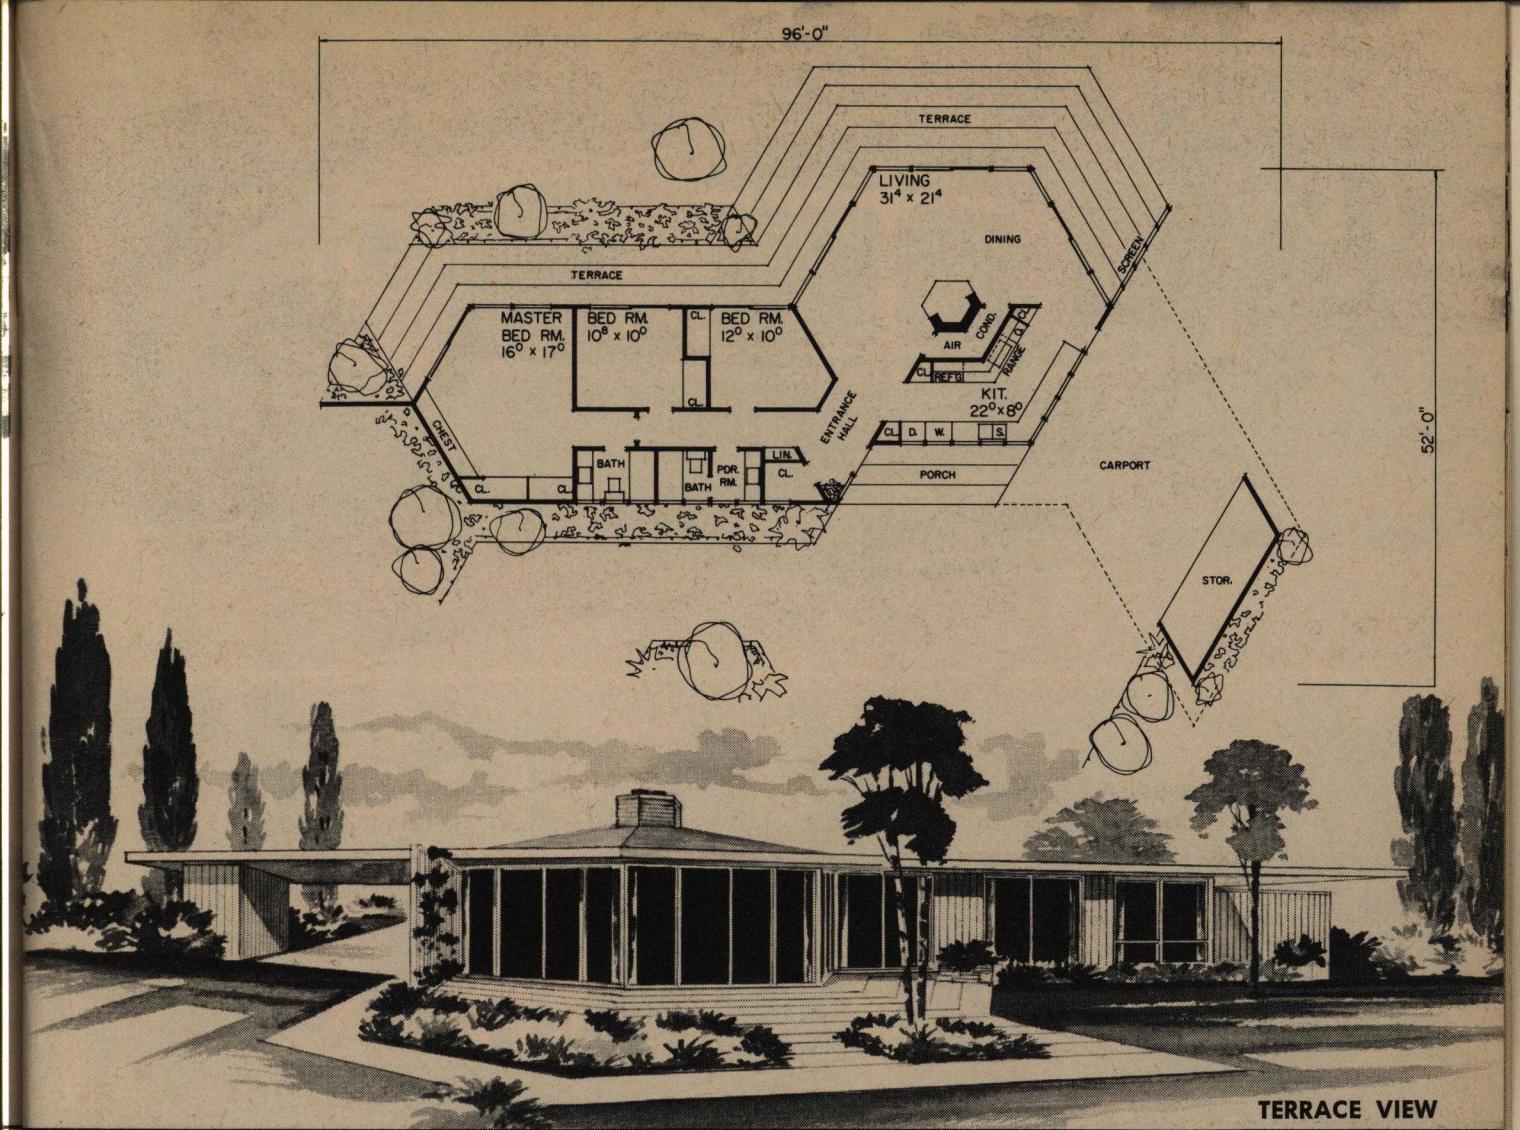

DESIGN G 1156
1,476 sq. ft., 13,934 cu. ft.

STREET VIEW

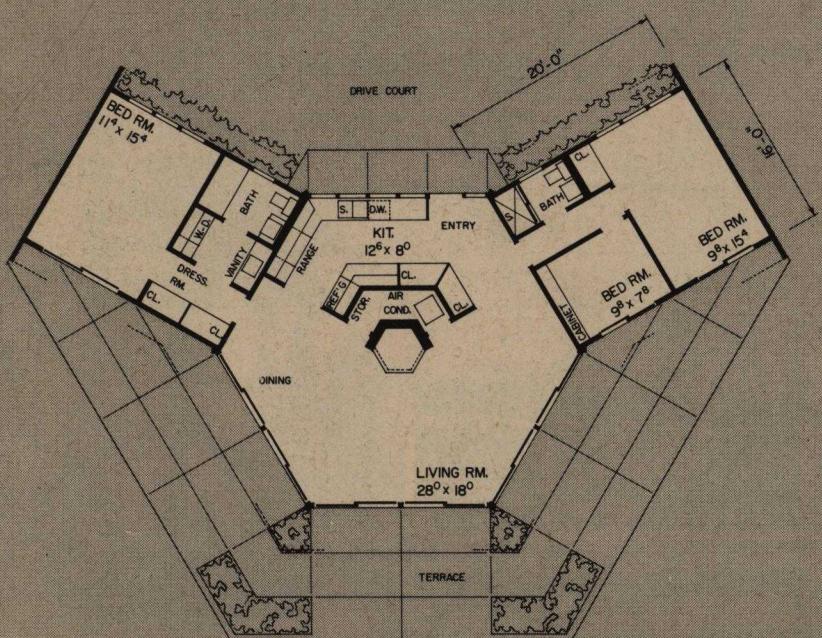

An exciting design, unusual in character, yet fun to live in. This frame home, with its vertical siding and large glass areas, has as its dramatic focal point an hexagonal living area which gives way to interesting angles. The large living area features sliding glass doors through which traffic may pass to the terrace stretching across the entire length of the house. The wide overhanging

roof projects over the terrace and results in a large covered area outside the sliding doors of the master bedroom. The sloping ceilings converge above the unique open fireplace with its copper hood. The drive approach and the angles of the covered front entrance and carport help make this a truly eye-catching design.

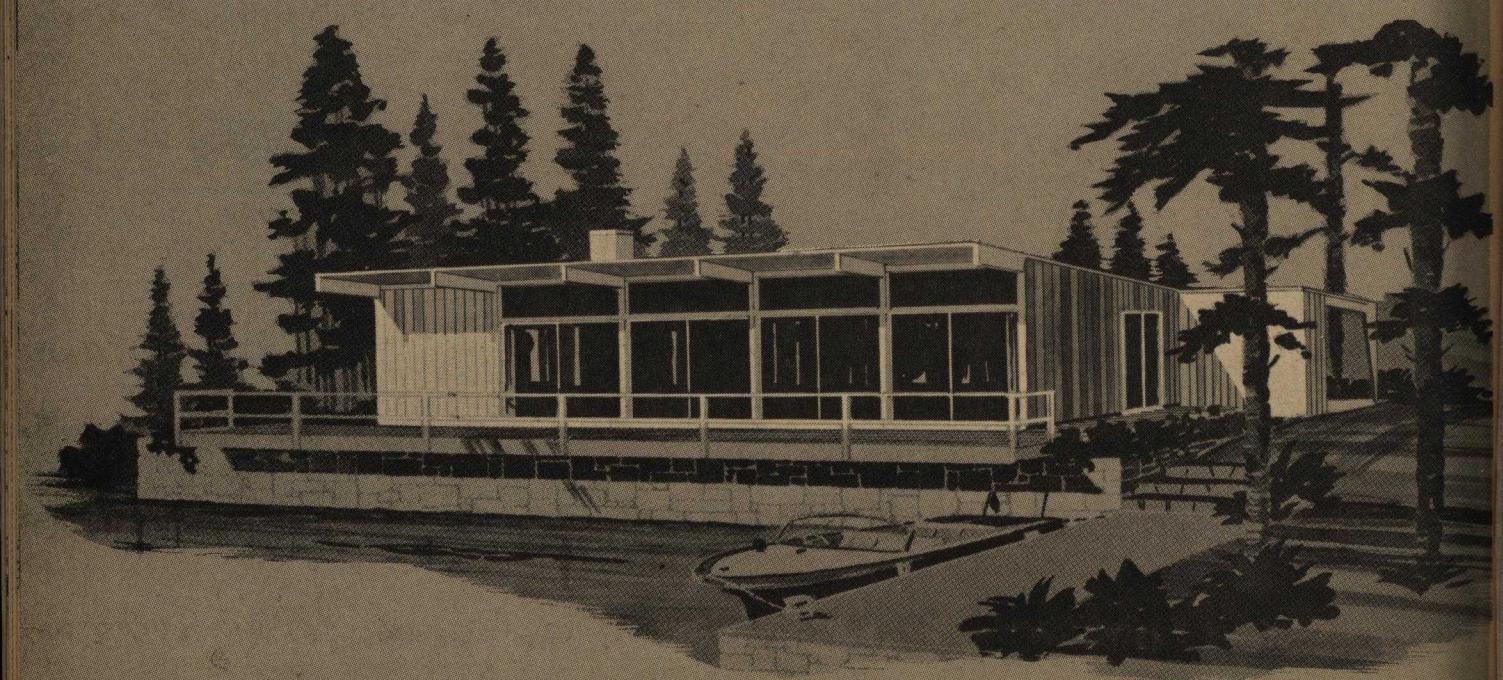

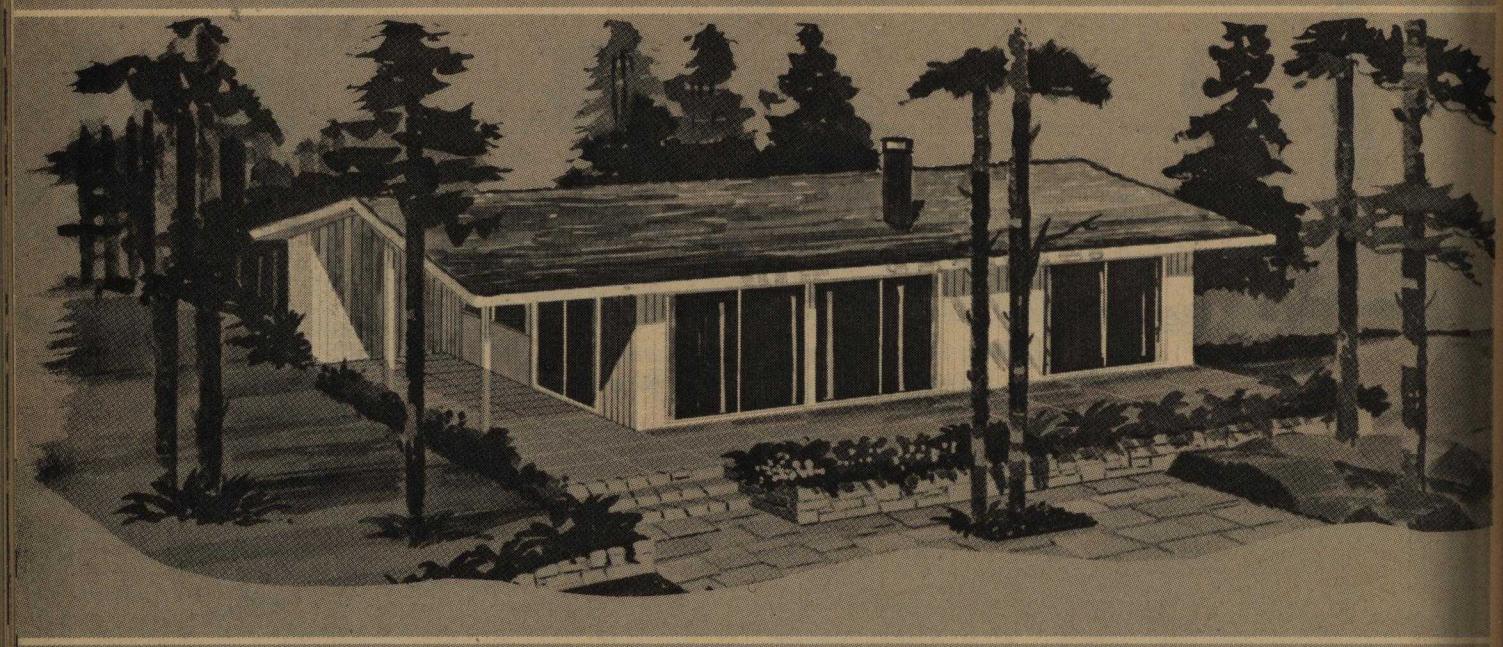

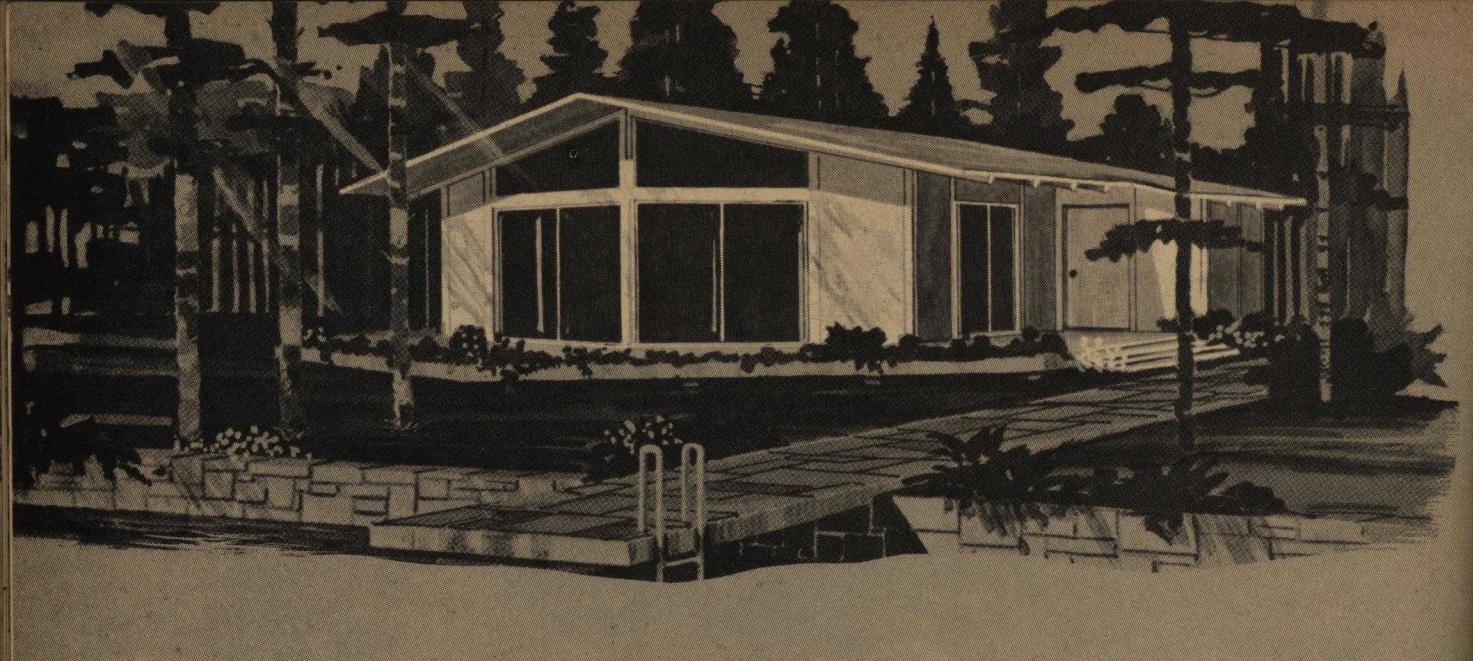

TERRACE VIEW

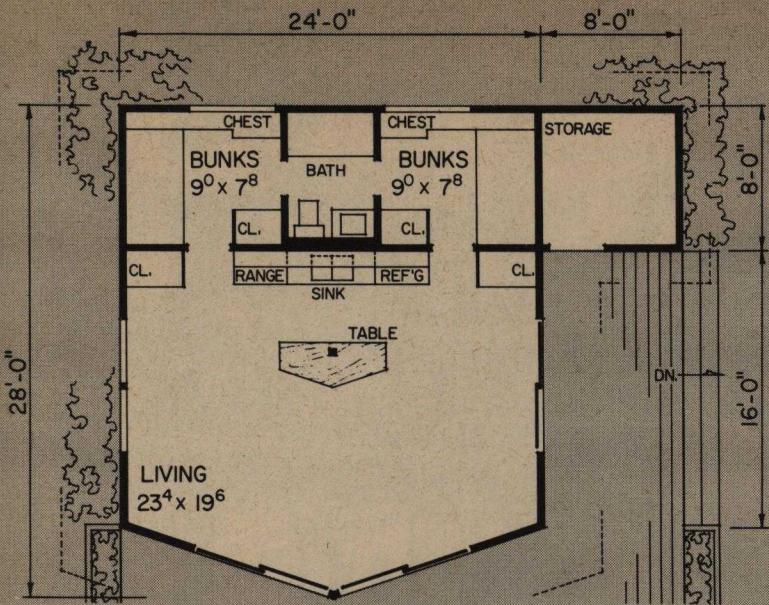

DESIGN G 1404

1,314 sq. ft., 12,230 cu. ft.

Similar in concept to Design G 1156 above, this hexagonal vacation home features two isolated bedroom wings—one for the parents, the other for the children. At the center of the spacious living area is the appealing fireplace. Sliding glass doors provide access from all areas to the partially covered rear terraces. Certainly an unusual home away from home.

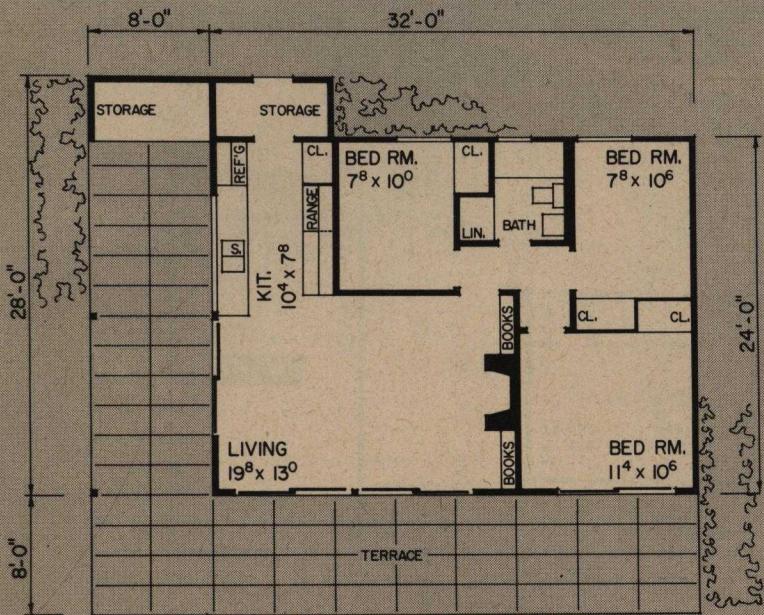

DESIGN G 1403

698 sq. ft., 7,441 cu. ft.

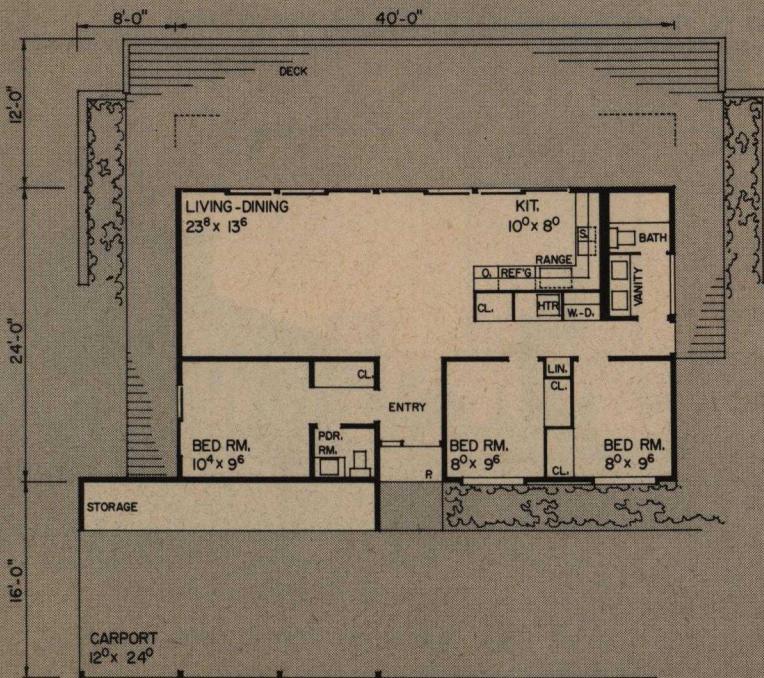

Reminiscent of the prow of a ship, this attractive cottage is most efficient. The two bunk rooms, which will sleep four people handily, are separated by the full bath. The large living area will function as the "great family room" with its centrally located dining and game table and its compact kitchen area. The overhanging roof provides a measure of shelter for the terrace or deck. The storage room is ideal for boating and fishing equipment.

DESIGN G 1402

768 sq. ft., 7,296 cu. ft.

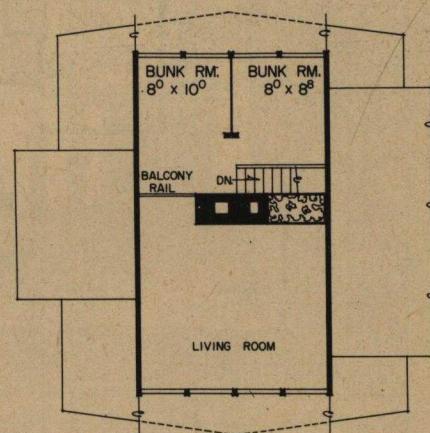

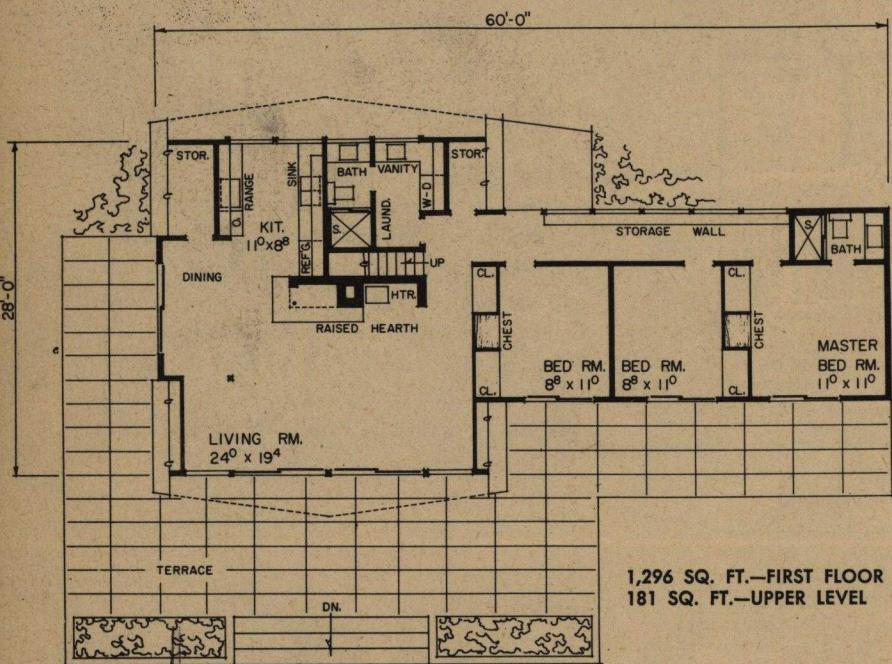

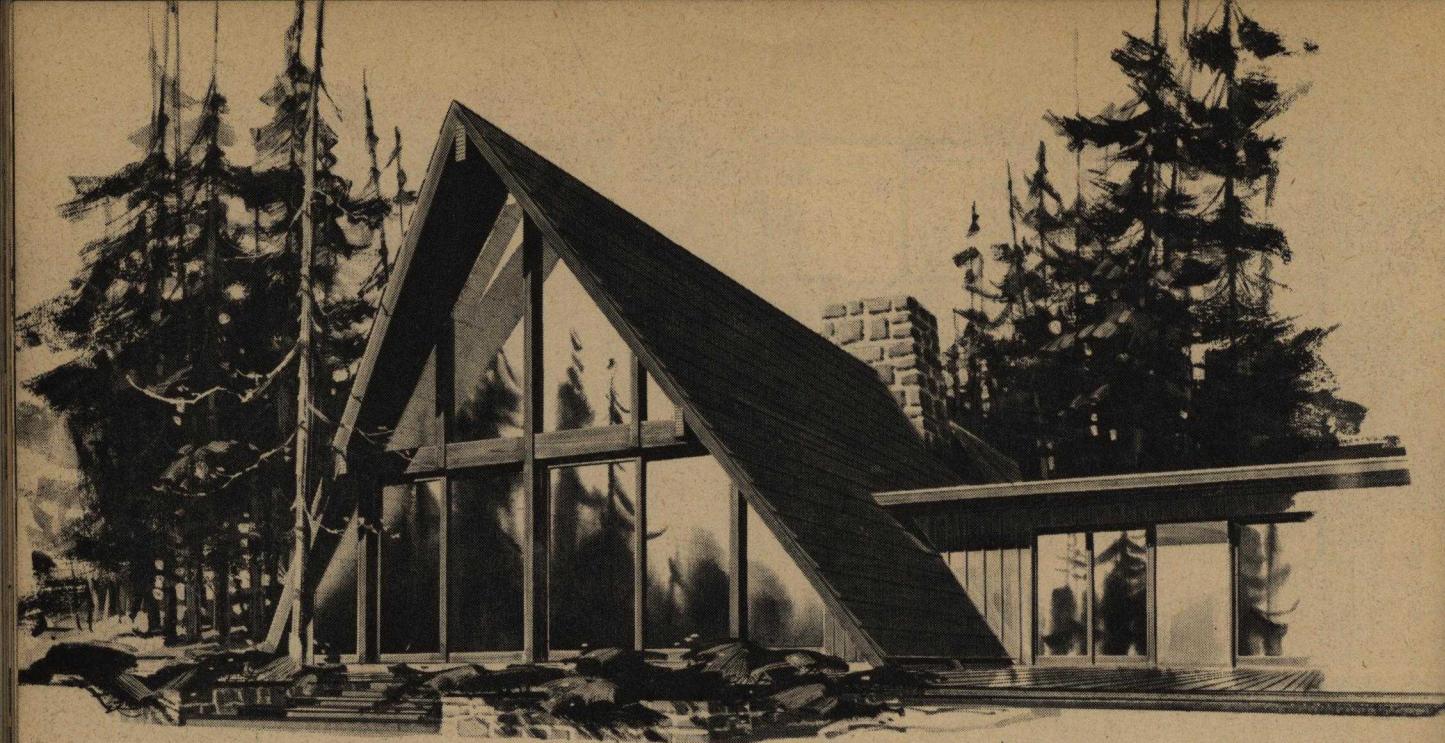

This straightforward, three bedroom cottage features a fine lake-front exposure. Four sets of sliding glass doors open to the terraces. The side terrace is covered and because of its proximity to the kitchen will function conveniently as an eating terrace. Entry to the cottage from the street side is through one of the two large bulk storage areas. The living area is highlighted by the fireplace which is flanked by book shelves. The kitchen has plenty of counter and cupboard space.

DESIGN G 1400

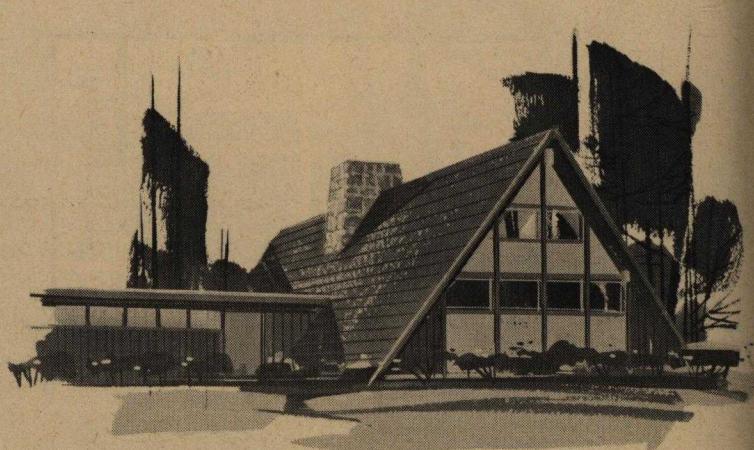

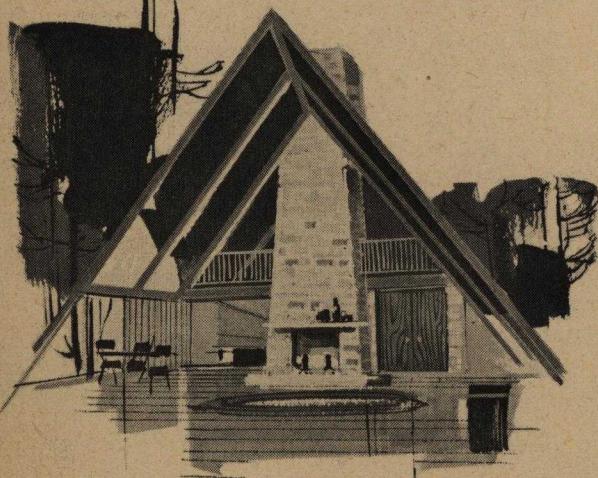

970 sq. ft., 9,370 cu. ft.

A flat overhanging roof, a dramatic wall of glass plus an inviting wood deck help make this an exciting vacation home. Designed, also, to function as the family's vacation retreat in the winter, this home will pay dividends the year 'round. A study of the floor plan reveals the many convenient living features — three bedrooms, an extra washroom, a full bath with twin lavatories, combination washer-dryer space, and built-in cooking equipment. Note carport storage.

DESIGN G 1406

The two A-frames on these pages represent outstanding examples of this dramatic type of construction. These two versions vary greatly in size, livability and construction costs. Study the floor plans of these two exciting vacation retreats. Decide which will suit your living requirements and budget.

LAKE VIEW

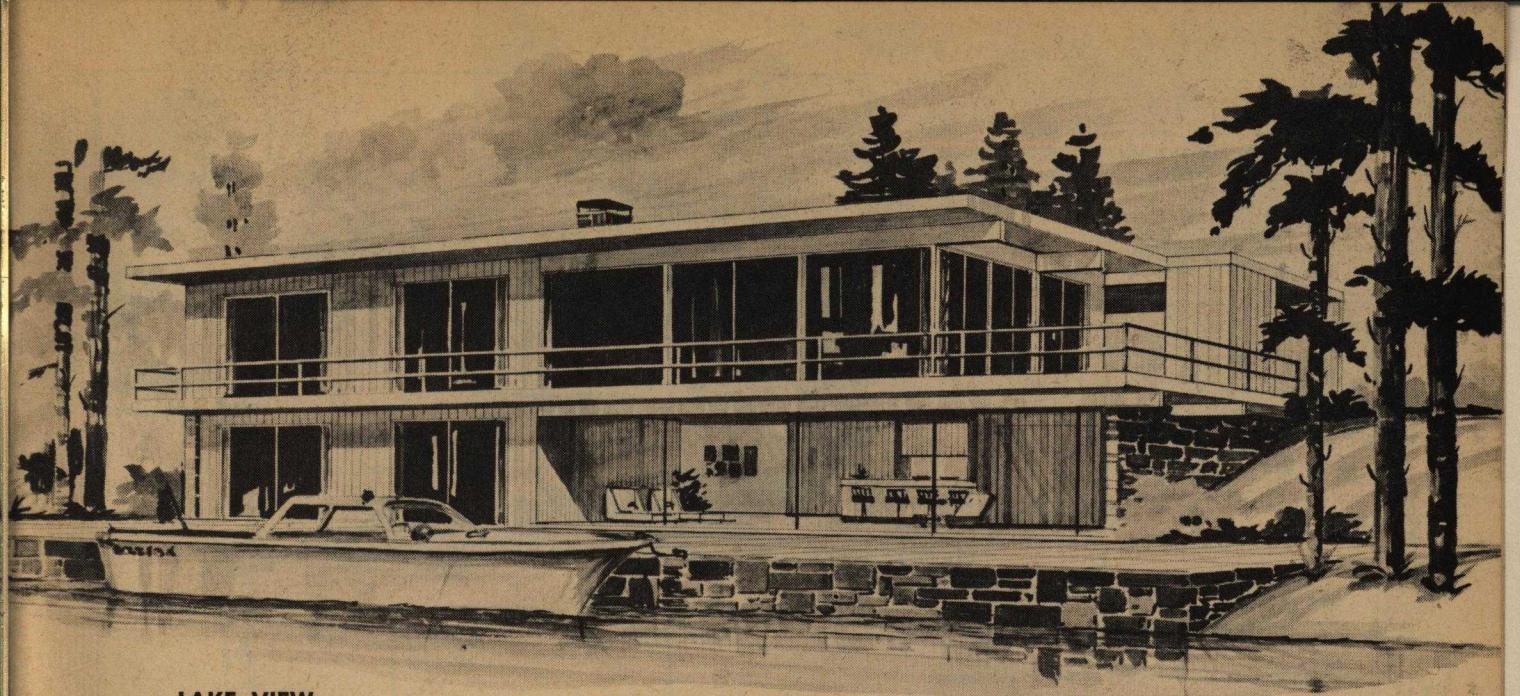

DESIGN G 1207

29,309 cu. ft.

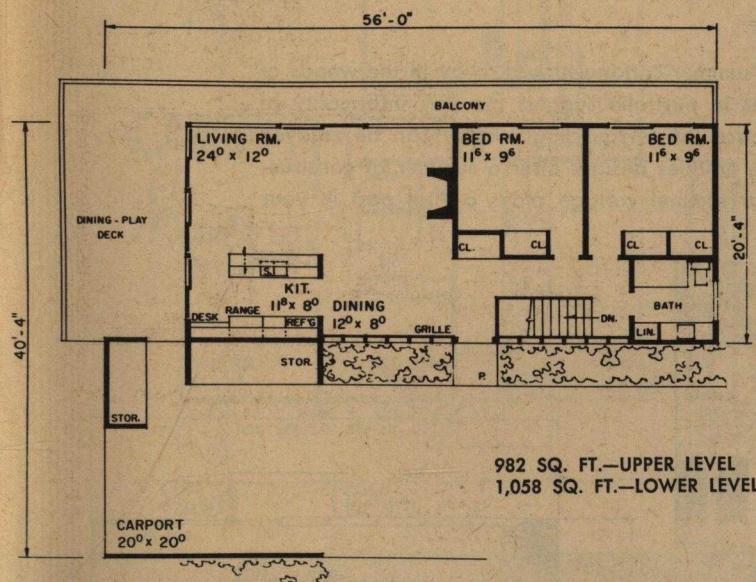

An excellent summer home oriented to exploit the sloping lake-front site. Its pleasing one story front exterior belies the dramatic appearance of its informal, two-story rear exterior. Study the plan carefully.

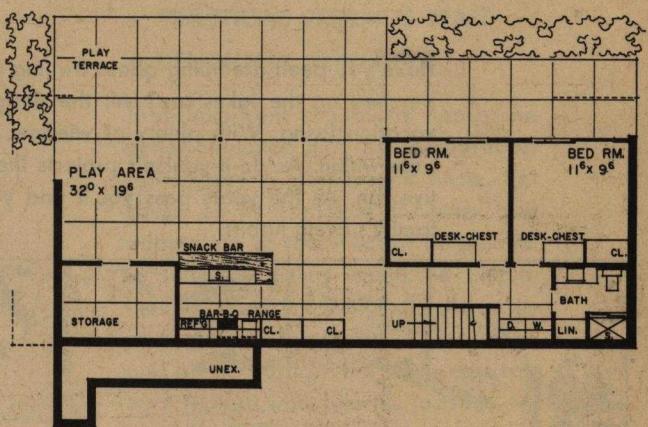

STREET VIEW

LAKE VIEW

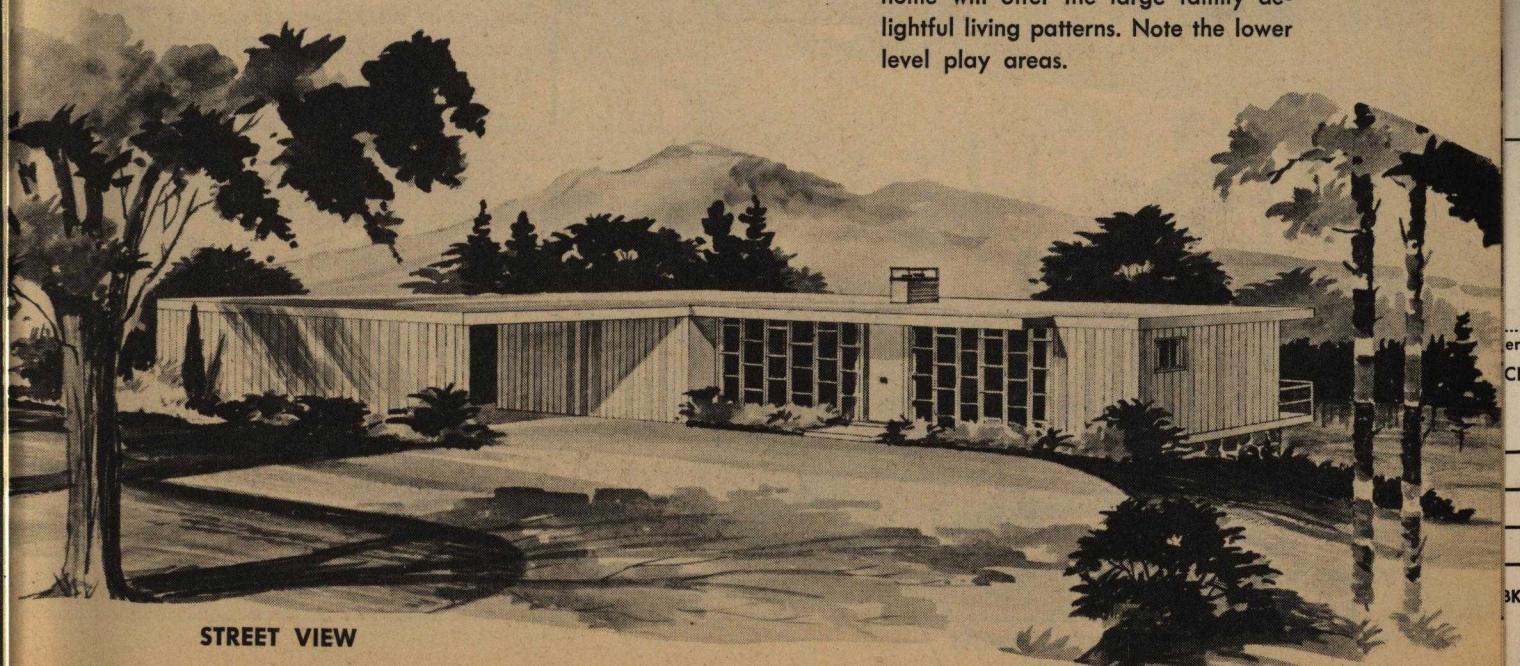

982 SQ. FT.—UPPER LEVEL
1,058 SQ. FT.—LOWER LEVEL

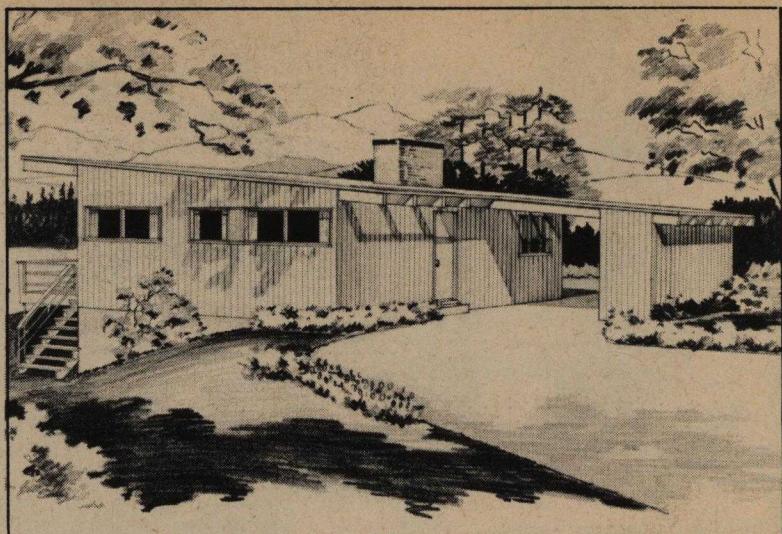

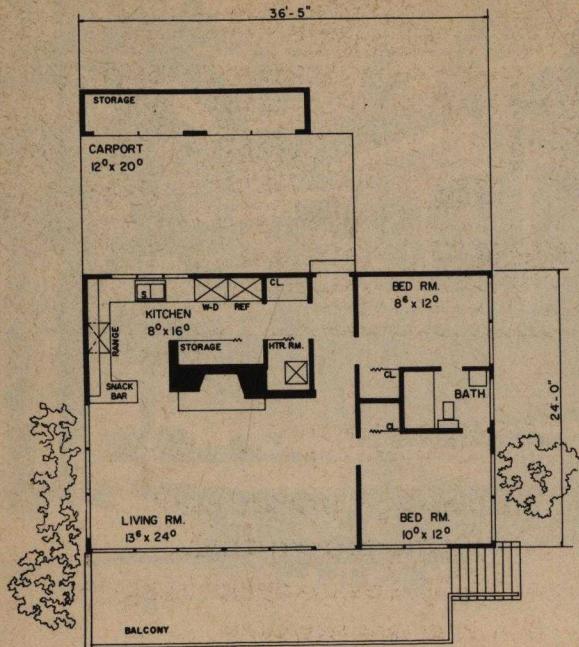

DESIGN G 1411
17,621 cu. ft.

Whether adapted to shore or suburban living this two-level contemporary home will offer the large family delightful living patterns. Note the lower level play areas.

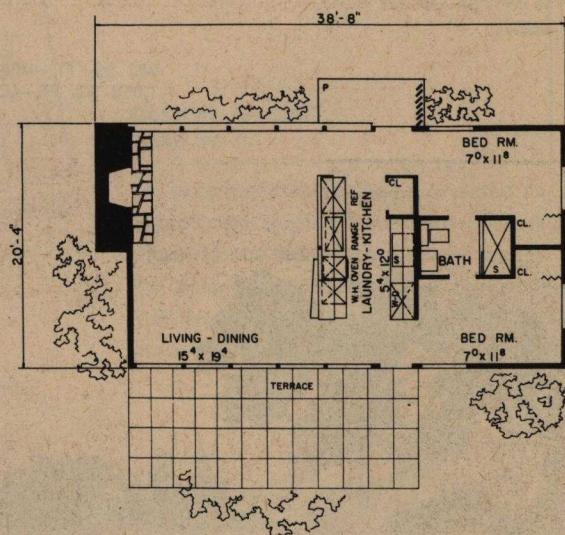

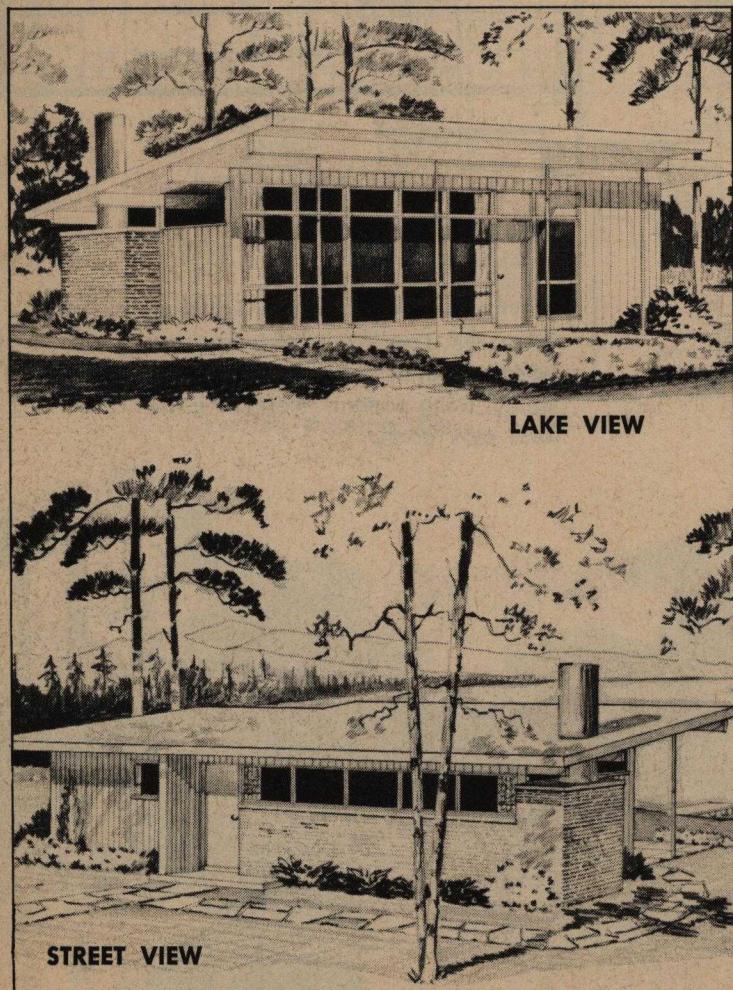

STREET VIEW

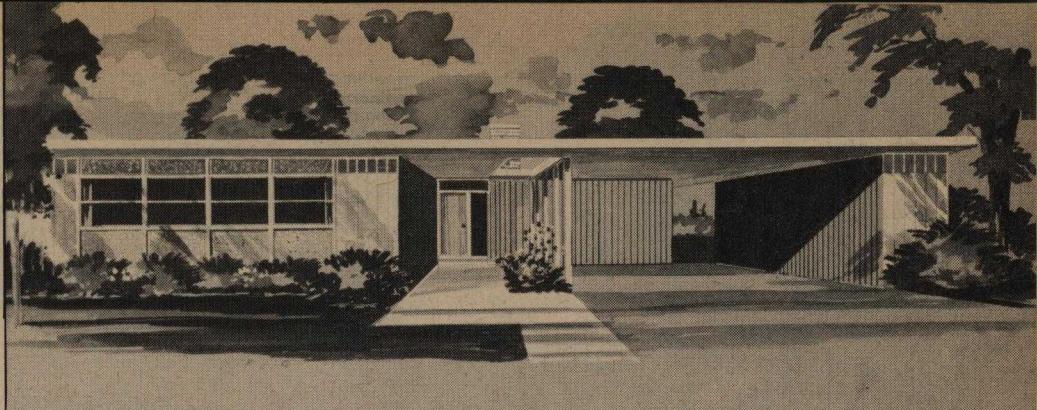

DESIGN G 674 • 875 sq. ft. • 8,740 cu. ft.

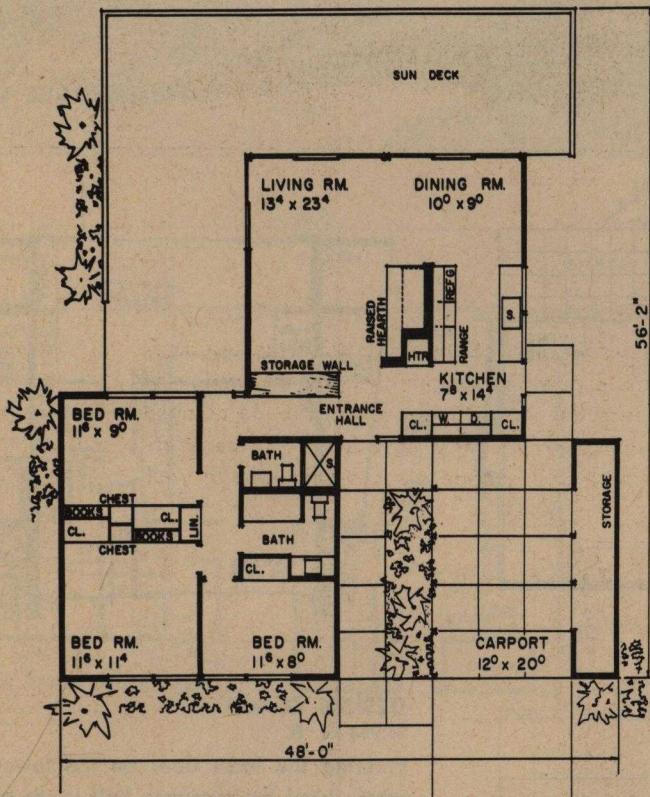

Have you been dreaming about owning a summer cottage tucked away in the woods or perched on the lakeshore? All the designs in portfolio suggest the gay informality of vacation living. With plenty of window space the surrounding country can be enjoyed from within. As do-it-yourself projects these unique designs offer a summer of constructive fun. As the years pass you'll find your summer cottage plays a vital part in your family's living habits.

DESIGN G 673
720 sq. ft., 6,660 cu. ft.

STREET VIEW

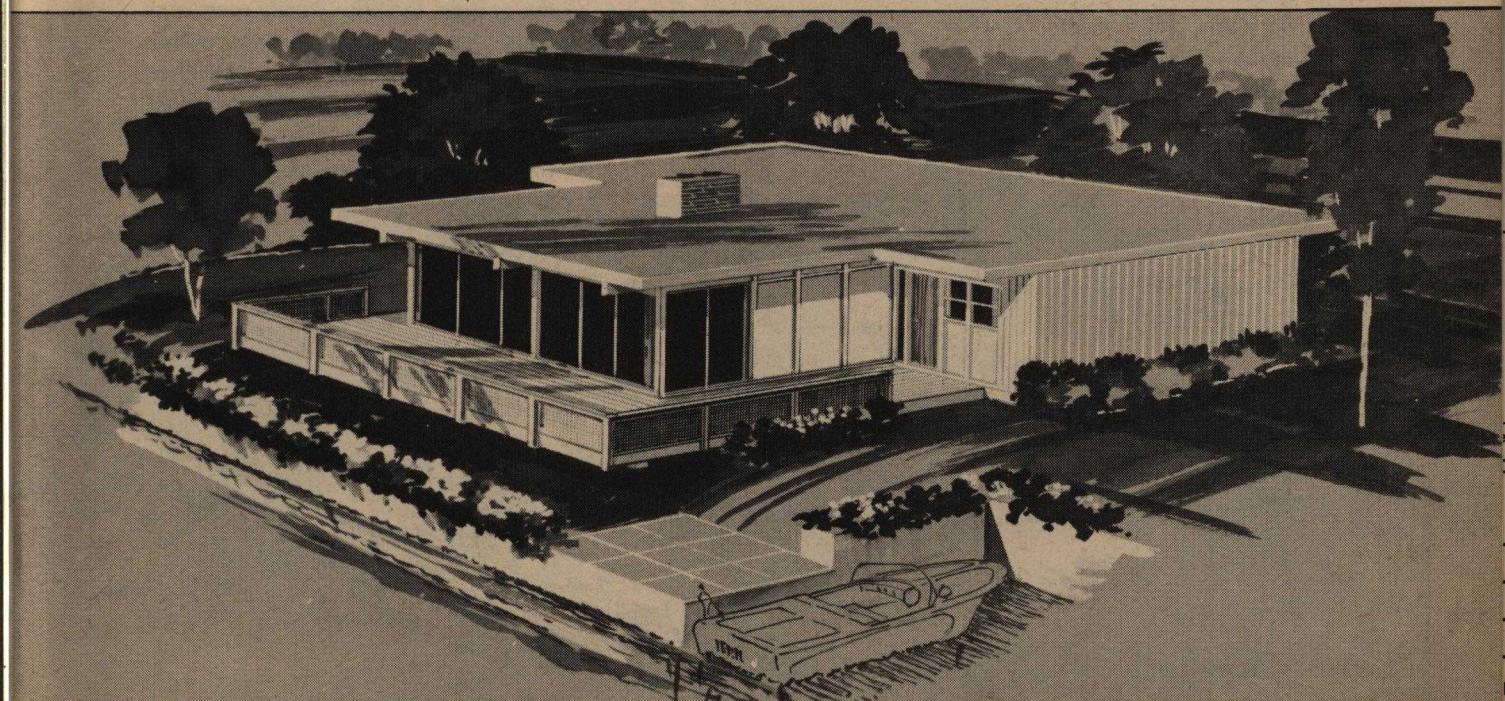

DESIGN G 1409

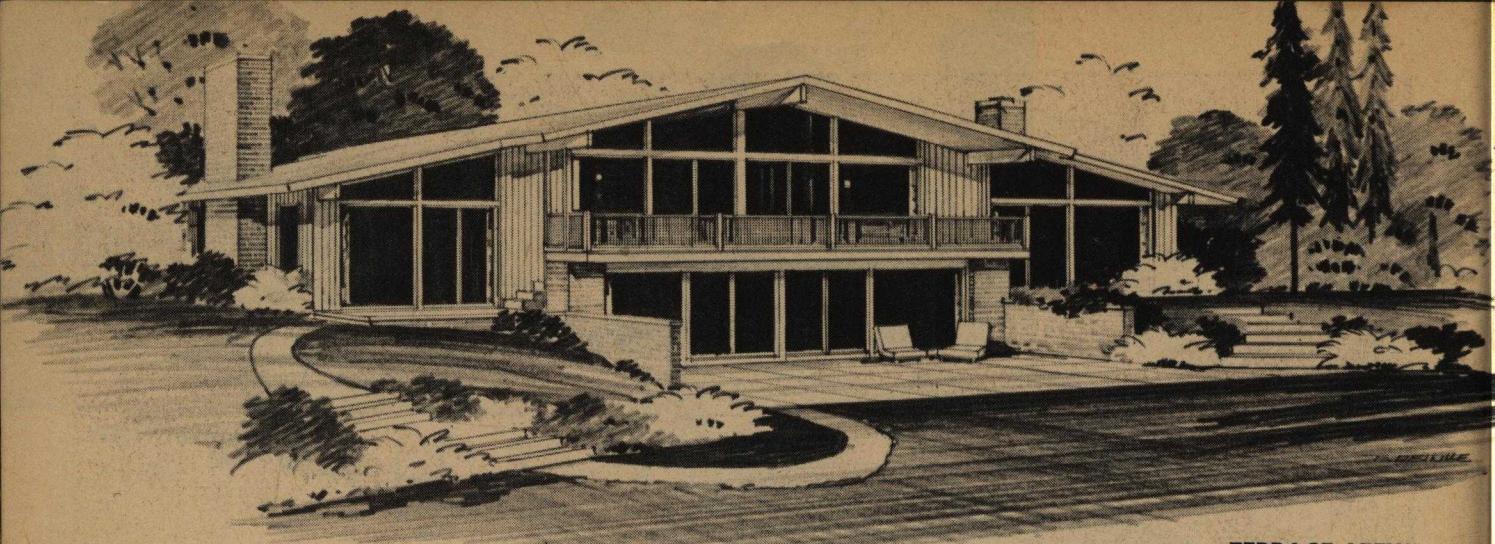

1,120 sq. ft., 9,890 cu. ft.

- DRAMATIC ENTRANCE WALK
- ISOLATED SLEEPING ZONE
- SPACIOUS LIVING-DINING AREA
- ATTRACTIVE FIREPLACE
- PRACTICAL STORAGE WALL
- DELIGHTFUL SUN DECK

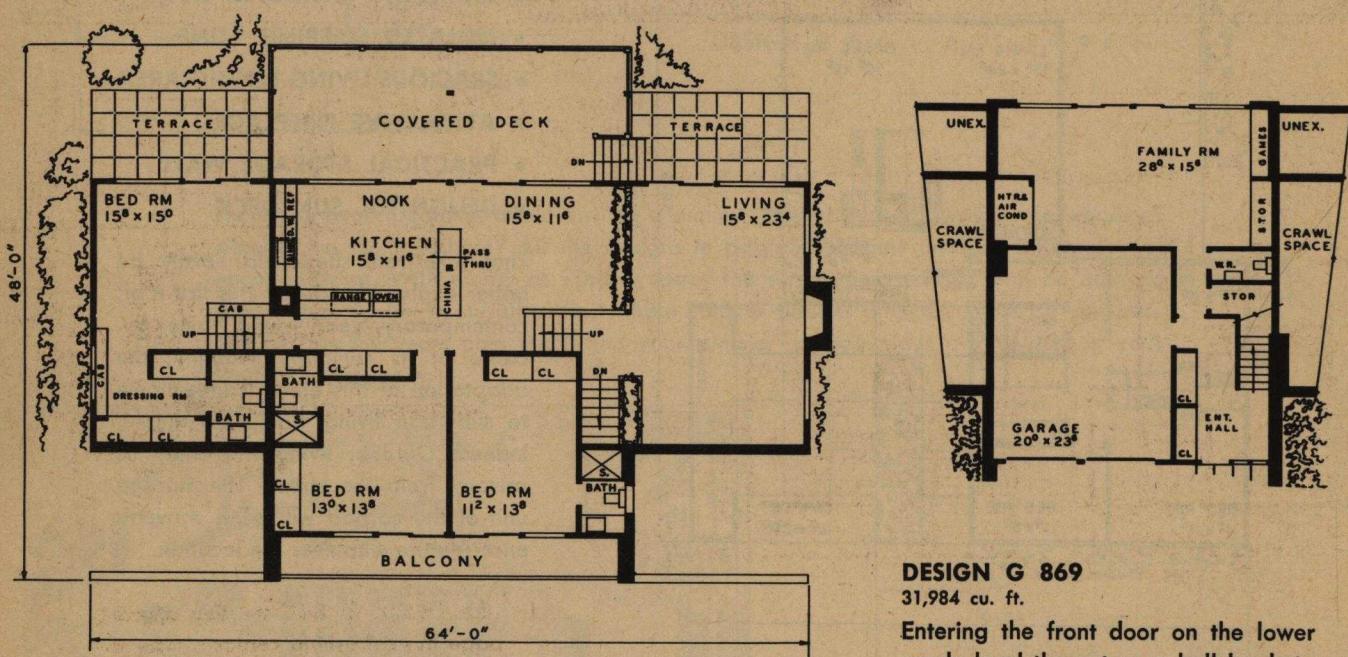

That lake-front site could hardly be better exploited than by this flat-roof, contemporary, year 'round home. Because of its complete livability, the adaptation of this efficient little home to suburban living would be simple, indeed. Outdoor living will enjoy its privacy from the street. The storage unit of the carport will be a convenience feature whatever the location.

LAKE VIEW

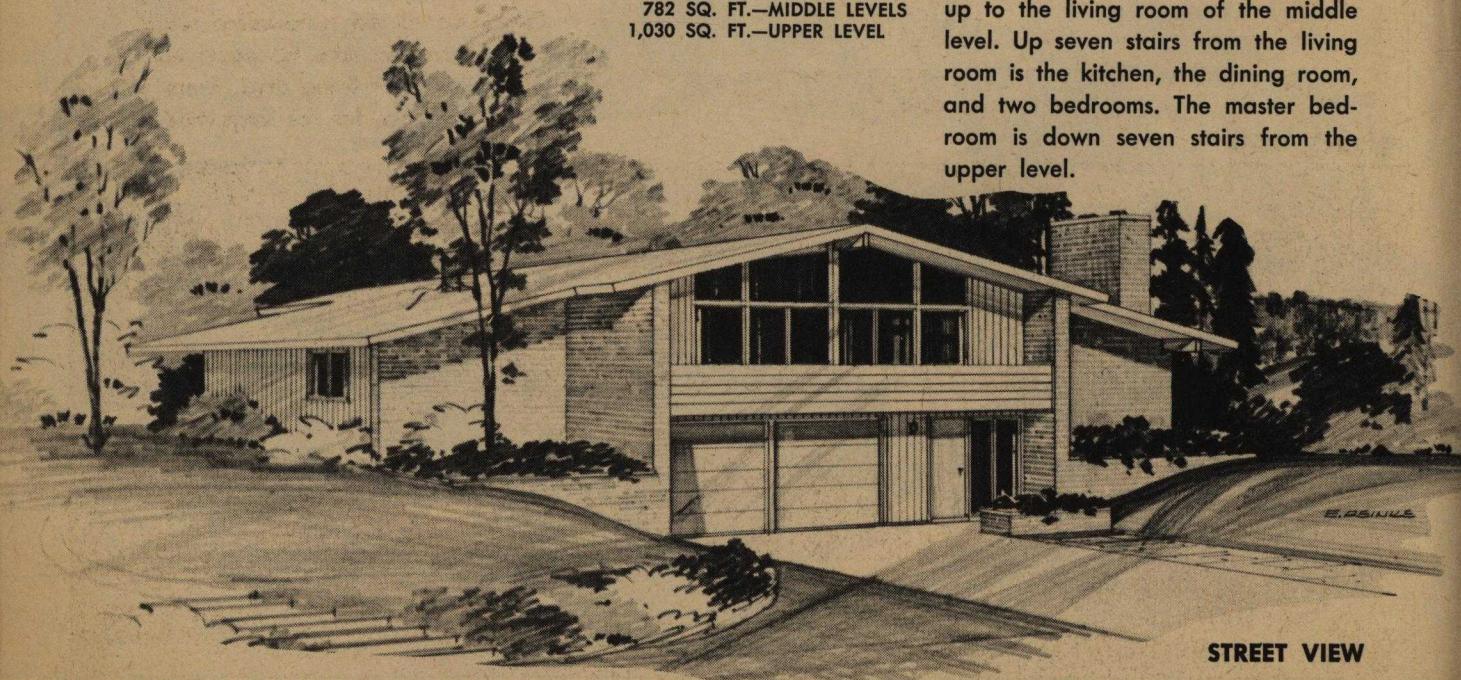

TERRACE VIEW

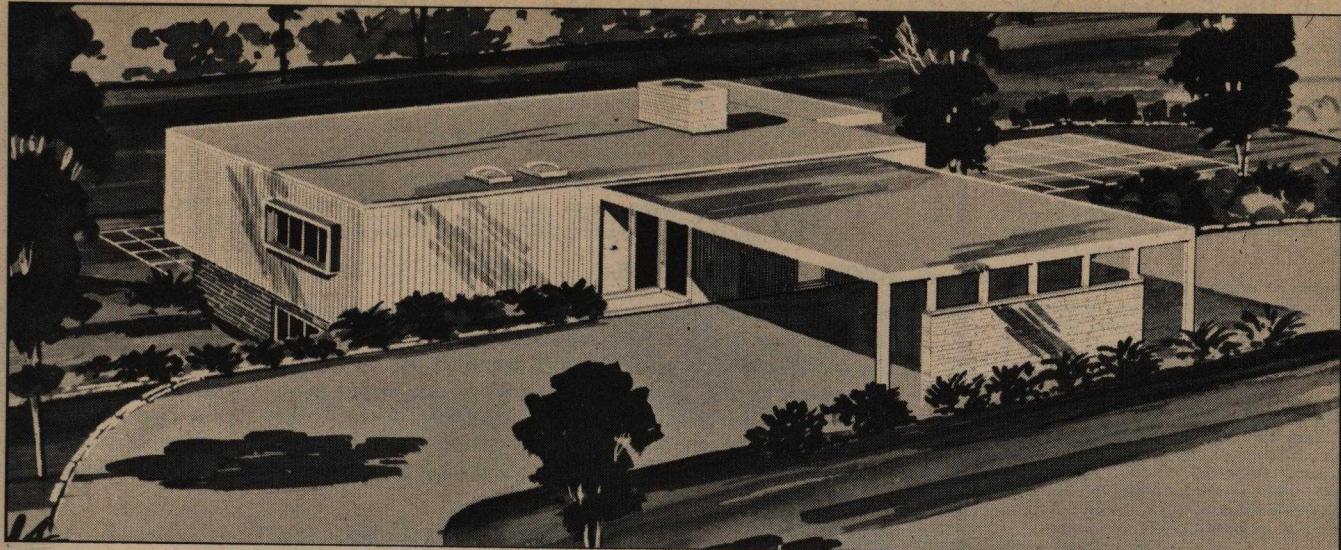

DESIGN G 869

31,984 cu. ft.

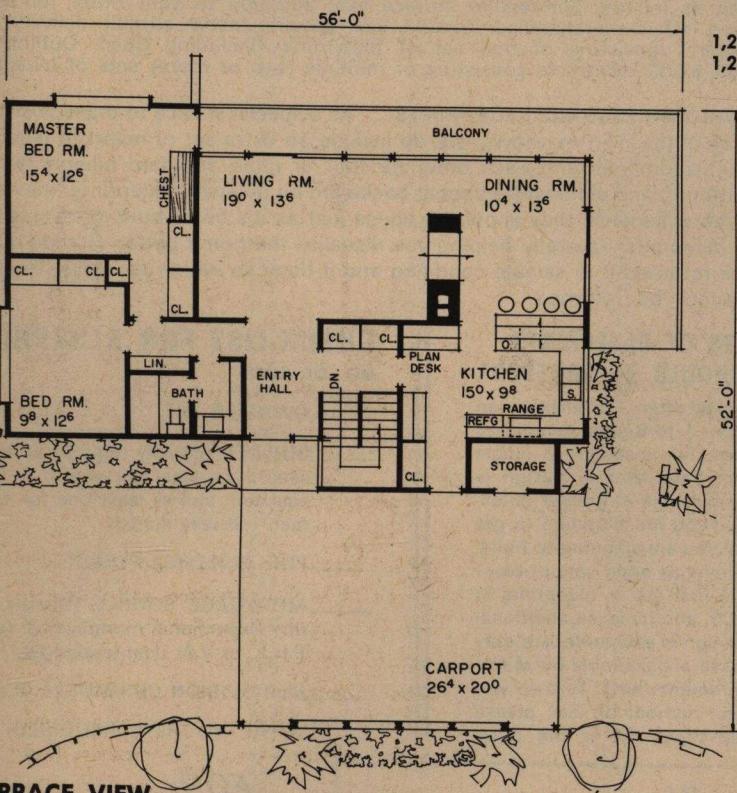

Entering the front door on the lower grade level the entrance hall leads to the garage, the huge family room, and up to the living room of the middle level. Up seven stairs from the living room is the kitchen, the dining room, and two bedrooms. The master bedroom is down seven stairs from the upper level.

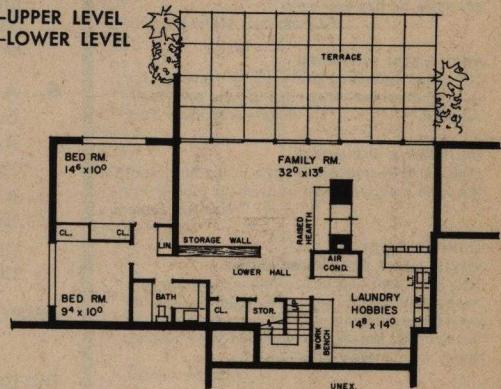

STREET VIEW

STREET VIEW

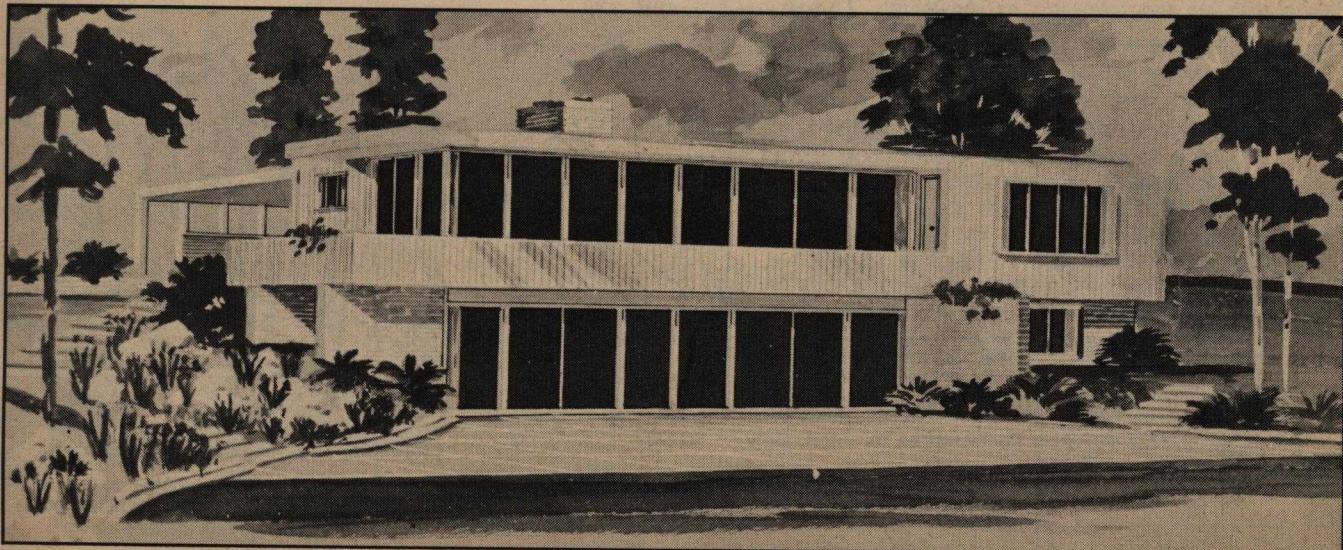

TERRACE VIEW

DESIGN G 1166

Like Design **G 869** on the opposite page this refreshing contemporary design adapts well to the water front site. Its major living areas all enjoy fine views of the surrounding scene. The balcony provides the upper level with an outdoor living area. There is plenty of space for the large family.

What Our Customers Say:

BUILDER FOUND PLANS COMPLETE AND ACCURATE

"Enclosed are snapshots of our new home built from your design. We have had many enthusiastic comments regarding its design. Our builder found your drawings most complete and accurate."

Detroit, Michigan

PLEASED

"I have just completed one of your designs. Am well pleased with the home. Didn't change plan any."

Athens, Tennessee

AMAZED AT COMPLETENESS OF PLANS

"I was very amazed that the plans I received from you were so complete for the small amount of money I paid for them. My contractor needs no more information than is contained in the plans."

Jasper, Indiana

BLUEPRINTS EXACT IN DETAILS

"We have had hundreds of compliments on the planning, design and layout of our rooms. You thought of everything. Our contractor had no trouble with the plans, and blueprints were exact in all details. We have recommended your plans to many of our friends to use your services."

Charleroi, Pennsylvania

CONTRACTOR COMPLIMENTS PLANS

"Our contractor said your plans are the most complete he has ever seen."

Framingham, Massachusetts

VERY MUCH SATISFIED

"Received said prints, just want to thank you for sending them rush as you did. We are very much satisfied."

Binghamton, New York

BUILDING A DUPLICATE

"We lost our home like this one in the hurricane. We liked it so well that we wish to rebuild it."

Creole, Louisiana

NOW STARTING

THIRD HOME PLANNERS' HOME:

"We have built two of your homes and are very happy with them. They were highly praised by everyone as they are so well arranged and have such perfect details. I'm sure we'll be just as happy with another one."

Wichita, Kansas

MEETS LARGE FAMILY NEEDS

"We are thrilled with your ideas... thank you for thinking in terms of large family needs."

Bluffton, Ohio

HERE'S ONE FROM TENNESSEE

"I just wanted to tell you how much my wife and I are enjoying our new home. Numerous people have been inquiring about the designer and passing nice compliments on the taste."

Cookeville, Tennessee

MOST LIVABLE

"We think we have one of the prettiest small homes in the valley, and thanks to your excellent plans and suggestions, one of the most livable."

Merced, California

BEFORE YOU ORDER . . .

1. **STUDY THE DESIGNS . . .** found in Home Planners' current selection of plan books. As you review these delightful homes you should keep in mind your family's living requirements—both indoors and outdoors. Although we do not make changes in plans, many minor changes can be made prior to the period of construction. If major changes are involved to satisfy your personal requirements, you should consider ordering one set of blueprints and having them redrawn locally. Consultation with your architect is strongly advised when contemplating major changes.
2. **REVIEW PAGES 16, 32, 48.**
3. **HOW TO ORDER BLUEPRINTS . . .** After you have chosen the design that satisfies your requirements, or if you have selected one that you wish to study in more detail, simply clip the accompanying order blank and mail with your remittance. However, if it is not convenient for you to send a check or money order, merely indicate C.O.D. shipment. Should time be of essence, as it sometimes is with many of our customers, send a telegram for the merchandise you wish sent C.O.D. postman will collect all charges, including postage and C.O.D. fee. C.O.D. shipments not permitted to Canada or foreign countries.
4. **OUR SERVICE . . .** Home Planners makes every effort to process and ship each order for blueprints and books the same day it is received. Because of this, we have deemed it unnecessary to acknowledge receipt of our customers' orders. For postage and handling remit as follows: For regular surface mail add 50¢ to your order for books, blueprints, and other merchandise. Should you require faster airmail delivery, add \$1.00 for orders consisting of one set of blueprints (including Spec. Outline and glossy); or add \$2.00 for orders consisting of multiple (two or more) sets of blueprints.

5. **A NOTE REGARDING REVERSE BLUEPRINTS . . .** As a special service to those wishing to build in reverse of the plan as shown, we do include an extra set of reversed blueprints for only \$5.00 additional with each order for four or more standard blueprints. Even though the lettering and dimensions appear backward on reversed blueprints, they make a handy reference because they show the house just as it's being built in reverse from the standard blueprints—thereby helping you visualize the home better. Standard blueprints may be returned if in salable condition and if done so within ten days. Reversed blueprints cannot be returned.

HOW MANY SETS OF BLUEPRINTS SHOULD BE ORDERED?

This question is asked often. The answer can range anywhere from 1 to 8 sets, depending upon circumstances. For instance, a single set of blueprints of your favorite design is sufficient to study the house in greater detail. On the other hand, if you are planning to get cost estimates, or if you are planning to build, you may need as many as eight sets of blueprints. Because the first set of blueprints in each order is \$20.00, and because additional sets of the same design in each order are only \$5.00 each, you save considerably by ordering your total requirements now. To help you determine the exact number of sets, please refer to the handy check list at the right.

CHECK-LIST FOR BLUEPRINTS

NO. OF SETS:

- _____ OWNER'S SET
- _____ BUILDER (Usually requires at least 3 sets: 1 as legal document; 1 for inspection; and at least one for tradesmen—usually more.)
